The Society of Thoracic Surgeons

55TH ANNUAL MEETING

Program, Registration, and Housing

San Diego Convention Center
San Diego, California
January 27-29, 2019

Register today at sts.org/annualmeeting
YOU’RE INVITED

Please join me and more than 2,100 of our colleagues from around the world as we gather January 27–29 in San Diego, California, for the STS 55th Annual Meeting.

The first time the Society held its annual meeting in San Diego was 1969; most recently, we’ve been meeting in California’s “beach city” every 4 years because attendees really love San Diego’s spectacular coastline, sophisticated dining options, and near-perfect weather.

You’ll have ample time to explore the city before and after the meeting because we’ve rearranged the schedule to provide you with an array of scientific abstract presentations, distinguished lectures, debates, technical videos, and hands-on sessions over a 3-day period, rather than the previous 4 days.

As part of the new schedule, a standalone Coding Workshop will be held Friday and Saturday, and Tech-Con will be held Saturday. The Annual Meeting will kick off on Sunday morning with STS University followed by an opening plenary session, featuring the J. Maxwell Chamberlain Memorial Papers and the Thomas B. Ferguson Lecture by Laurie H. Glimcher, MD, President and CEO of the Dana-Farber Cancer Institute in Boston. Following the lecture, you can attend the Opening Reception in the Exhibit Hall and my President’s Reception at the historic Hotel del Coronado.

You won’t want to miss any part of the meeting, especially my Presidential Address on Monday morning and the C. Walton Lillehei Lecture on Tuesday morning by Eric Topol, MD, a cardiologist and geneticist specializing in the use of artificial intelligence, “deep” data, and smart technology for individualized treatment approaches. Both Monday and Tuesday also will feature an interesting selection of sessions that will appeal to every discipline and every member of the cardiothoracic surgery team.

Although the meeting schedule will be more compact, you won’t miss a thing because access to the STS 55th Annual Meeting Online will be included with registration—a bonus that will let you review all the outstanding educational content from your home or office throughout the next year.

Please make plans now to join your colleagues this January. In this Program, Registration, and Housing brochure, you’ll find a program outline, course descriptions, and agendas to help you plan your schedule. You’ll also find registration instructions and information on travel and housing accommodations.

I look forward to seeing you in San Diego!

Keith S. Naunheim, MD
President, The Society of Thoracic Surgeons

WHAT’S NEW

● New STS University courses include robotic lobectomy, video-assisted sleeve lobectomy, and percutaneous transseptal access for transcatheter mitral valve repair/replacement.

● A new session will explore the challenges faced by cardiothoracic surgeons early in their careers and provide solutions so that they can be successful.

● New results from the recent STS/WTS Sexual Harassment and Gender Bias Survey will be highlighted in a session on unconscious bias organized by Women in Thoracic Surgery.

Arrive early to attend the STS Coding Workshop and/or Tech-Con 2019 (see page 41).

THE SOCIETY OF THORACIC SURGEONS EDUCATION DISCLOSURE POLICY

As a sponsor of continuing medical education accredited by the Accreditation Council for Continuing Medical Education (ACCME), The Society of Thoracic Surgeons requires that any individual who is in a position to control the content of an educational activity must disclose all relationships with commercial interests (including known relationships of his or her immediate family, department, and partners). The ACCME defines a commercial interest as “any entity producing, marketing, reselling, or distributing health care goods or services consumed by, or used on, patients. The ACCME does not consider providers of clinical service directly to patients to be commercial interests.” The question of whether a disclosed conflict situation could represent undue influence on the educational activity by a commercial interest or whether the disclosed information is sufficient to consider an abstract, presentation, or other educational material to represent potentially biased information must be resolved prior to an individual’s involvement in STS educational programming.

Required disclosures include (1) a financial interest of any amount (e.g., through ownership of stock, stock options, or bonds) (2) the receipt of any amount of cash, goods or services within the current 12-month period (e.g., through research grants, employment, consulting fees, royalties, travel, or gifts) or (3) a nonremunerative position of influence (e.g., as officer, director, trustee or public spokesperson). EXCLUDED from this disclosure requirement are blind trusts or other passive investments such as mutual funds. In the case of a financial or other relationship disclosure, the company, product/service, and specific nature of the relationship must be noted. Disclosure is mandatory for any person involved in the planning, management, presentation, and/or evaluation of STS educational activities.

Failure to disclose all relationships with commercial interests disqualifies the individual from being a planning committee member, a teacher, or an author of educational materials, and this individual cannot have any responsibility for the development, management, presentation, or evaluation of STS educational activities. This requirement is intended neither to imply any impropriety of such relationships nor to prejudice any individual planner, presenter or author. It is merely to identify such relationships through full disclosure, and to allow STS to assess and resolve potential influences on the educational activity prior to the planning and implementation of an educational activity. If no relationships with commercial interests exist, the individual must indicate this on the disclosure form.

Additionally, the fact that the presentation, paper, or other educational product describes (a) the use of a device, product, or drug that is not FDA approved or (b) an off-label use of an approved device, product, or drug must also be disclosed. This requirement has been adopted in response to FDA policy and case law involving medical societies, and is not intended to prohibit or inhibit independent presentation or discussion regarding the uses of devices, products, and drugs as described in (a) or (b) above.

