

Data Manager Training Session 4

- Data Submission (Harvest)
- Data Quality Report (DQR)

Melinda Offer, RN, MSN

What is a Harvest and What Do I Need to Know About It?

Harvest is a term that we use for data submission. It is important to know:

- **How many Harvest the ACSD has per year**
- **When the Harvest due dates are**
- **Which Harvest are Star Rating Harvests**
- **How to opt out of a Harvest**
- **How to do a Harvest**

✓ ACSD Harvest Deadlines

Note: If you have changed software vendors since you last harvested data to the STS Data Warehouse, or if your 10-digit Hospital NPI number or Hospital Name has changed, complete the [Participant Contact Form](#) to make these updates prior to your data submission. Or complete the [harvest opt-out form](#), if necessary.

2025 Harvest

Term	Harvest Submission Window Close	Opt-Out Date	Includes Procedures Performed Through:	Report Posting	Comments
Harvest 1	2/21/2025	2/25/2025	12/31/2024	Spring 2025	Star Rating
Harvest 2	5/23/2025	5/27/2025	3/31/2025	Summer 2025	
Harvest 3	8/22/2025	8/26/2025	6/30/2025	Fall 2025	Star Rating
Harvest 4	11/21/2025	11/25/2025	9/30/2025	Winter 2025	

Analysis for each harvest is based on a 36-month window.

Data Submission Open is continuous for all harvest terms. Submission Close occurs at 11:59 p.m. Eastern on the date listed.

Term

- Identifies which Harvest
- ACSD has 4 per year

Harvest Submission Window Close

- Date the submission is due
- Submission closes at 11:59 EST on that date

Opt-Out Date

- Last date you can Opt-Out of submission

Includes Procedures Performed Through

- Identifies surgery dates of procedures that need to be submitted

Report Posting

- This is when the National Report is expected to be available

Comments

- Indicates which Harvest are Star Rating

✓ ACSD Harvest Deadlines

Note: If you have changed software vendors since you last harvested data to the STS Data Warehouse, or if your 10-digit Hospital NPI number or Hospital Name has changed, complete the [Participant Contact Form](#) to make these updates prior to your data submission. Or complete the [harvest opt-out form](#), if necessary.

2025 Harvest

Term	Harvest Submission Window Close	Opt-Out Date	Includes Procedures Performed Through:	Report Posting	Comments
Harvest 1	2/21/2025	2/25/2025	12/31/2024	Spring 2025	Star Rating
Harvest 2	5/23/2025	5/27/2025	3/31/2025	Summer 2025	
Harvest 3	8/22/2025	8/26/2025	6/30/2025	Fall 2025	Star Rating
Harvest 4	11/21/2025	11/25/2025	9/30/2025	Winter 2025	

Analysis for each harvest is based on a 36-month window.

Data Submission Open is continuous for all harvest terms. Submission Close occurs at 11:59 p.m. Eastern on the date listed.

Now let's focus on the continuous open data submission – What does that mean?

Continuous Open Data Submission (Harvest)

- This means you can submit data anytime up until the Harvest due date and time.
- Harvest closes on 11:59 EST on the date listed.

Advantages of a Continuous Open Data Submission (Harvest)

Submit when it is convenient to you

- Easier to work around your work schedule, vacations, holidays, etc.

Submit earlier and more frequently

- Avoids last minute surprises / problems
- Fast feedback

Submit smaller batches of data

- Allows you to focus on problem areas
- Clean up data in smaller batches

What Does it mean to Opt-Out?

- Telling the Data Warehouse not to use your data for this submission (harvest) period
- All data submitted during this submission window will be dropped
- Analysis will revert to what it was at last submission
- By opting out the site acknowledges that they will not be included in analysis and not receive risk adjusted results for this harvest period.

Why Would I Opt-Out

The main reason for a site choosing to opt-out is because the data in the system doesn't reflect their site. This is usually because they realize they have been entering something incorrectly or they are too far behind and have a lot of data that has not been entered yet.

If you choose to Opt-Out, you can access the Opt-Out forms in IQVIA or on the STS Website

Adult Cardiac Surgery Database

The ACSD data collection forms and training manual require a participant login. (If you need assistance with your login credentials, [contact STS Member services.](#))

- ▼ National Report Overview, Data Checks, and Opt-Out Form
 - ACSD National Report Analyses Overview - POSTED DEC 23, 2024
 - End of Harvest Review Checklist (ACSD)
 - Errors and Warnings UPDATED July 2021
 - Missing Variable Report List Updates v4.20.2 (ACSD)
 - [STS Harvest Opt Out Request Form](#)

In the Opt-Out Form you will have to acknowledge that your data will be excluded from the current harvest period

On behalf of the Participant ID listed above, I am electing to opt-out of the harvest period referenced in the previous section. By opting out, I acknowledge that the Participant ID listed above will not be included in the data analysis and will not receive risk-adjusted results for the corresponding harvest period. *

A combine harvester is shown in a cornfield at sunset. The harvester is positioned on the right side of the frame, with its grain auger extended towards a grain trailer on the left. The trailer is being filled with grain. Two people are standing near the trailer, one in a blue shirt and one in a green shirt. The background features a line of trees and a white building. A vibrant rainbow is visible in the sky, arching over the scene. The overall atmosphere is peaceful and productive.

Now Let's Discuss How to
Do a Harvest

Sometimes I like to
treat myself at work
and just do one thing
at a time.

