ACSD Updates

Data Quality Report Updates

- Duplicate Patient Message Filter
 - Duplicate filter will appear if duplicate records are identified and system generates user warning message.
 - The filter will allow the user to remove the “Duplicate Message of existing record...” from the report results.

Data Quality Report

A screenshot of a web application interface for a Data Quality Report. The interface has a light blue header with the title "Data Quality Report". Below the header is a "File" section. On the left, there is a "Filters" panel with a search bar containing the text "Type to search filters" and a magnifying glass icon. Below the search bar is a "File Uploader" section with a list of filter options: "DUPLICATE" (checked), "Duplicate" (checked), and "Non-Duplicate" (checked). On the right side of the interface, there is a "File Based Validation" section with a status indicator that says "VALIDATION A" and "Passed".

Update
Harvest Summary Report Concept

VERY IMPORTANT!!

Future Report – Harvest Report Summary

- Will allow users to view a current status of validations on all records in the database
- Holistic view, instead of submission view
- Surgery date filtering capability
- Not limited to a harvest time period
 - Users can enter past dates
- Drill down capability to review cases