For live presentations, all disclosures must be stated orally and on a slide at the beginning of the presentation and will be noted in published material related to the activity. Slides, handouts, and other materials utilized as part of an educational activity cannot contain any advertising, trade names or a product group message. Speakers are required to disclose that they have nothing to disclose if this is the case.

Amended by the STS Executive Committee: April 11, 2012

Continuing Medical Education Credit
The Society of Thoracic Surgeons is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

STS 55th Annual Meeting: The Society of Thoracic Surgeons designates this live activity for a maximum of 23.25 AMA PRA Category 1 Credits™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

STS is currently seeking approval to provide perfusion credit.
**PROGRAM OUTLINE**

### Friday, January 25

3:00 PM – 6:00 PM
Registration

### Saturday, January 26

**STS TECH-CON 2019**

7:00 AM – 5:00 PM
Registration

7:00 AM – 6:30 PM
Tech-Con Exhibits

7:00 AM – 8:00 AM
BREAKFAST — Visit Tech-Con Exhibits

8:00 AM – 9:30 AM
Tech-Con Adult Cardiac Track I: New Technologies in Ischemic, Heart Failure, and Atrial Fibrillation Surgery
Tech-Con General Thoracic Track I: New Technologies in Lung and Chest Wall Surgery

9:30 AM – 10:15 AM
BREAK — Visit Tech-Con Exhibits

10:15 AM – 12:00 PM
Tech-Con Adult Cardiac Track II: New Technologies in Aortic and Structural Heart Disease
Tech-Con General Thoracic Track II: New Technologies in Esophageal Surgery

12:00 PM – 1:00 PM
LUNCH — Visit Tech-Con Exhibits

1:00 PM – 5:00 PM
Tech-Con Joint Session: The Future of Cardiothoracic Surgery Is Here

2:30 PM – 3:00 PM
BREAK — Visit Tech-Con Exhibits

5:00 PM – 6:30 PM
Tech-Con Reception

### Sunday, January 27

**STS ANNUAL MEETING**

7:00 AM – 6:30 PM
Registration

7:00 AM – 12:00 PM
The Multidisciplinary Team: How We Do It

8:00 AM – 9:45 AM
STS University (Session I)

8:00 AM – 12:00 PM
Adult Congenital Heart Disease Symposium: Planning for the Future—Aortic Arch Anomalies and the Failing Fontan
CHEST @ STS: Interventional Bronchoscopy
Critical Care Symposium: Cutting-Edge Strategies for Cardiothoracic Critical Care Emergencies and Evolving Technologies
Practice Management Summit
SCA @ STS: Integrating Perioperative Echocardiography in Cardiac Surgical Clinical Decision-Making for Challenging Cases

10:00 AM – 12:00 PM
Residents Symposium: Transitioning From Residency to a Successful Practice

10:15 AM – 12:00 PM
STS University (Session II)

12:00 PM – 1:00 PM
Lunch

1:00 PM – 2:00 PM
Ethics Debate: Bespoke Babies—Genome Editing in Cystic Fibrosis Embryos
How to Write a Great Review: Essential Components of Outstanding Peer Reviews
Key Contacts: Advocates for Cardiothoracic Surgery
Research Using the STS National Database
STS/CATS/CSCS: Innovative Techniques in Thoracic Surgery
Unconscious Bias (organized by Women in Thoracic Surgery)

2:10 PM – 4:30 PM
Opening Session

2:10 PM – 2:30 PM
Welcome

2:30 PM – 3:30 PM
J. Maxwell Chamberlain Memorial Papers

3:30 PM – 4:30 PM
Thomas B. Ferguson Lecture: Laurie H. Glimcher

4:30 PM – 6:30 PM
Opening Reception in STS Exhibit Hall

4:45 PM – 5:55 PM
Jeopardy Championship

5:30 PM – 6:30 PM
2019 The Thoracic Surgery Foundation Awards Announcement and VIP Reception (by invitation only)

5:30 PM – 6:30 PM
Poster Presentations

7:00 PM – 10:00 PM
President’s Reception: Hotel del Coronado

---

*Indicates that a ticket is required to attend.*
Monday, January 28

6:30 AM – 5:00 PM
Registration

9:00 AM – 4:30 PM
Exhibit Hall

7:15 AM – 9:15 AM
Career Navigation and Development: Hot Topics to Enhance Your First 7 Years of Practice
Congenital: Pediatric Congenital I
EACTS @ STS: Which Arch Operation Should I Do? Decision-Making During Type A Dissection Repair
ESTS @ STS: Controversial Issues in General Thoracic Surgery—Perspectives From Europe and North America
STS/ISHLT Joint Symposium

8:15 AM – 9:15 AM
Basic Science Research: Adult Cardiac
Basic Science Research: General Thoracic
Diversity and Inclusion in Cardiothoracic Surgery: What Is the Real Value?