Educate yourself on how to do the Harvest

- **Watch educational videos and know your resources**

Collaborate with your Vendor to know how to create a Harvest Upload file

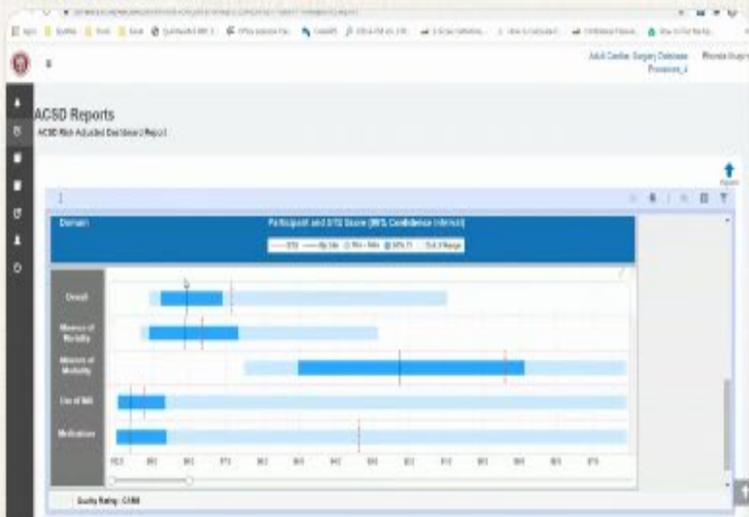

Make sure your Harvest file includes all necessary information on each case submitted:

- **Participant ID**
- **Surgeon NPI**
- **Hospital NPI**
- **Primary Anesthesiologist NPI if applicable**

Clean up your DQR and Missing Variable Report

Do all the above before 1159 pm EST on the date of Harvest close!

Harvest Upload File

- If you work with a Vendor, please collaborate with them as to how to generate a file for Upload to the IQVIA Platform
- For Direct data Entry (DDE), the record will be considered for analysis if the record is complete and saved in the DDE form

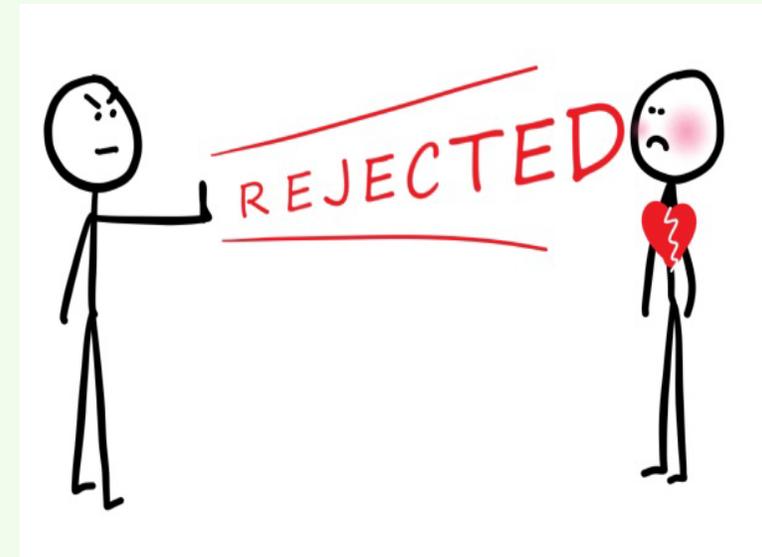

Make sure your Harvest file includes all necessary information on each record submitted:

- **Participant ID**
- **Surgeon NPI**
- **Hospital NPI**
- **Primary Anesthesiologist NPI if applicable**

Missing Surgeon, Hospital or Anesthesiologist NPI or Participant ID will cause critical errors, and the record will be rejected

HospNPI and SurgNPI needs to be specified on every record and those values need to match what we have on record for that participant. If the values don't match, then the RECORD is rejected.

Participant ID

- A unique 5 digit number assigned to each STS Database Participant
- If the entire surgeon group changes, a new contract is required which will generate a new Participant ID

National Provider ID

- Individual provider NPI does not change
- Hospitals have multiple NPIs- Choose the right one!
- Hospital NPI could change

Making Sense of the Numbers

National Provider ID (NPI)

- A unique identification number for covered health care providers
- A 10-position, intelligence-free numeric identifier (10-digit number)

<https://npiregistry.cms.hhs.gov/search>

Hospital NPI

Hospital NPI: Duplicate NPI Verified

- Each Hospital has one NPI on file at STS – provided by the participant
- Two hospitals may have the same NPI, as in the case of adult and pediatric hospitals or a hospital with two campuses
- This NPI is used to generate hospital level reports

General Overview of the STS IQVIA Uploader

Uploader Review Formatting Feedback Window	13

The IQVIA Uploader Functionality

The Uploader is a tool that provides users with the flexibility to upload files that contain patient record data.

Upload File

Check Mapping

Format Review

Validate File

Drag and Drop File Here to Upload

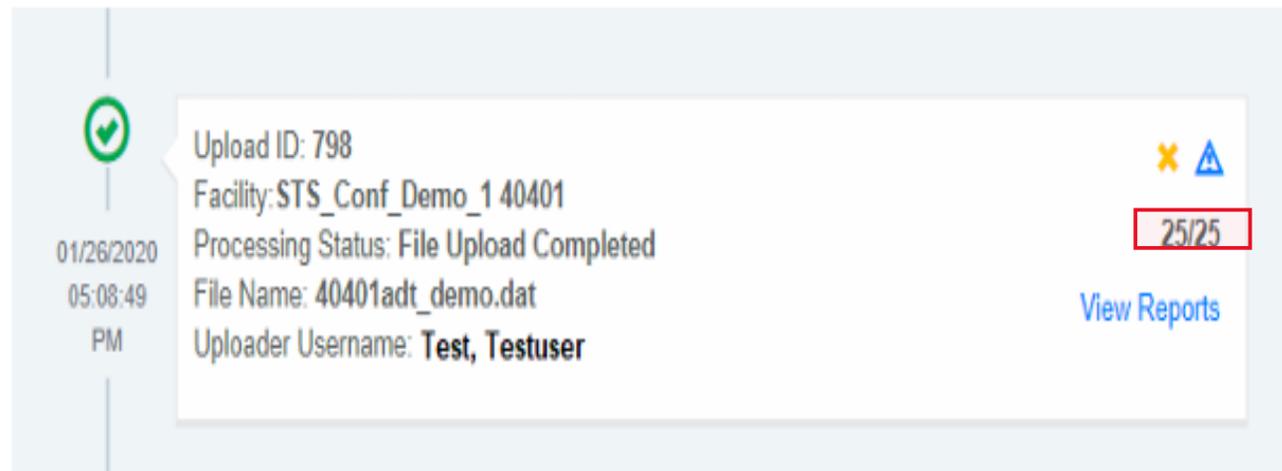

-or-

Choose File from Computer

(Max File Size: 50 MB)

Uploader History Report Section After a user performs an upload, the status (Failed/Success) of that upload will be automatically displayed under the uploader interface termed as the "upload history report". The upload history section will also display respective upload entries regarding past file uploads.

