The Honorable Thad Cochran Chairman Committee on Appropriations United States Senate Washington, DC 20510

The Honorable Rodney Frelinghuysen Chairman Committee on Appropriations United States House of Representatives Washington, DC 20515 The Honorable Patrick Leahy Vice Chairman Committee on Appropriations United States Senate Washington, DC 20510

The Honorable Nita Lowey Ranking Member Committee on Appropriations United States House of Representatives Washington, DC 20515

Dear Chairmen Cochran and Frelinghuysen and Vice Chairman Leahy and Ranking Member Lowey:

As negotiations continue on the fiscal year 2018 appropriations bills, we urge you to oppose inclusion of either of two policy riders originally included in the House Appropriations Committee's Agriculture, Rural Development, Food and Drug Administration, and Related Agencies appropriations bill that would weaken FDA's authority to oversee tobacco products. We further request that you reject the House Appropriations Committee's nearly 25% cut to the Centers for Disease Control and Prevention's (CDC) Office on Smoking and Health (OSH) and ensure the office is funded at least at its fiscal year 2017 funding level of \$205 million.

Tobacco use remains the leading preventable cause of death in the United States. Every year, it kills more than 480,000 Americans and is responsible for an estimated \$170 billion in health care costs. More than 60 percent of these health care costs are paid by government programs such as Medicare and Medicaid.

Last year, FDA took an important step to protect children and public health by using its authority under the Family Smoking Prevention and Tobacco Control Act to issue a final rule, known as the deeming rule, to enable the agency to oversee cigars, e-cigarettes, and other tobacco products that were previously outside of FDA's authority. The need for FDA oversight of these products could not be clearer. Ecigarettes are the tobacco product most commonly used by youth, and high school boys smoke cigars at a slightly higher rate than cigarettes. The prevalence of youth usage of these products is a direct result of their marketing with candy and fruit flavors designed to appeal to young people. Unfortunately, the FDA recently announced that it will significantly delay enforcement of the requirement in the rule that ecigarettes and cigars introduced to the market after February 15, 2007, undergo a scientific review by FDA to determine their impact on public health. FDA also announced it will again seek public comment as to whether some cigars should be excluded from FDA oversight.

The policy riders in the House Agriculture appropriations bill would go beyond FDA's recent announcement delaying enforcement of the product review provisions of the deeming rule and would further weaken FDA's ability to protect kids from egregious, kid-friendly e-cigarettes and cigars. One of the House riders seeks to completely exclude "large and premium cigars" from FDA oversight. During consideration of the deeming rule, FDA specifically examined whether these so-called premium cigars should be excluded from FDA oversight and concluded that there was no appropriate public health justification for doing so. FDA's scientific review found that all cigars pose serious negative health risks, including about 9,000 premature deaths a year, and that all cigars are potentially addictive. We are also concerned that the rider defines "large and premium cigars" so broadly that it creates a loophole that invites tobacco companies to modify their products to qualify for this exemption – a loophole that tobacco companies will surely exploit to exempt some cheap, machine-made, flavored cigars that appeal to youth.

The second House rider would change the Tobacco Control Act "grandfather date" to entirely exempt ecigarettes, cigars, and other tobacco products now on the market from an FDA review to determine their impact on public health. Whereas FDA's recent announcement will delay review of these products for several years, changing the "grandfather date" will ensure that these products will never undergo such a review. As a result, FDA's ability to protect children from thousands of fruit and candy flavored ecigarettes and cigars that have entered the market in recent years would be weakened. Moreover, new tobacco products that come onto the market in future years will need only to prove that they are substantially equivalent to the most egregious grandfathered tobacco products currently on the market. Cotton candy and gummy bear e-cigarettes will be the standard by which future products will be judged.

In addition to FDA oversight of tobacco products, the CDC Office on Smoking and Health plays a critical role in preventing young people from using tobacco products and helping current smokers to quit. The \$50 million funding cut for OSH included in the House Labor, Health and Human Services, Education, and Related Agencies appropriations bill is misguided and would lead to more young people using tobacco products, fewer adult tobacco users quitting, and higher future health care costs for treating tobacco-caused disease.

OSH funds the highly successful national media campaign, Tips from Former Smokers, which has motivated about five million smokers to make a quit attempt, helped approximately 500,000 smokers to successfully quit, and saved at least 50,000 people from premature death since its inception in 2012. The campaign is highly cost-effective with a cost of just \$393 per year of life saved, far below the \$50,000 cost-effectiveness standard commonly applied to public health programs. The House's proposed funding cut would likely make it impossible for CDC to continue this vital campaign. This funding cut would also likely mean reduced funding to states for quitlines, which provide telephone-based counseling to help tobacco users quit and, in some states, provide tobacco cessation medications, as well as funding to health departments in all states to help maintain and enhance tobacco prevention and cessation programs at the state and community level.

As you finalize appropriations legislation for fiscal year 2018, we urge you to protect kids and reduce tobacco-caused disease by rejecting efforts to weaken FDA's final rule on e-cigarettes and cigars and funding CDC's Office on Smoking and Health at least at its current \$205 million funding level, as the Senate Appropriations Committee did.

Sincerely,