9:30 AM – 12:15 PM
Plenary Session

9:30 AM – 10:15 AM
Featured Abstract Presentations

10:15 AM – 11:00 AM
BREAK—Visit Exhibits and Scientific Posters

11:00 AM – 11:10 AM
Introduction of the President: Robert S. D. Higgins

11:10 AM – 12:15 PM
Presidential Address: Keith S. Naunheim

12:15 PM – 1:15 PM
BREAK—Visit Exhibits and Scientific Posters

1:15 PM – 3:15 PM
Adult Cardiac: Aorta I
Adult Cardiac: Ischemic
Congenital: Pediatric Congenital II
General Thoracic: Lung Cancer I
General Thoracic: Lung Transplantation
SVS @ STS: Sharing Common Ground for Cardiovascular Problems

1:15 PM – 5:00 PM
Clinical Scenarios: The Heart Team

3:15 PM – 4:00 PM
BREAK—Visit Exhibits and Scientific Posters

4:00 PM – 5:00 PM
Adult Cardiac: Arrhythmia/Atrial Fibrillation
Adult Cardiac: Contemporary Practices in Surgical Therapy for Advanced Heart Failure
Cardiothoracic Surgery Education
Congenital: Adult Congenital
Critical Care Research
Next-Generation General Thoracic Surgery
Quality Improvement in Cardiothoracic Surgery

5:15 PM – 6:15 PM
Business Meeting (STS Members Only)

6:30 PM – 7:30 PM
STS-PAC Reception
Open to 2019 STS-PAC contributors

Tuesday, January 29

6:30 AM – 1:00 PM
Registration

9:00 AM – 1:30 PM
Exhibit Hall

7:00 AM – 9:00 AM
Adult Cardiac: General
Adult Cardiac: Mitral and Tricuspid Valves
Congenital: Pediatric Congenital III
General Thoracic: Lung Cancer II
General Thoracic: Mediastinal/Pulmonary
Pain Management

9:00 AM – 9:30 AM
BREAK—Visit Exhibits and Scientific Posters

9:30 AM – 10:45 AM
Plenary Session

9:30 AM – 9:45 AM
Award Presentations

9:45 AM – 10:45 AM
C. Walton Lillehei Lecture: Eric Topol

11:00 AM – 12:00 PM
Meet the Experts Sessions
Health Policy Forum

12:00 PM – 1:00 PM
BREAK—Visit Exhibits and Scientific Posters

1:00 PM – 3:00 PM
Adult Cardiac: Aorta II
Adult Cardiac: Aortic Valve/Novel Technologies
Advanced Therapies for End-Stage Cardiopulmonary Disease
General Thoracic: Esophageal

1:00 PM – 5:00 PM
How-To Video Session: Technical Tips to Avoid Pitfalls and Simplify Congenital and Pediatric Cardiac Surgery Procedures
How-To Video Session: General Thoracic
“My Tube” Adult Cardiac How-To Video Session
Patient Safety Symposium: Innovation and Safety in the Digital Era—From EHRs to Cybersecurity
SATURDAY  JANUARY 26  TECH-CON 2019

7:00 AM – 5:00 PM
Registration

7:00 AM – 6:30 PM
Tech-Con Exhibits

7:00 AM – 8:00 AM
BREAKFAST—Visit Tech-Con Exhibits

8:00 AM – 9:30 AM
Adult Cardiac Track I: New Technologies in Ischemic, Heart Failure, and Atrial Fibrillation Surgery
MODERATORS: Husam H. Balkhy, Chicago, IL, Mark S. Slaughter, Louisville, KY, and John M. Stulak, Rochester, MN

Atrial Fibrillation
8:00 AM  Minimally Invasive Left Atrial Appendage Closure Through the Transverse Sinus: Why and How I Do It
Niv Ad, Morgantown, WV

8:08 AM  Sophisticated Mapping in the OR During Surgical Ablation: How to Do It With or Without Your Electrophysiologist
Gianluigi Bisleri, Kingston, Canada

8:16 AM  Panel Discussion

Heart Failure
8:22 AM  High-Risk Cardiac Surgery Using Temporary Circulatory Support: How I Do It
Edward G. Soltesz, Cleveland, OH

8:30 AM  Smartphone App to Facilitate Donor Organ Harvesting
Robert W. Emery, Minneapolis, MN

8:38 AM  Is Subvalvular Repair Worthwhile in Severe Ischemic Mitral Regurgitation?
Masashi Komeda, Daito, Japan

8:46 AM  Panel Discussion

Ischemia
8:56 AM  Noninvasive Imaging for Coronary Bypass: What’s New in Anatomic and Functional Evaluation of Coronary Artery Disease
Matthew Budoff, Torrance, CA

9:04 AM  Advanced Hybrid Coronary Revascularization: Are Two Internal Mammary Artery Grafts Better Than One?
Husam H. Balkhy, Chicago, IL

9:12 AM  Arterial Grafts: Lessons Learned From Arterial and Radial
David P. Taggart, Oxford, United Kingdom

