

Section N: OTHER NONCARDIAC PROCEDURES

Section Intent: The intent of this section is to list other non-cardiac procedures that may be done in conjunction with the primary surgical procedure.

Sequence #	Data Field	Data Field Intent	Field Name Clarification	Source Document
2570	Other Non-Card-Carotid Endart	Indicate whether the patient underwent surgical removal of stenotic atheromatous plaque or percutaneous/surgical placement of carotid stent in conjunction with the primary surgical procedure.	Right and or left carotid arteries are branches of the arch of the aorta that transverse the neck. <i>Example: If a carotid endarterectomy is done in the same OR session as a CABG, code the procedure as a CABG+ Carotid Endarterectomy (CABG + Other Non-Cardiac-Carotid Endarterectomy).</i>	Operative notes Operative report Physician progress notes
2580	Other Non-Card-Other Vasc	Indicate whether the patient had procedures treating peripheral vascular disease in conjunction with the primary surgical procedure.	May include bypass of superior vena cava syndrome, renal artery bypass, or lower extremity bypass.	Operative notes Operative report Physician progress notes
2590	Other Non-Card-Other Thor	Indicate whether the patient underwent procedures involving Thorax/Pleura in conjunction with the primary surgical procedure.	This includes, but is not limited to, open lung biopsy, lung resection, pulmonary artery embolectomy, pulmonary artery endarterectomy, mediastinal mass and/or lung dissection.	Operative notes Operative report Physician progress notes
2600	Other Non-Card-Other	Indicate whether the patient had any other non-cardiac procedure performed in conjunction with the primary surgical procedure that is not included within this section.	<i>Example # 1: A surgeon performs an open reduction internally fixation of the sternum with sternal plating: Do not code as Other Non-Cardiac Other-this should be coded as an isolated CAB.</i> <i>Example # 2: A patient has dialysis prior to surgery: Do not code as Other Non-Cardiac Other-this should be coded as an isolated CAB.</i> <i>Example # 3: An apical aortic conduit should not be coded as Other Non-Cardiac Other-this should be coded as Other Cardiac Other.</i>	Operative notes Operative report Physician progress notes