Record Processing Count Confirmation – The system will display a count of the total number of records that are accepted into the data warehouse and the count of the total number of records included in the uploaded file. Example, **25/25** indicates that there were 25 records which were successfully accepted into the data warehouse and 25 records that were included in the uploaded file.

The screenshot displays a single entry in the upload history report. On the left, a green checkmark icon indicates a successful upload. Below it, the timestamp "01/26/2020 05:08:49 PM" is shown. The main content area contains the following details: "Upload ID: 798", "Facility: STS_Conf_Demo_1 40401", "Processing Status: File Upload Completed", "File Name: 40401adt_demo.dat", and "Uploader Username: Test, Testuser". In the top right corner of the entry, there are icons for a failed upload (yellow 'x') and a warning (blue triangle), but the "25/25" record count is highlighted with a red box. A "View Reports" link is located at the bottom right of the entry.

01/26/2020 05:08:49 PM	<p>Upload ID: 798 Facility: STS_Conf_Demo_1 40401 Processing Status: File Upload Completed File Name: 40401adt_demo.dat Uploader Username: Test, Testuser</p>	<p>✘ ⚠</p> <p>25/25</p> <p>View Reports</p>
------------------------------	---	--

Uploader History Entries or Card Details

The uploader history report will display each upload that is attempted by all users that are assigned and has access to upload files for the respective participant group. The upload entry will display the following details:

File Status icon

- Success: The system will display a green checkmark icon 
- Failure: The system will display a red (x) icon 

Date/Time – The system will display the date and time of the upload entry

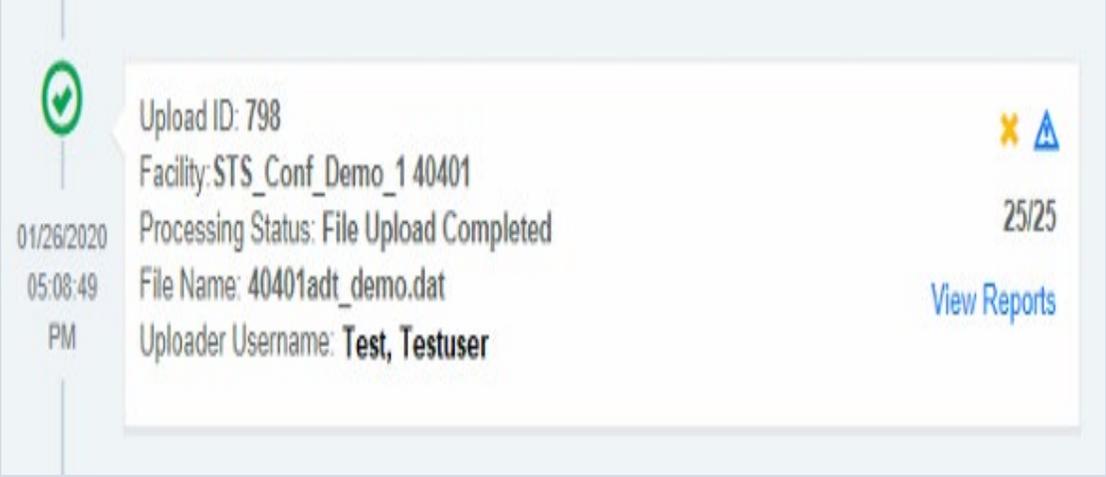

Upload ID – Automatic system assigned ID

Facility – The system will display the participant identifier (participant ID)

Processing Status – They system will display the uploaded file status: Failure, Completed

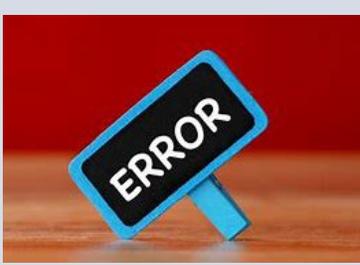

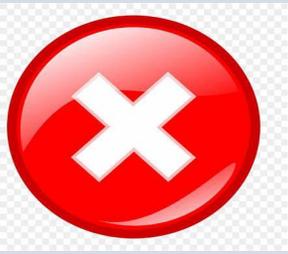

File Name: Name of the file uploaded (success or failure will display file name)

Uploader Username – Name of the user that attempted or completed the upload action