9:20 AM  Panel Discussion

8:00 AM – 9:30 AM
General Thoracic Track I: New Technologies in Lung and Chest Wall Surgery
MODERATORS: Lisa M. Brown, Sacramento, CA, and Linda W. Martin, Charlottesville, VA

8:00 AM  A Novel Wireless Surgical Marker for Small Lung Lesions
Yojiro Yutaka, Kyoto, Japan

8:12 AM  First Use of the ArtiSential Suite of Articulated Instruments in Video-Assisted Thoracoscopic Surgery
Joel Dunning, Middlesbrough, United Kingdom

8:24 AM  Update on Robotic Bronchoplasty Techniques
Lana Y. Schumacher, Pittsburgh, PA

8:36 AM  Novel Applications of Titanium Mesh in Thoracic Surgery
Anthony D. Cassano, Richmond, VA

8:48 AM  State-of-the-Art in Chest Wall and Diaphragm Reconstruction: Current Materials and Techniques
Reza J. Mehran, Houston, TX

9:00 AM  A Novel Approach to Patient Engagement
Alden M. Parsons, Raleigh, NC

9:12 AM  Targeted Lung Denervation to Treat Chronic Obstructive Pulmonary Disease
Malcolm M. DeCamp, Madison, WI

9:30 AM – 10:15 AM
BREAK—Visit Tech-Con Exhibits

10:15 AM – 12:00 PM
Adult Cardiac Track II: New Technologies in Aortic and Structural Heart Disease
MODERATORS: Gilbert H. Tang, New York, NY, and Tsuyoshi Kaneko, Boston, MA

10:15 AM  Aortic Valve Repair Technology and Devices: Where Are We Going?
Y. Joseph Woo, Stanford, CA

10:23 AM  PHASTER: Proximal Hybrid Aortic Stent Graft for Extended Repair
Eric E. Roselli, Cleveland, OH

10:31 AM  Branched Endografts for the Aortic Arch
Ourania A. Preverenta, Houston, TX

10:39 AM  Panel Discussion

10:49 AM  Minimally Invasive Transcatheter Aortic Valve Replacement in Mitral Annular Calcification: Pearls and Pitfalls
Tom C. Nguyen, Houston, TX

10:57 AM  Transapical Mitral Replacement With Anterior Leaflet Splitting: A Novel Technique to Avoid Left Ventricular Outflow Tract Obstruction
Richard Lee, Augusta, GA

11:05 AM  Update on New Transcatheter Mitral Replacement Devices
Michael J. Reardon, Houston, TX

11:13 AM  Panel Discussion

11:23 AM  A New Sutureless Device to Repair Mitral Chords
Thierry P. Carrel, Bern, Switzerland

11:31 AM  First-in-Man Implantation of a Novel Balloon-Adjustable Mitral Ring
Martin Andreas, Vienna, Austria

11:39 AM  Tricuspid Extracellular Matrix Cylinder Valves in Endocarditis: Earliest Steps to In-Human Valve Generation
Marc W. Gerdisch, Indianapolis, IN

11:47 AM  Panel Discussion

www.sts.org/annualmeeting  Agendas and speakers subject to change
10:15 AM – 12:00 PM

General Thoracic Track II: New Technologies in Esophageal Surgery

MODERATORS: Andrew C. Chang, Ann Arbor, MI, and Siva Raja, Cleveland, OH

10:15 AM  Tissue-Engineered Esophagus
Dennis A. Wigle, Rochester, MN

10:27 AM  POP and STER: Endoscopic Pyloromyotomy and Submucosal Tumor Resection
Brian E. Louie, Seattle, WA

10:39 AM  FLIP for LINX: EndoFLIP for Antireflux Surgery
Min P. Kim, Houston, TX

10:51 AM  Panel Discussion

11:06 AM  Atrial Septal Defect Closure Device for Tracheoesophageal Fistula Repair
Daniel P. Raymond, Cleveland, OH

11:18 AM  Subxiphoid Approach to Mediastinal Tumor Resection
Takashi Suda, Aichi, Japan

11:30 AM  EndoVAC for Esophageal Leak
Wayne L. Hofstetter, Houston, TX

11:42 AM  Panel Discussion

12:00 PM – 1:00 PM

LUNCH—Visit Tech-Con Exhibits

1:00 PM – 5:00 PM

Joint Session: The Future of Cardiothoracic Surgery Is Here

MODERATORS: Melanie A. Edwards, St Louis, MO, and Tom C. Nguyen, Houston, TX

1:00 PM  Keynote Address: Artificial Intelligence—Hype or Hope for Med Tech?
Thomas M. Krummel, Stanford, CA

1:30 PM  2018 Year in Review: Summary of New Technologies and Major Research
Adult Cardiac: Vinod H. Thourani, Washington, DC
General Thoracic: Todd L. Demmy, Buffalo, NY
Congenital: Carlos M. Mery, Austin, TX

1:51 PM  A Call for Change: Maintaining the Future of Our Field
Tom C. Nguyen, Houston, TX

1:56 PM  The Kinder, Gentler 4th Era of Heart Surgery
Jude S. Sauer, Pittsford, NY

2:04 PM  Planning for Future Reoperation: Choosing the Valve for the Present
Keith B. Allen, Kansas City, MO

