

QCDR Name	2019 QCDR Measure ID	Measure Title	Measure Description	Denominator	Numerator	Denominator Exclusions	Denominator Exceptions	Numerator Exclusions	NQF ID Number	Is the QCDR measure a high priority measure?	High Priority Type	Measure Type	NQS Domain	Meaningful measure area	Inverse Measure	Proportional Measure	Continuous Variable Measure	Ratio Measure	Number of performance rates	Risk-Adjusted	Risk-adjusted Score	Clinical category
STS National Database	STS1	Prolonged Length of Stay Following Coronary Artery Bypass Grafting	Percentage of patients aged 18 years and older undergoing isolated CABG with an inpatient postoperative length of stay of more than 14 days whether patient is alive or dead at discharge	Patients ≥ 18 years of age undergoing isolated coronary artery bypass grafting surgery	Patients undergoing isolated CABG with an inpatient postoperative length of stay of more than 14 days	None	None	None	N/A	Yes	Outcome	Outcome	Efficiency and Cost Reduction	Patient-Focused Episode of Care	Yes	Yes	No	No	1	Yes	Percentage of patients aged 18 years and older undergoing isolated CABG with an inpatient postoperative length of stay of more than 14 days	Surgical/Procedural Care - Thoracic
STS National Database	STS7	Patient Centered Surgical Risk Assessment and Communication for Cardiac Surgery	Percentage of patients age 18 and older undergoing a non-emergency risk modeled cardiac surgery procedure that had personalized risk assessment using the STS risk calculator and discussed those risks with the surgeon.	Patients age 18 years and older undergoing cardiac surgery for CABG, CABG + Valve, AVR, MVR, MV repair	Number of patients who had personalized risk assessment using the STS risk calculator and discussed those risks with the surgeon.	Procedures without STS risk models Emergent and salvage cases"	None	None	N/A	Yes	Communication and Care Coordination	Process	Person and Caregiver Centered Experience and Outcomes	Patient-Focused Episode of Care	No	Yes	No	No	1	No	N/A	Surgical/Procedural Care - Thoracic
