**D. Risk Factors**

- "Unknown" should only be selected if "Patient/Family unable to provide answer."

**Did the patient have a laboratory confirmed diagnosis of Covid-19?**
- No (Harvest Code 10)
- Yes, prior to hospitalization for this surgery (Harvest Code 11)
- Yes, in hospital prior to surgery (Harvest Code 12)
- Yes, in hospital after surgery (Harvest Code 13)
- Yes, after discharge within 30 days of surgery (Harvest Code 14)

**Height (cm):**
**Weight (kg):**

Family History of Premature Coronary Artery Disease:
- Yes
- No
- Unknown

sts.org
Abstracting Covid-19 Fields

**Why is this field added?**
Sites have reported that patients who are found to be Covid-19+ are having worse surgical outcomes.

**Do we really need to go back to January to abstract this field?**
No. But, you can go back to January 1 if your site was impacted early on.

**Will these patients be included in outcomes?**
STS is in discussion regarding how these cases will be handled. We need to get data to see its impact.

**Can I abstract a patient who is assumed to be Covid-19+ but was not tested.**
No. ONLY code yes for a patient who has been confirmed to have Covid-19 through laboratory testing.
## Delayed Harvest, Public Report Postponed

| Harvest 2 and 3 are combined | Next ACSD Harvest close is August 21, 2020  
Or Dates through June 30, 2020  
Star rating report |
|-----------------------------|--------------------------------------------------------------------------------------------------|
| Public Reporting for 2020   | There will not be a refresh of the public reporting results on the STS website in 2020  
The next public reporting refresh will be January 2021  
Sites will still receive star ratings for 2020 in their reports but these will not be used for public reporting |
| V4.20 Go-live July 1, 2020  | At this point, we do not anticipate a change. In v4.20 go live  
The decrease in data elements will help ease data collection burden  
We will respond to the needs of our participants as we get closer |

</table>
Whoops...Did I Say That??

- TEVAR cases belong in the STS
- TAVR/TMVR cases are optional
  - They belong in the STS/ACC TVT Registry
  - NOT required to be put in the STS ACSD Registry