2:12 PM  Radiomics and Lung Cancer Detection/Modeling: Is This the Holy Grail?
Shanda H. Blackmon, Rochester, MN

2:20 PM  Panel Discussion

2:30 PM – 3:00 PM

BREAK—Visit Tech-Con Exhibits

Debates

MODERATORS: Bradley G. Leshnower, Atlanta, GA, and Virginia R. Little, Boston, MA

3:00 PM  DEBATE: Coronary Revascularization Should Be Performed Only by Dedicated Coronary Artery Bypass Grafting Surgeons
Pro: John D. Puskas, New York, NY
Con: Gorav Ailawadi, Charlottesville, VA

3:30 PM  DEBATE: Peroral Endoscopic Myotomy Should Replace Laparoscopic Heller Myotomy
Pro: Siva Raja, Cleveland, OH
Con: Christopher W. Seder, Chicago, IL

“Shark Tank”

MODERATORS: Joseph Lamelas, Houston, TX, Daniela Molena, New York, NY, and Grayson H. Wheatley, Nashville, TN

4:00 PM  Past “Shark Tank” Presenters: Where Are They Now? What Have We Learned?
Juan P. Umana, Bogota, Colombia

4:10 PM  Rapid and Leakproof Aortic Anastomosis Stapler
Syed T. Raza, New York, NY

4:20 PM  Toroidal Valveless Pulsatile-Flow Ventricular Assist Device
Richard W. Smalling, Houston, TX

4:30 PM  Neurostimulation for Pain Management After Cardiac Surgery
Usman Ahmad, Cleveland, OH

4:40 PM  Tracheomend
Faiz Bhora, New York, NY

4:50 PM  Discussion

5:00 PM – 6:30 PM

RECEPTION—Visit Tech-Con Exhibits
7:00 AM – 6:30 PM
Registration

7:00 AM – 12:00 PM
The Multidisciplinary Team: How We Do It
This session will provide an opportunity for Advanced Practice Providers (APPs) and other health care professionals to gain knowledge that will help them improve the care of cardiothoracic surgery patients. Topics will include multidisciplinary care delivery models, goal-directed perfusion, management of hemorrhage, and enhanced recovery protocols. Every member of the cardiothoracic surgery team, including nurses, physician assistants, perfusionists, and others involved in patient care improvement, will benefit from participating in this session.

Learning Objectives
Upon completion of this activity, participants should be able to:
• Discuss recent innovations in cardiothoracic surgical management that improve patient care
• Identify important areas of clinical research that impact the cardiothoracic surgery patient
• Develop strategies for implementing care improvements locally
• Describe various approaches to cardiothoracic service line APP training and staffing models
• Identify opportunities and strategies that support a “culture of safety” in the multidisciplinary team

MODERATORS: Jill R. Engel, Durham, NC, and Stefano Schena, Baltimore, MD

7:00 AM  Introduction
7:05 AM  Critical Care Training Model: The Mid-Level Team at Johns Hopkins
Emily Stewart, Baltimore, MD

7:30 AM  Cardiothoracic Surgery Service Line APP Training/Coverage Model: Duke University
Jill R. Engel, Durham, NC

7:55 AM  Managing Goal-Directed Perfusion
George Justison, Denver, CO

8:20 AM  Managing Hemorrhage: Balancing Products and Factors in 2019
Daryl Kor, Rochester, MN

8:45 AM  Break

9:00 AM  Early Recovery for Isolated Coronary Artery Bypass Grafting Surgery: Initiating an On-Table Extubation Program and Reducing Postoperative Length of Stay
J. Parmet1, S. Furukawa2, D. Berkowitz3, B. Lucca1, K. Schmanek1, A. V. Rodrigo4, K. Gelineau1, K. Hilliard2, B. M. Blanchard3, P. Colonna-Romano2
1Society Hill Anesthesia Consultants, Philadelphia, PA, 2University of Pennsylvania, Philadelphia, 3Pennsylvania Hospital, Philadelphia

9:10 AM  Interprofessional Simulation in Cardiothoracic Surgery Improves Team Confidence
H. L. Merritt-Genore, R. Zavala, T. Brakke, A. Adams
University of Nebraska Medical Center, Omaha

9:20 AM  Impact of an Advanced Nurse Practitioner Ultrasound Service in the Postoperative Cardiac Surgery Patient
T. Bartley1, H. Maseyk2, L. Bardsley2, O. SanchezRey3, J. Johnston1, R. Kong2, N. Hutchinson2
1Queen Elizabeth Hospital University Trust, Birmingham, United Kingdom, 2Royal Sussex County Hospital, Brighton, United Kingdom

9:30 AM  Toolkit for Implementing Enhanced Recovery After Surgery (ERAS)
S. Jill Ley, Greenbrae, CA

9:50 AM  ERAS: Cardiac Model
Michael Grant, Mount Airy, MD

10:10 AM  ERAS: Thoracic Model – Anesthesia Impact
Elizabeth Herrera, Houston, TX