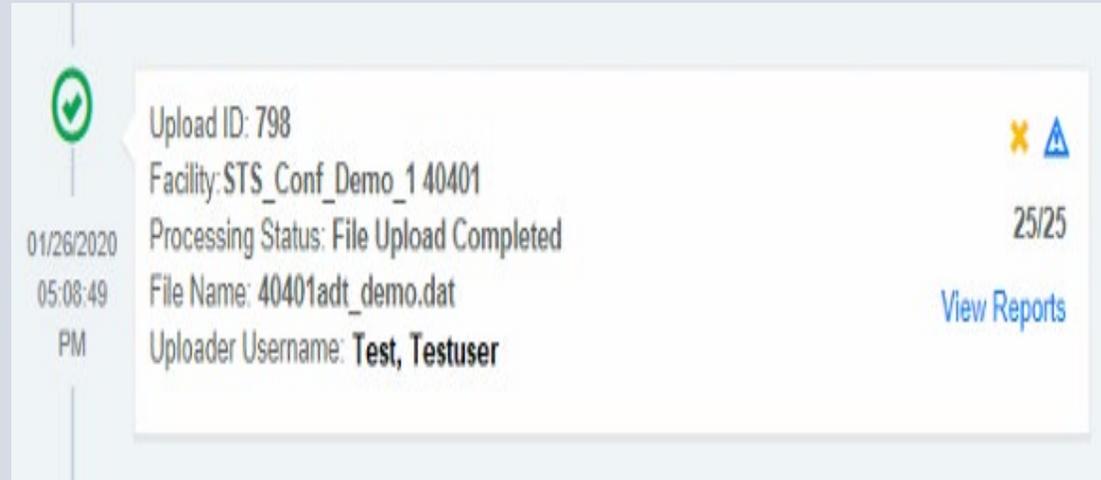

The screenshot shows a card for a successful upload. On the left, a green checkmark icon is displayed. To its right, the date and time '01/26/2020 05:08:49 PM' are listed. The main content of the card includes: 'Upload ID: 798', 'Facility: STS_Conf_Demo_1 40401', 'Processing Status: File Upload Completed', 'File Name: 40401adt_demo.dat', and 'Uploader Username: Test, Testuser'. On the right side of the card, there are two small icons (a yellow 'x' and a blue triangle) and the text '25/25'. At the bottom right, there is a blue link labeled 'View Reports'.

	Upload ID: 798	 
01/26/2020	Facility: STS_Conf_Demo_1 40401	25/25
05:08:49	Processing Status: File Upload Completed	
PM	File Name: 40401adt_demo.dat	View Reports
	Uploader Username: Test, Testuser	

- **Critical errors**  – The system will display a red (x) icon to indicate there were critical errors identified and the flagged records will not be uploaded to the data warehouse. These errors can be reviewed on the DQR for further details and will have to be corrected within the source software vendor system and re-uploaded to the IQVIA application.
- **Errors**  – The system will display a yellow (x) icon to indicate there were errors identified in the uploaded file. These errors are validating against the STS identified edit checks. **The IQVIA application will not make changes to the data for these edit checks.** Users will review the DQR for that uploaded file to determine further details regarding the items that are flagged as errors.
- **Warnings**  - They system will display a blue triangle icon to indicate there were warnings identified in the uploaded file. These warnings are validating against the STS identified consistency checks.

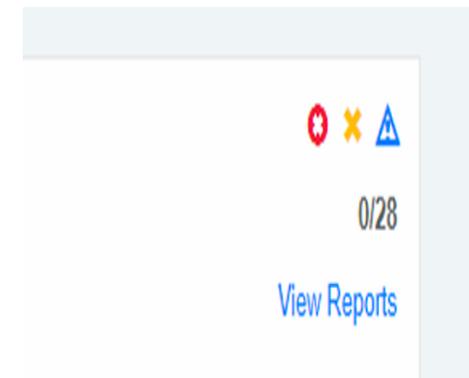

01/26/2020 05:08:49 PM

Upload ID: 798
Facility: STS_Conf_Demo_1 40401
Processing Status: File Upload Completed
File Name: 40401adt_demo.dat
Uploader Username: Test, Testuser

25/25

[View Reports](#)

Example below **shows 0/28** which indicates that there were 0 records added to the data warehouse and 28 records were included in the uploaded file.

QAC1135	The value entered on Total Albumin seems to be lesser or greater than the usual range(3.50-5.00). Please review.	totalbumin < 3.50 or totalbumin > 5.00
QAC1136	The value entered on Last A1C Level seems to be lesser or greater than the usual range(4.00-13.00). Please review.	a1c1vl < 4.00 or a1c1vl > 13.00

