January 2021 Release Completed Updates Con't

The following updates were released the weekend of January 16, 2021

NOTE: Updates are posted to the Notifications Section in the STS Platform

Platform Enhancements

Direct Data Entry

STS-4931: Algorithm for calculating the initial and total ventilation hours for ACSD v4.20.2 has been updated for direct form entry.

STS-5209: Case List Update for Direct Data Entry - Hospital NPI column is added to the case grid to allow users to filter the case list. The column is an optional setting and will not default displayed on the grid.

Resolved Issues

ACSD Non Analyzed Participant Dashboard Report

STS-4564: Fixed the issue of Other Non Card-Other Thor and Other Non Card-Other Vasc which was showing incorrectly on the dashboard report.

STS-5028: ACSD Participant Dashboard Report displayed '0' cases for Intraop blood products has been resolved in this release.

January 2020 Release Upcoming Updates

The following updates are targeted for the weekend of January 23, 2021

NOTE: Updates will be posted to the Notifications Section in the STS Platform once the deployment is completed.

Platform Enhancements / Resolved Issues

Data Quality Report

STS-5506 – Additional validation checks and edits will be added to the ACSD 4.20.2 data version (NOTE: Updated list will be posted to the library after deployment)

MIPS Performance Measures Report

STS-4732 – All measures will be updated to exclude patients who are identified as still in hospital for 2.9 and 4.20.2 data versions. Patient Centered-Risk Assessment Measure (STS7) exception logic will be updated to excluded Emergent or Emergent Salvage Status

Harvest Summary Report

STS-3824 – Harvest Summary Report displayed outstanding errors for PrepTR variable will be resolved in this release

ACSD Non Analyzed Dashboard Report

STS-5386 – Discrepancy in the PostOpEvent Calculation on the Participant Dashboard Report has been resolved. Total number of cases that answered Deep Sternal Infection/Mediastinitis was greater than total number of cases that answered "Yes, Both" and "Yes, Infectious" to Surgical Site Infection within 30 Days of Operation. This will be resolved in this release

Known Issue

ACSD Risk Adjusted Dashboard Report (Star Rating Display)

Users who are using Internet Explorer (IE) version **greater than 11** will encounter a display issue where the Star icon will appear with the ellipsis as shown below:

****IE is no longer a supported browser so this will be encountered for those users.**

IQVIA Issues Under Review

The following items are currently under review and will be targeted for future release

ACSD Non Analyzed Dashboard Report

****Operative Mortality variable option and calculations will be updated on the dashboard**

STS-4262 – Incorrect number of cases displaying on the dashboard report for Operative Mortality

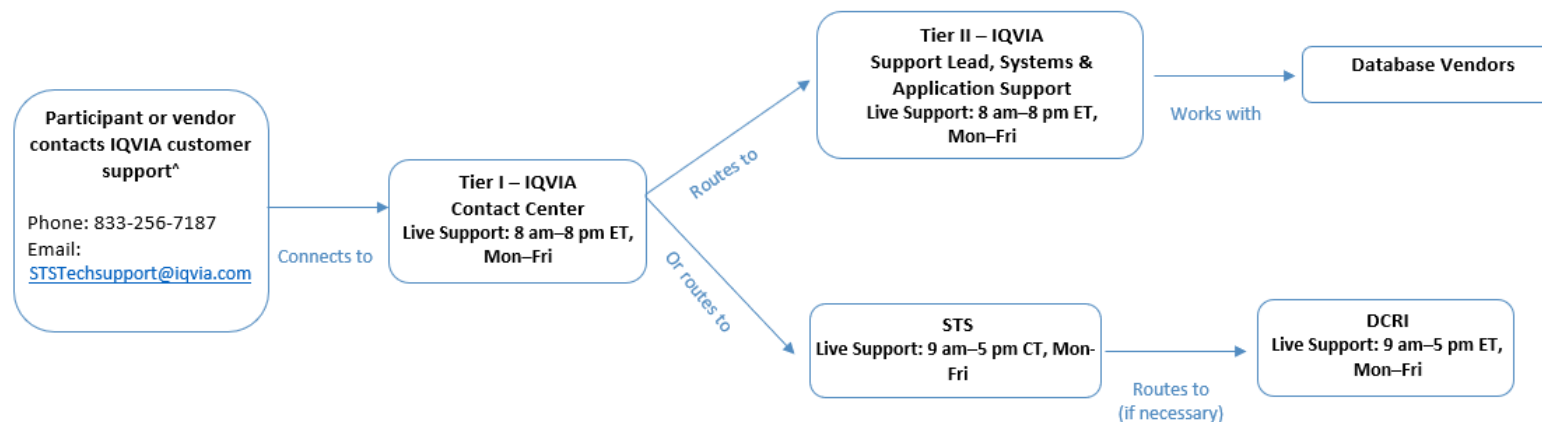

STS-5453 (Duplicate of above)

Please note: Submitted tickets are currently under review and the IQVIA support team will follow up on resolution and/or target release confirmation.