10:30 AM  Break

10:45 AM  An Implementation Science Approach to Redesigning Handoffs After Cardiothoracic Surgery
T. R. Geoffrion, I. Lynch, E. Tsai, W. Hsu, A. Timmons, E. Phelps, P. E. Greilich
The University of Texas Southwestern Medical Center, Dallas

10:55 AM  Autologous Blood Donation Leads to Better Outcomes in Cardiac Surgery
E. Zimmermann, D. V. Avgerinos1, R. Zhu2, T. Ogami2
1Weill Cornell Medical Center, New York, NY, 2NewYork-Presbyterian/Queens, Flushing, NY

11:05 AM  Postoperative Complications After Transcatheter Aortic Valve Replacement and Impact on Resource Utilization: Does Experience Matter?
A. K. Okoh1, B. Haik1, C. Chen1, M. Cohen1, M. J. Russo2
1Newark Beth Israel Medical Center, NJ, 2RWJBarnabas Health, Newark, NJ

11:15 AM  Building a Culture of Safety Within a Heart Center: What’s In It for Me?
Brittany A. Zwischenberger, Durham, NC

11:40 AM  Closing Remarks

8:00 AM – 9:45 AM
STS University (Session I)

STS University courses feature only hands-on learning. No didactic lectures will be given during the activity, so attendees are encouraged to access the lectures online before Sunday morning at sts.org/stsusiversity.

Course 1: Essentials of TAVR

COURSE DIRECTORS: Isaac George, New York, NY, and George L. Zorn, Kansas City, KS

Proficiency in transcatheter aortic valve replacement (TAVR) requires the acquisition of multiple endovascular principles and techniques. This course will introduce attendees to balloon-expandable and self-expanding TAVR platforms, as well as the various sheaths, guidewires, and catheters relevant to TAVR. Basics of alternative TAVR access will be discussed, as will the operations of various delivery systems.

Learning Objectives
Upon completion of this activity, participants should be able to:
• Describe the decision-making process for choosing a TAVR access point (transfemoral, direct aortic, subclavian artery, and transapical)
• State the salient differences in the deployment of balloon-expanded vs self-expanding devices
• Describe the various types of sheaths and guidewires used during the TAVR procedure and understand reasons for their use
• Explain the procedural technique for valve deployment from start to finish in both native aortic stenosis and valve-in-valve TAVR
Valve Leaflet Reconstruction

• Discuss aortic valve leaflet repair
• List different methods in choosing a graft size
• Summarize the technical steps necessary for a successful VSRR
• Outline the key components to maintain a competent aortic valve

Upon completion of this activity, participants should be able to:

Learning Objectives
Upon completion of this activity, participants should be able to:

• Identify the most common catheters and wires for TEVAR
• Describe the deployment of commercially available stent grafts
• Explain the use of IVUS and vascular plugs for subclavian artery occlusion
• Describe the surgical techniques used in aortic arch debranching

Course 2: TEVAR and Aortic Arch Debranching Procedures
COURSE DIRECTORS: Nimesh Desai, Philadelphia, PA, and Ourania A. Preventza, Houston, TX

This course will review basic catheter and wire skills for thoracic endovascular aortic repair (TEVAR). Participants will have hands-on experience with thoracic stent grafts and intravascular ultrasound (IVUS), as well as using vascular plugs for the brachial or femoral approach. Surgical techniques for zone 0-2 aortic arch debranching procedures will be discussed.

Learning Objectives
Upon completion of this activity, participants should be able to:

• Identify different leaflet resection and non-resection approaches, in addition to different chordal approaches required for successful mitral valve repair
• Identify advance repair techniques for both primary and secondary mitral regurgitation
• Demonstrate proper mitral valve replacement techniques

Course 3: Mitral Valve Repair
COURSE DIRECTORS: Pavan Atluri, Philadelphia, PA, and Evelio Rodriguez, Nashville, TN

In this course, participants will be able to practice different mitral valve repair strategies for both anterior and posterior leaflet pathologies. These will include leaflet resection and non-resection techniques, commissural repair strategies, and different chordal approaches. In addition, different surgical therapies for secondary mitral regurgitation, including ring selection, leaflet extension techniques, and mitral valve replacement, will be reviewed.

Learning Objectives
Upon completion of this activity, participants should be able to:

• Demonstrate how to implant a type I bicuspid aortic valve in the context of its neoroot and explain what the different bicuspid subtypes mean for orienting the repaired valve when performing a root reimplantation
• Identify the key steps of tracheobronchoplasty
• Recognize the technical pitfalls associated with various complex airway resection and anastomoses

Course 5: Aortic Root Enlargement Procedures and Aortic Valve Leaflet Reconstruction
COURSE DIRECTORS: S. Adil Husain, San Antonio, TX, and Joseph W. Turek, Durham, NC

This course will review two specialized subareas of technical expertise required to perform complex aortic root surgery. Participants will learn the anatomic approaches and surgical techniques employed in performing aortic root enlarging procedures, as well as aortic valve leaflet reconstructive techniques and the importance of providing annular stabilization in the context of a repaired aortic valve. Surgical strategies for root enlargement will include Nicks, Manougian, and Ross Konno. Surgical techniques involving aortic valve leaflet reconstruction will include primary simple cusp plication techniques, patch augmentation technique, Gore-Tex free margin shortening technique, and orienting the repaired bicuspid aortic valve into its aortic neoroot.