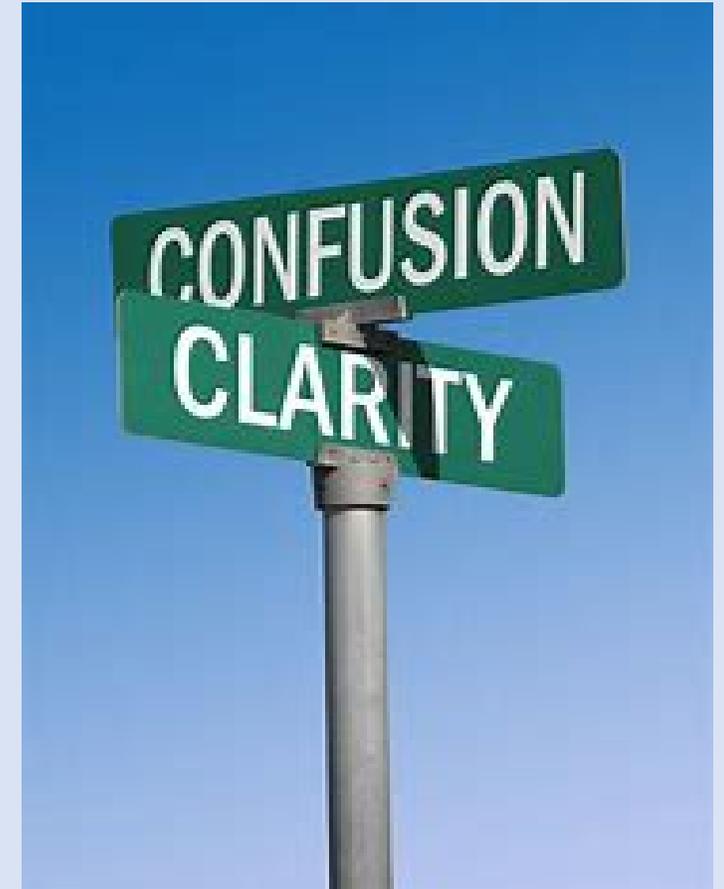

After you have completed your data upload, next move on to data clean-up

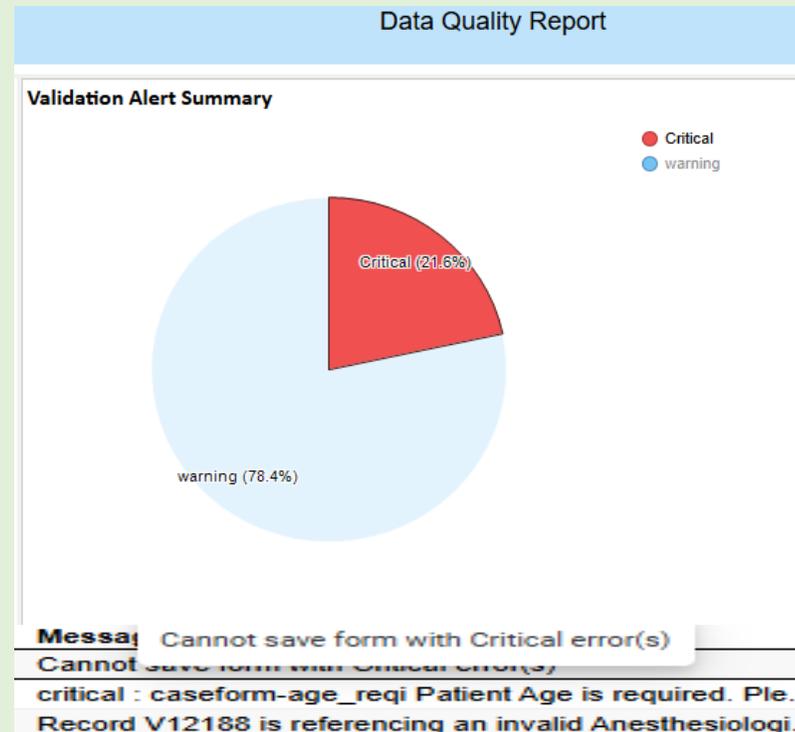

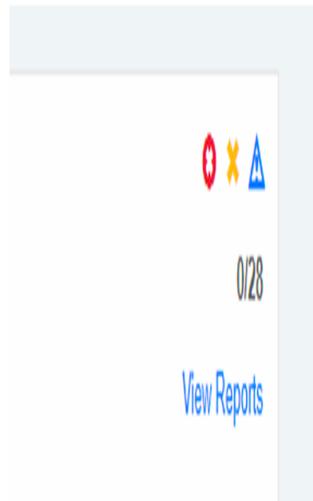

What is the difference between the Data Quality Report (DQR) and the Harvest Summary Report?

- They are essentially the same with one exception
- The difference is that if you have a critical error when you submit your data, you won't be able to run the Harvest Summary Report because the critical error will prevent the data from being uploaded to the Harvest Summary Report.
- The Harvest Summary Report only shows errors and warnings.

If you have a Critical Error, click View Reports to view your DQR to address the critical errors

Example below shows 0/28 which indicates that there were 0 records added to the data warehouse and 28 records were included in the uploaded file.

If you have no critical errors, then you can view your DQR or Harvest Summary Report using one of 2 methods

Operational Reports

ACSD Reports 

Missing Variable Report
This report identifies important field-specific data quality issues that affect the completeness of your harvest and may impact analysis and reporting of your data in the National Report. The data version, surgery year, short name and field name are shown for each issue to help you target and prioritize your data review and clean-up activity. Information on missing data is only reported for variables used in reports or risk-adjustment models.

Harvest Summary Report
This report will allow users to see the current status of system validations on all active records saved in the database based on the identified surgery data range entered.

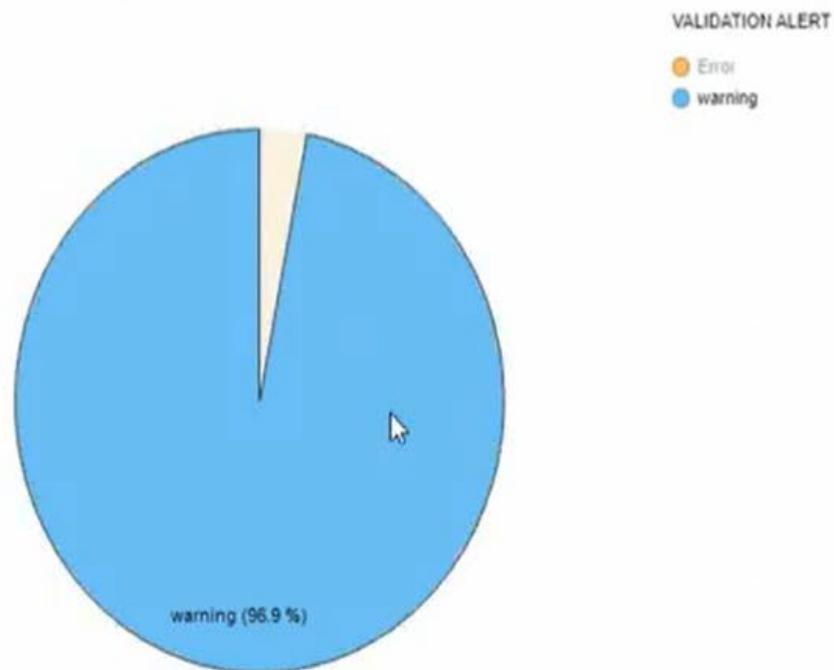

ACSD Participant Dashboard Report
This participant dashboard report will display NON-ANALYZED data results

- S. Readmission

Harvest Summary Report Components

The Harvest Report is separated into the following sections:

- Report Date Range
- Total Number of Records for Surgery Date Range
- Submission Summary Graph
- Alerts by Submitted Record
- Record Level Validation

Date Range and Total Number of Records

The Report Date Range will display the dates entered on the report parameter page

The Total Number of Records for Surgery Date Range will display the total number of records submitted to the database.

