# IQVIA Release June 2022

The below items will be deployed to production the weekend of June 4

## **Risk Adjusted Report (analyzed and benchmark report)**

### **Report Updates**

**STS-7815** – The Rating Trends Report will be updated to display the reporting periods starting from the current harvest in the first column to the oldest in the last column.

**STS-8072** – The Preoperative Beta Blocker within 24 Hours calculation for the Among Eligible Cases results has been updated to exclude cases that are Status = Emergent or Emergent Salvage (harvest code 3 or 4) and cases where MedBeta = Contraindicated (harvest code = 3) from the denominator.

# IQVIA Release June 2022

The below items will be deployed to production the weekend of June 4

## **Risk Adjusted Report (analyzed and benchmark report)**

### **Report Updates**

**STS-8058** – The Missing results for Blood Products Used has been corrected to not flag patients who answered Yes to refused intraop blood as Missing.

**STS-8380** – The total number of cases was not displayed for the STS Aggregate under Demographics benchmark reports. The report displayed a dash |-| when it should display the number.