Learning Objectives
Upon completion of this activity, participants should be able to:

• Identify the anatomy and appropriate surgical landmarks in the left ventricular outflow tract and aortic valve apparatus
• Describe the incision sites and overall surgical techniques for a variety of root enlargement strategies
• Discuss surgical pitfalls associated with each strategy and mechanisms by which to delineate options based upon patient and anatomic substrate
• Describe how to set up and expose the aortic root for primary valve repair and identify the risk factors for repair failure based on the anatomy of the aortic valve
• Recall the different aortic annular stabilization techniques and recognize the impact of each technique on valve repair – subcommissural annuloplasty, external aortic ring, and root reimplantation
• Identify different bicuspid aortic valve types and explain the implications for valve repair and the choice of annular stabilization
• Demonstrate how to implant a type I bicuspid aortic valve in the context of its neoroot and explain what the different bicuspid subtypes mean for orienting the repaired valve when performing a root reimplantation

Learning Objectives
Upon completion of this activity, participants should be able to:

• Describe potential pitfalls and strategies for intraoperative troubleshooting to successfully achieve minimally invasive lobectomy
• Identify instruments and other technologies available to perform minimally invasive lobectomy

Course 6: VATS Lobectomy
COURSE DIRECTORS: DuyKhanh P. Ceppa, Indianapolis, IN, and Jeremiah Martin, Portsmouth, OH

This course will review the indications, patient selection, technical steps, and recent advances for performance of lobectomy using video-assisted thoracoscopic surgery (VATS). Participants will be able to perform a VATS left upper lobectomy on porcine heart-lung blocks.

Learning Objectives
Upon completion of this activity, participants should be able to:

• Describe the indications and steps to perform VATS
• Discuss potential pitfalls and strategies for intraoperative troubleshooting to successfully achieve minimally invasive lobectomy
• Identify instruments and other technologies available to perform minimally invasive lobectomy

Course 7: Advanced Open Esophageal and Tracheal Procedures
COURSE DIRECTORS: Christopher R. Morse, Boston, MA, and Jonathan Nesbitt, Nashville, TN

This course will provide hands-on training for several esophageal anastomosis techniques, as well as airway anastomosis and repair. These advanced operative techniques are not frequently utilized in most general thoracic surgery practices, but competence in these techniques is important. Participants will be introduced to several techniques for airway and esophageal reconstruction with emphasis on the different technical aspects (“pearls”) of the anastomosis from content experts.

Learning Objectives
Upon completion of this activity, participants should be able to:

• Perform different types of esophageal anastomoses, including hand-sewn and hybrid hand-sewn/stapled
• Recognize the technical pitfalls associated with various complex airway resection and anastomoses
• Identify the key steps of tracheobronchoplasty
COURSE DIRECTORS: Staci Beamer, Phoenix, AZ, and Dawn E. Jaroszewski, Phoenix, AZ

In this hands-on course, participants will learn the various techniques for reconstruction of large chest wall defects after resection. Other highlights of the course include stabilization of rib and sternal fractures using the most current reconstruction systems and minimally invasive repair of adult pectus excavatum defects. At the end of this course, participants should be able to independently design and perform reconstruction of the chest wall for various indications.

Learning Objectives
Upon completion of this activity, participants should be able to:
• Perform rigid and semi-rigid reconstruction of chest wall defects after resection, including the ribs and sternum
• Demonstrate how to stabilize single and multiple rib fractures using rib fixation devices
• Use sternal fixation devices to stabilize the sternum
• Perform minimally invasive repair of adult pectus excavatum defects

COURSE 9: Minimally Invasive Aortic and Mitral Surgery
COURSE DIRECTORS: Tom C. Nguyen, Houston, TX, and Juan P. Umana, Bogota, Colombia

Cardiothoracic surgeons face an increased demand to adopt minimally invasive valve techniques. Unfortunately, acquiring this skillset can be difficult in real-world practice. The objective of this course is to provide hands-on experience with the newest techniques in minimally invasive aortic and mitral valve surgeries. Participants will work in alternating pairs at each station to learn critical exposure and cannulation techniques for minimally invasive aortic (right anterior thoracotomy and hemisternotomy) and mitral (lateral thoracotomy) valve surgeries. Participants will then have an opportunity to perform aortic and mitral valve repair/replacement using simulators under both direct vision and via thoracoscopic guidance. For aortic valve replacements, participants will gain exposure to sutureless and rapid-deployment technologies. At the conclusion of the course, a handout will be distributed with a list of key instruments for minimally invasive valve surgery and suggested steps for building a minimally invasive valve program.