- **Please Note:** Records that encountered a **critical error** at any time of uploading **will not** be included in the total number of records for surgery date range.

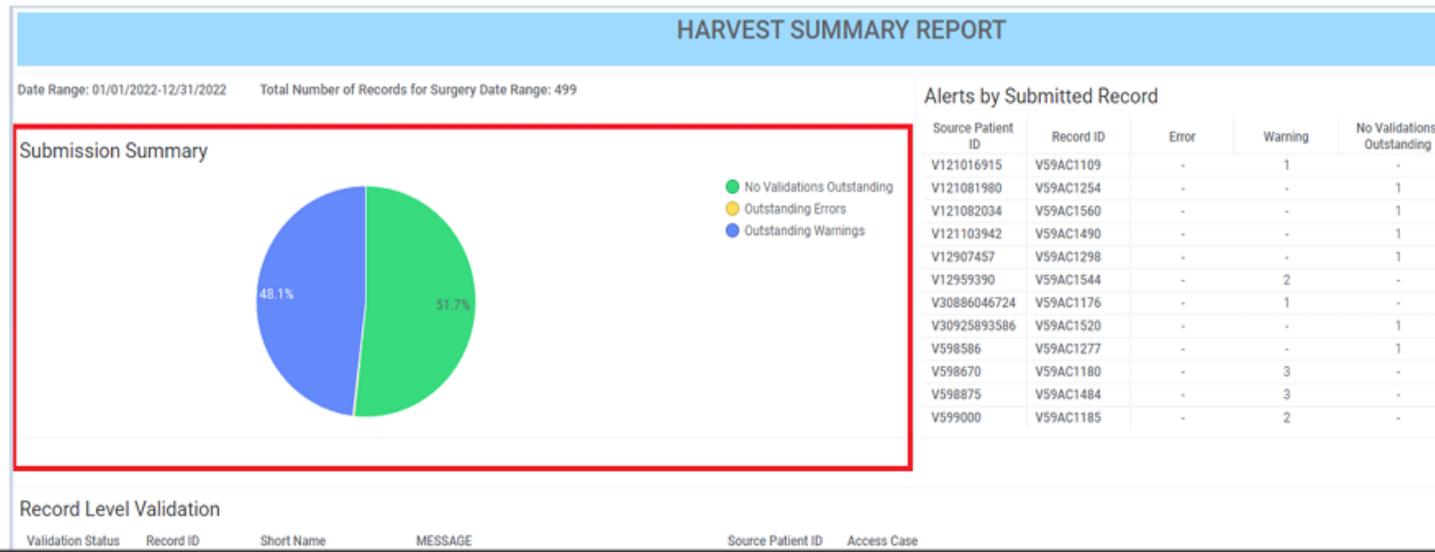

Submission Summary

The Harvest Report Submission Summary displays a graph with the percentage breakdown of the types of validations that are Outstanding or Not Outstanding.

The system can display up to 3 different types of validations that can appear on a record.

1. No Validations Outstanding
2. Outstanding Errors
3. Outstanding Warnings

Users can select the graph to interact with the report. When the user select a section on the pie graph or selects the items in the report legend, the report will highlight the Alerts by Submitted Record and will display the records in the Record Level Validation section.

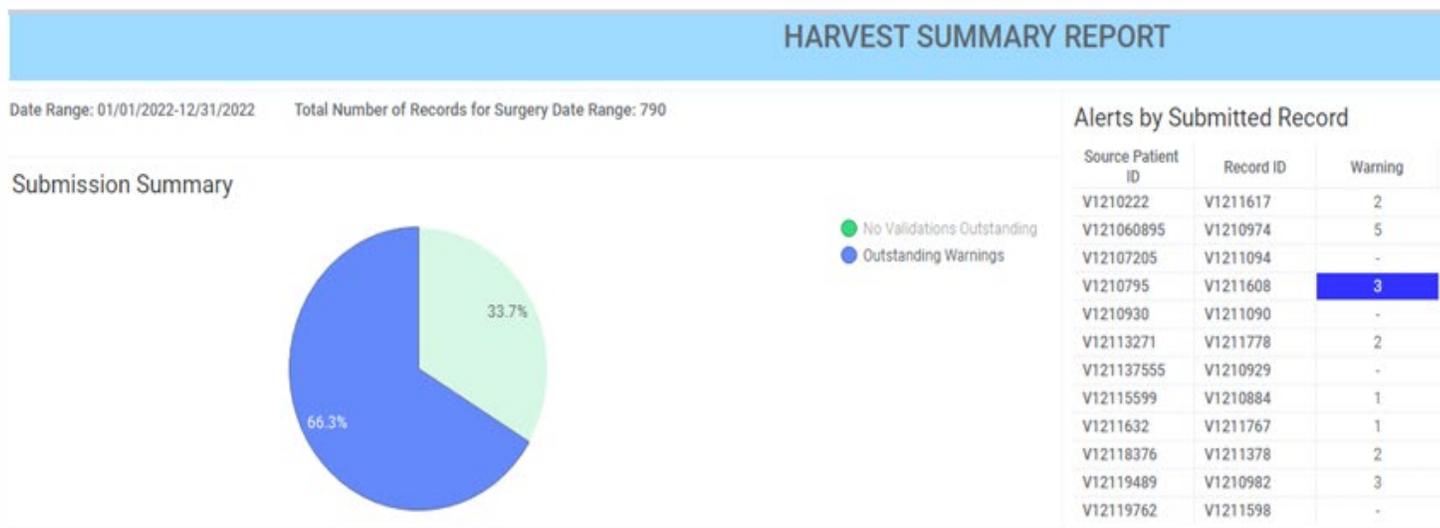

Record Level Validation

The Record Level Validation section of the report will display the records that have an outstanding error or warning message.

