May Training Manual

New DCF's for v2.41 – yes again. Sorry!

Data Version 5.21 Update
Important Dates for General Thoracic

- **13 May**: GTSD Monthly Webinar Covid-19 Date Field Added
- **27 May**: GTSD Monthly Webinar 1:30pm Central
- **10 June**: Summer 2020 Spring 2020 Harvest Risk Adjusted Results Available Procedures up through 12/31/2019
- **18 Sept**: Fall 2020 Harvest Close Procedures up through 6/30/2020
- **1 Jan 2021**: v5.21 Go-Live
AQO Update

Emily Conrad, STS Sr. Database Coordinator
What is AQO 2020?
AQO Update

AQO is going virtual

Same dates as originally planned
- 9/29-10/2

Each database will have dedicated time for live sessions

Platform to host the meeting
- Wide variety of functions
- Live stream talks
- Prerecorded material
- E-posters
- Q&A
- Panel Discussions
- Chat Boards
- Vendor engagement
- Other details still being worked out
Fields Added for Covid-19

C. Pre-Operative Evaluation

Did the patient have a laboratory confirmed diagnosis of Covid-19?

- No (Harvest Code 10)
- Yes, prior to hospitalization for this surgery (Harvest Code 11)
- Yes, in hospital prior to surgery (Harvest Code 12)
- Yes, in hospital after surgery (Harvest Code 13)
- Yes, after discharge within 30 days of surgery (Harvest Code 14)

Date of Positive Covid-19 Test (closest to OR date) ______/_____/____ (mm/dd/yyyy)

Long Name: Temporary Date Field
Short Name: TempDt
Section Name: STS Temporary Fields
DBTableName: Operations

Definition: This is a temporary field that should not be used for data collection until expressly instructed to by the STS.
Abstracting Covid-19 Fields

- Must be a positive PCR test
- Antibody testing is not captured
- For more than one positive test, collect the test closest to OR Date
- Testing field begins with April 1 cases
- Date field begins with May 1 cases
- Sites can retroactively collect these fields back to January 1, but are not required to do so
Abstracting Covid-19 Fields

Why is this field added?
Sites have reported that patients who are found to be Covid-19+ are having worse surgical outcomes.

Do we really need to go back to January to abstract this field?
No. But, you can go back to January 1 if your site was impacted early on.

Will these patients be included in outcomes?
STS is in discussion regarding how these cases will be handled. We need to get data to see its impact.

Can I abstract a patient who is assumed to be Covid-19+ but was not tested.
No. ONLY code yes for a patient who has been confirmed to have Covid-19 through laboratory testing.

Covid-19 after discharge
For patients that self-report testing positive for Covid-19 within 30 days of surgery indicate 'Yes, after discharge within 30 days of surgery'.
IQVIA Update
Melanie Bent and Jannette Hanna
What’s New?

Uploader

• **New Feature:** Automatic record removal detection and handling based on surgery date ranges
  - Users requested the ability for the system to remove records which had been deleted within their source software vendor system and had been uploaded to the IQVIA system.
  - The uploader will automatically determine if a file should be removed based on the identified MIN/MAX surgery date ranges within the uploaded file based on new system checks.
Automatic Record Removal

Assumptions

- User had previously uploaded a file to the IQVIA platform which included surgery dates 8/1/2019 (MIN) through 8/5/2019 (MAX)
- The previously upload file included Record A, Record B, Record C, Record D, Record F

The diagram illustrates the file submission, pre-load, and post-load sequence:}

<table>
<thead>
<tr>
<th>File Submission</th>
<th>Pre-Load</th>
<th>Post-Load</th>
</tr>
</thead>
<tbody>
<tr>
<td>A (8/1/19)</td>
<td>A (8/1/19)</td>
<td>A (8/1/19)</td>
</tr>
<tr>
<td>--</td>
<td>B (8/1/19)</td>
<td>X</td>
</tr>
<tr>
<td>--</td>
<td>C (8/3/19)</td>
<td>X</td>
</tr>
<tr>
<td>E (8/5/19)</td>
<td>E (8/5/19)</td>
<td></td>
</tr>
<tr>
<td>F (8/6/19)</td>
<td>F (8/6/19)</td>
<td></td>
</tr>
</tbody>
</table>

(visual provided)
Workflow Steps

• STEP 1: User deletes Record B and Record C in their source software system

• STEP 2: User exports the .dat file from their source software system for the surgery dates of 8/1/2019 (MIN) through 8/5/2019 (MAX)

• STEP 3: User uploads the .dat file to the IQVIA platform

• STEP 4: The uploader executes processing checks and identifies the previously submitted records were removed in the uploaded file and proceeds with removing the files within the IQVIA database

<table>
<thead>
<tr>
<th>File Submission</th>
<th>Pre-Load</th>
<th>Post-Load</th>
</tr>
</thead>
<tbody>
<tr>
<td>A (8/1/19)</td>
<td>A (8/1/19)</td>
<td>A (8/1/19)</td>
</tr>
<tr>
<td>--</td>
<td>B (8/1/19)</td>
<td>X</td>
</tr>
<tr>
<td>--</td>
<td>C (8/3/19)</td>
<td>X</td>
</tr>
<tr>
<td>E (8/5/19)</td>
<td>E (8/5/19)</td>
<td>F (8/6/19)</td>
</tr>
</tbody>
</table>

F (8/6/19)
What’s New?

New Feature: Uploader Record Processing Improvements

• Upload processing improvements have been added to increase system efficiency when users upload files to the IQVIA platform.

• User feedback noted that they wanted a focused review new and updated records; to filter out the additional “noise” within the report.

• To improve the upload process, a system check was implemented to skip records that are identified as unchanged.
What’s New - Continued

• The validation will only execute when inserting new or updated records into the database.
• The system will display only display records that are identified as new and/or updated in the database.
What Changes?

• Upon initially uploading a file to the platform, the system will display the total number of new files in the upload card history.

• Uploads thereafter, will display the total number of new or updated records in the upload card history.
  • Previously uploaded records with no identified changes will not be included in the total number of records that are processed.
  • The upload history card will not display the total number of records that were in the original file.

• To review previous errors/warnings, refer back to the original upload history card.

• **NEW REPORT** – Harvest Summary Report will be developed**
What Changes?

- The data quality report will display the full list of records and will display a new message to the end user.

- A new warning has been added to display a single entry - Record 0 will now appear in the DQR under the warning column and will note the total number of records “skipped”
  - “Record V1234567 has not changed. No updates made.”
Upcoming Release Updates – May 2020

• STS-2370 – Adding DQR duplicate message filtering option
• STS-1823 – Split out the RecordID and PatientID from the Message column, IDs will display in respective columns even for critical errors
• STS-2252 – GTSD Errors triggering for ‘Race Documented’ missing for patients
• STS-2574 – Updating TEMPCODE and TEMPDATE fields for COVID-19 STS requirement
• STS-2320 – GTSD Missing Variable Report data variable updates
Update
Harvest Summary Report Concept
