</table>
IQVIA Update
Melanie Bent
August 2020 – Upcoming Release Update

Items below targeted for next release update weekend of August 1

Uploader/DQR

- STS-3249 – Uploader triggering critical error on the AntifibtranexInfRatedata variable if decimal values are uploaded for this field
- STS-3371 – Uploader triggering critical error on NCAAOthSp/chrombothsp/syndromeothsp version 3.3 variables indicating fields exceeded 100 character limit
- STS-3528 – VendorID field limit increased to accept 25 characters

Missing Variable Report

- STS-3251 – Missing Variable listing surgeon NPI as missing (reopened)
- STS-3200 – Missing Variable Report displaying missing results for ICUPUNQUIEID, should not be included
- STS-3344 – Missing Variable Report is displaying missing results ProcoaFactorVII3MCG when parent value is not set
- STS-3505 – Missing Variable Report is displaying missing results for ProcagDesmo3MCG when parent value is not set
Issues Under Review

• STS-3356 – CHSD Missing Variable Report displaying MT365STAT variable incorrectly – 1 year logic should be applied
• STS-3225 – CHSD Missing Variable Report displaying Autologous Transfusion
• STS-3501 – CHSD Dashboard – update logic to exclude cases in the missing percent calculation if the patient still in hospital variable is set to Yes
• STS-3389 – CHSD Chromosomal Abnormality – Other – Specify is missing, updated logic required to validate on demodataversion
• STS-3527 – Uploader showing critical errors (not impacting all sites)
The following enhancements will be applied the weekend of Aug 1:

**Missing Variable Report Updates**

- **STS-3134** – Update the Missing Variable Report mortality filter to include additional data variables
  - AdmitDt
  - OpType
  - Please note the below variables are required at the time of saving a record to the database, therefore they will not appear on the MVR since they will require data.
    - Primary Diagnosis
    - Primary Procedure
    - Date of Surgery

- **STS-3135** – Update the Missing Variable Report to allow users to filter cases by Index Operations
CHSD Future Reports

- Case Eligibility for Inclusion in Mortality Analysis
- Primary Procedure Determination/Assignment
- Risk Adjusted Dashboard (based on DCRI Risk Adjusted Harvested Data)
IQVIA Common Questions

There are items missing from the current dashboard, when will those items be added?

• STS and IQVIA are continuing to review priority and release timing for enhancements for existing reports. As updates are made to the platform, we will continue to update the CHSD user community.

• The Missing Variable Report is displaying a field as missing but I verified it was entered in my software vendor application. Why is it missing?
  • The common issue that occurs in these instances is the submitted .dat file did not include the value even though it displayed within the software vendor system.
    • An example - premature birth was selected for the patient in the software vendor system but the .dat file did not include the response. In this instance the user would have to contact their vendor for assistance.