Users can select the Access Case link to navigate directly to the record to review.

- **Direct Data Entry Users** will be able to update and save the record.
- **Uploader Users** will can view (read-only) the record only. If updates are required, the user will have to access their software vendor system to make the changes and export the new file with the changes and upload to the STS Database to apply the change(s).

Validation Status	Record ID	Short Name	MESSAGE	Source Patient ID	Access Case
Warning	V1211608	perfustm	The value entered on Cardiopulmonary Bypass Time ...	V1210795	https://intsts-perf1.irr.iovia.com/qlatform/acsdreois-
Warning	V1211608	coolingtimepriorcircarr	The value entered on Cooling Time prior to Circ Arres...	V1210795	https://intsts-perf1.irr.iovia.com/qlatform/acsdreois-
Warning	V1211608	xclamptm	The value entered on Cross Clamp Time (min) seem...	V1210795	https://intsts-perf1.irr.iovia.com/qlatform/acsdreois-

Alert Counts

Users can review the list of patient IDs and Record IDs that have associated warnings and confirmation for records that have no validations outstanding.

The numbers that display with each associated warning or error will represent the count of outstanding validations that are associated with the record.

Once the user selected the cell under the column for either the Warning or Error, the respective patient records will display in the Record Level Validation section on the report.

Please Note: The count of 1 will always display for records that have No Validations Outstanding. This allows the records to be counted within the **Total Number of Records for Surgery Date Range** count.

Current Harvest Missing / Unknown % for Composite Rating

Main Category	Procedure	Year	#Missing	#Eligible	% Percent
Mortality Analysis	Isolated CABG	2021	0	146	0.00
		2022	1	203	0.49
		2023	4	212	1.89
	Isolated AVR	2021	0	69	0.00
		2022	0	85	0.00
		2023	1	71	1.41
	Isolated MVR or MV Repair	2021	0	138	0.00
		2022	0	105	0.00

- Mortality Analysis includes the following variables: Status at Hospital Discharge, Status at 30 days After Surgery, Operative Mortality
 - Outcomes and Process Measures Analysis includes the following variables: Internal Artery Mammery Used, Preoperative Beta Blocker, Discharge Anti-platelet, Discharge Beta Blocker, Discharge Anti-lipid

- In addition to meeting required data completeness thresholds, sites must meet the below case count requirements for the 36-month analytical window to be included into analysis.

CABG - 50 cases; AVR - 10 cases; AVR+CAB - 10 cases; MVRR - 36 cases; MVRR+CAB - 25 cases

- Color Code Legend

Red - Does not meet requirement for inclusion into composite ratings

Yellow - At risk of not meeting requirement for inclusion in composite

ACSD Reports ▼

Missing Variable Report

This report identifies important field-specific data quality issues that affect the completeness of your harvest and may impact analysis and reporting of your data in the National Report. The data version, surgery year, short name and field name are shown for each issue to help you target and prioritize your data review and clean-up activity. Information on missing data is only reported for variables used in reports or risk-adjustment models.

Harvest Summary Report

This report will allow users to see the current status of system validations on all active records saved in the database based on the identified surgery data range entered.

ACSD Participant Dashboard Report

This participant dashboard report will display NON-ANALYZED data results

ACSD Risk Adjusted Dashboard Report

The electronic ACSD Risk Adjusted Report includes analyzed harvest data results in place of the previous harvest reports provided as PDF to participants. This report allows participants to compare their risk-adjusted performance to that of similar participants (Like Group) and against the STS overall for the same time period along with some unadjusted Regional Outcomes.

Missing Variable Summary

Missing Variable Report

Missing Variable Report

Parameters

Date Range

01/01/2019

to

12/31/2019

Once you enter the Missing Variable Report, you will be able to select the date parameters

The Missing Variable Report will generate and display the variables for the respective reporting period

Missing Variable Summary

Missing Variable Summary

Data Version	Surgery Year	Shortname	Name	Missing %	N
4.20.2	2024	ABXDISC	APPROPRIATE ANTIBIOTIC DISCONTINUATION [3]	2	1/63
		ABXSELECT	APPROPRIATE ANTIBIOTIC SELECTION [3]	2	1/63
		ABXTIMING	APPROPRIATE ANTIBIOTIC ADMINISTRATION TIMING	2	1/63

- **Shortname** – Short name description for the data variable
- **Name** – Full field name description for data variable
- **Missing %** – Indicates the percentage of missing data for the identified fields that will require further review
- **N** – The number of records with this item missing / the number of records for which a value is expected
- **Report Indicators** - The below data variables are used in reports, mortality calculations, and/or risk models and will display an assigned bracketed number after the field name on the report.
 - Risk Adjustment Model [2]
 - National Quality Forum [3]
 - ProclId [4]

Missing Variable Summary

Report Description:
Use this report to determine which variables are missing data for the date range selected.

All
Risk Adjustment Models
Process and Outcomes Measures
Procd

Date Range: 10/01/2024- 12/31/2024

Data Version	Surgery Year	Shortname
4.20.2	2024	ADEVDELMETH01
		ADEVLOC01
		ADEVLOC02
		ADEVMODEL01
		ADEVOUT01
		ADEVUDI01
		ADEVUDI02
		ARCHPATIMA
		AVAVCOMPGRIMPLUDIAO
		DISCHMTPTRNFACUTEHOSPTD
		DISTTREATZONEAVAILMETH
		HIGHINTRAGLU

Report Description

The report description displays within this section to notify the user the intended use of the report.

Date Range

Displays the entered reporting date range that was entered on the Parameters page.

