 - Hybrid Meeting (will offer both in person and virtual options)
 - AQO Abstract Submission opening this month!

IQVIA Update
Joe Brower

IQVIA Known Issues & Updates

Missing Variable Report and Harvest Summary Report

STS-8311 – The MT365STAT variable is currently reporting a limited set of records as missing.

The reports are currently reporting records that have had any updates via an upload submission. If records did not have submission updates after the 1-year criteria was met, they are currently not appearing on the reports.

The IQVIA development team is actively working on a solution and the release timing to production.

IQVIA Known Issues & Updates

Primary Procedure Report

STS-8289 – The Procedure code 1772, Conduit Placement, Other will be updated to remove the STAT score assignment since it was deemed Not Eligible for assignment.

STS-8301 – The Primary Procedure report is incorrectly indicating that code 600 (Valve replacement, Pulmonic (PVR) should be the primary procedure when there is another code with a higher STAT score available on the selected code list.

The IQVIA development team is actively working on a solution and the release timing to production.

IQVIA Update

Please note: Submitted tickets are currently under review and the IQVIA support team will follow up on resolution and/or target release confirmation.

The IQVIA Team is currently reviewing items that will be released in an upcoming release. Those items will be posted to the Notifications section.

Analysis Report Questions

- Please contact IQVIA Support
 - chsdttechsupport@iqvia.com
- STS/DCRI will be looped in as needed when tickets are escalated to Tier 2