Report Filtering

Users will have the ability to filter the report based on the following data variable categories:

- All
- Risk Adjustment Models
- National Quality Forum
- Procd

Case List Display Columns

The user will have the ability to drill down to view the cases that have been identified as having missing data. The report will display the following columns:

- Operation ID
- Data Version
- Surgery Year
- Short name for the data variable that is missing an expected value
- Field name for the data variable that is missing an expected value
- Patient Display ID will display the assigned software vendor ID assigned to the patient record
- Access Case hyperlink will display the navigational link to display the identified case record

Interacting with the Missing Variable Report

Open Report in Full Screen

Users can open the Missing Variable Report in full screen mode by right selecting the Missingness tab located at the bottom left side of the report. A menu option will display indicating to Open page in new window. A new browser window will open and display the MVR.

NOTE: You will not have access to the parameters page from the new window. You will have to navigate back to the original report page to access the parameters page.

Missing Variable Report

Missing Variable Report

A screenshot of the Missing Variable Report interface. The interface has a light blue header with the title "Missing Variable Report" and a subtitle "Missing Variable Report". Below the header is a navigation bar with "File", "Edit", and "Visualizations" options. The main content area is divided into two sections: "Filters" on the left and "Report Description" on the right. The "Filters" section has a search box and an "Export" button. The "Report Description" section contains text explaining the report's purpose. At the bottom of the interface, there is a tab labeled "Missingness", which is highlighted with a red rectangular box.

Missing Variable Report

Missing Variable Report

A screenshot of the Missing Variable Report interface, similar to the previous one. The "Missingness" tab is selected. A right-click context menu is open over the "Missingness" tab, and the option "Open page in new window" is highlighted with a red rectangular box. The menu also includes options like "File", "Edit", "Visualizations", "View", and "Tools".

Generate the Entire List of Cases for All Missing Variables

Users can generate the entire case list for all identified missing data variables by selecting the Missing % and N columns on the Missing Variable Summary section of the report.

- In the Missing Variable Summary section of the report, right click using your mouse and highlight the Missing % and N columns.
- The highlighted cells will display in a dark blue color indicating they are active cells.

Missing Variable Summary					
Data Version	Surgery Year	Shortname	Name	Missing %	N
2.9	2019	CCANCCASE	CURRENT CASE CANCELED [1][3][4]	0	1/2257
		COPREOTH	POST-OP-REOP OTHER CARD [3]	0	2/1063
		DISCHDT	DATE OF DISCHARGE [3]	0	1/2153
		DISCHMORTSTAT	DISCHARGE / MORTALITY STATUS [3]	0	1/2257
		MEDBETA	MEDS-BETA BLOCKERS WITHIN 24 HOURS [3]	0	1/2257
		MT30STAT	MORT-300 STATUS [3]	1	14/2257
		OPOCARD	OTHER CARD [3]	0	1/2257

Once the cells are highlighted, the Case List section of the report will display the results for the highlighted cells.

Exporting the Missing Variable Report

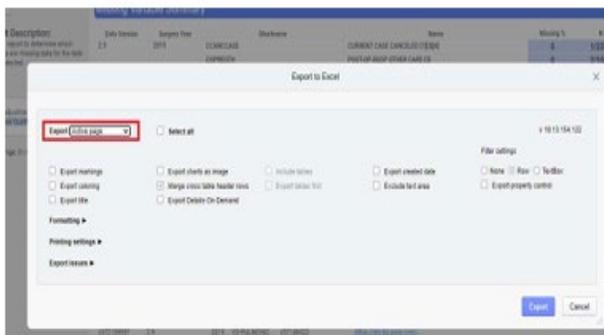

There are 2 options for Export – Excel or PDF

Export to Microsoft Excel

- Select File > Export > Microsoft Excel® Export

- The Export to Excel menu will display the export options.
- On the Export menu, select the Active Page. No other selections or changes are required on this dialog window.
- Select the Export button to generate the Excel report.

Export to PDF

- Select the 'Export' button in the filter panel to export to a pdf file.
- Using this option will provide screen captures of the report in a PDF format.

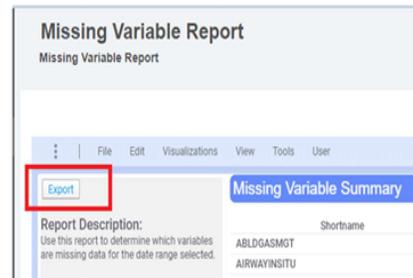

Figure 10 - Default Export to PDF Button

- NOTE:** If you would like to include a list of all cases related to the full list of data variables, you will have to select the Missing % and N columns to populate the Case List section of the report.
- To select the columns in the report, right click using your mouse and highlight the columns. The column cells will highlight in dark blue to indicate the cells are selected.
- The Case List will display a list of all cases once all desired cells are highlighted.

Figure 11 - Highlighted Cells Display Dark Blue

- There are additional export options available for you to review and to extract report visualizations and elements. Please review the File ->Export menu to see the additional options that are available.

Data Manager Training Webinars

Session 1 – Tuesday Feb 25th at 12 pm CST – ACSD Educational Resources and Navigation of the STS Website (1.5 hr)

Session 2 – Tuesday March 4th at 12 pm CST - Overview of Data Specs, Software Specs, Risk Model Variables (2 hr)

Session 3 – Tuesday March 11th at 12 pm CST - Case Inclusion and Choosing the Index Procedure, PROC ID chart (1.5 hr)

Session 4 – Thursday March 20th at 12 pm CST - Harvesting your Data and the DQR report (1.5 hr)

Session 5 – Tuesday March 25th at 12 pm CST - National Report Overview and Process / Outcome Measures (1.5 hr)

Session 6 – Tuesday April 1st at 12 pm CST - Updating site forms, STS Helpdesk, and RedCap forms (1.5 hr)

Session 7 – Tuesday April 8th at 12 pm CST - IQVIA Reporting Overview (1.5 hr)

*Thank you for your
attention!*