Learning Objectives
Upon completion of this activity, participants should be able to:
• Explain exposure (right anterior thoracotomy, hemisternotomy, and lateral thoracotomy), cannulation, and cardioprotection techniques for minimally invasive valve surgery
• Identify key operative steps for successful minimally invasive aortic and mitral valve surgeries, including sutureless and rapid deployment technologies
• Describe the indications and contraindications for minimally invasive valve surgery

COURSE 10: Peroral Endoscopic Myotomy (POEM) Skills
COURSE DIRECTORS: Ralph W. Aye, Seattle, WA, and Inderpal S. Sarkaria, Pittsburgh, PA

This is a practical, hands-on course for learning peroral endoscopic myotomy (POEM) using an explant model. Participants will learn how to plan landmarks for the procedure, access the submucosal space and create a long submucosal tunnel extending through the gastroesophageal junction, perform myotomy, and close the mucosotomy. The standard tools and electrothermy instruments for performing the procedure will be explored in detail.

Learning Objectives
Upon completion of this activity, participants should be able to:
• Determine the proper landmarks for beginning and completing the procedure
• Create a submucosal tunnel
• Perform an endoscopic myotomy within the tunnel
• Close the mucosotomy

NEW! COURSE 11: Robotic Lobectomy
COURSE DIRECTORS: Edward Y. Chan, Houston, TX, Lana Y. Schumacher, Pittsburgh, PA, and Kazuhiro Yasufuku, Toronto, Canada

This course will provide cardiothoracic surgeons of all experience levels with a detailed overview of the critical elements needed to successfully perform a lobectomy using a da Vinci Xi robot. Participants will gain hands-on experience with the technical skills, robotic instrumentation, port placement, anatomic exposure, and surgical techniques of a robotic lobectomy.

Learning Objectives
Upon completion of this activity, participants should be able to:
• Explain the different components of the robotic surgical platform
• Describe the fundamental skills on the robotic console
• State the basic technical skills necessary to perform robotic thoracic surgery
• Outline the critical steps for performing a robotic lobectomy

NEW! COURSE 12: VATS Sleeve Lobectomy
COURSE DIRECTORS: Thomas A. D’Amico, Durham, NC, and Todd L. Demmy, Buffalo, NY

This course will review the indications, patient selection, instrumentation, and technical steps for the performance of bronchial and arterial sleeve lobectomy using video-assisted thoroscopic surgery (VATS).

Learning Objectives
Upon completion of this activity, participants should be able to:
• Identify indications and contraindications for bronchial and arterial left upper lobe (LUL) sleeve lobectomy
• Identify key operative steps in obtaining exposure for LUL sleeve lobectomy
• Successfully complete thoroscopic suture closures/anastomosis of secondary airway (either bronchoplasty or sleeve resection) and arterial sleeve in a tissue simulator
• Discuss tools and supplies that enhance VATS bronchial and arterial reconstruction
NEW! Course 13: Percutaneous Transseptal Access, Transcatheter Mitral Valve Repair, and Mitral Valve-in-Valve Replacement

COURSE DIRECTORS: Tsuyoshi Kaneko, Boston, MA, and Gilbert H. Tang, New York, NY

Transcatheter and surgical mitral valve therapies are emerging as complementary options for treating mitral valve disease, and cardiothoracic surgeons are best positioned to offer their patients both options. As we've learned from transcatheter aortic valve replacement, the transvenous access/transseptal approach to transcatheter mitral valve repair/replacement will, in time, predominate over the transapical approach. With the emergence of more transseptal transcatheter mitral valve repair and replacement devices, surgeons must acquire this skill set quickly to stay relevant in a rapidly evolving field. This course will expose participants to this important skill and myriad emerging transcatheter mitral technologies.

Learning Objectives
Upon completion of this activity, participants should be able to:
• Recognize the imaging modalities necessary for transseptal access
• Perform transseptal access with necessary guidance
• Explain the importance of transseptal access for cardiothoracic surgeons

CHEST @ STS: Interventional Bronchoscopy

Cardiothoracic surgeons are essential in diagnosing and treating lung nodules and lung cancer. New technologies such as endobronchial ultrasound (EBUS), navigational bronchoscopy, and cutting-edge endobronchial therapeutics have changed the approach to lung cancer staging. However, many cardiothoracic surgeons have had little exposure to these techniques, and additional training is needed. This session will explore the most advanced techniques and equipment use for interventional bronchoscopy.

Learning Objectives
Upon completion of this activity, participants should be able to:
• Identify indications, yield, and complications of EBUS
• Recognize benefits and limitations of airway ablative modalities
• State the benefits and limitations of various airway stents

NEW! Panel Discussion: Late Sequelae of the Arterial Switch Operation

9:35 AM Planning for the Future: Arterial Switch Operation
Viktor Hraska, Milwaukee, WI
9:50 AM Panel Discussion
10:10 AM Break
10:20 AM Failing Fontan: Liver Surveillance
Christopher Francois, Madison, WI
10:40 AM Failing Fontan: Heart/Liver Transplant Is Better
Stephanie M. Fuller, Philadelphia, PA
10:52 AM Failing Fontan: Heart-Only Transplant Is Better
Charles B. Huddleston, St Louis, MO
11:04 AM Lymphodynamics
Vibeke E. Hjortdal, Aarhus, Denmark
11:24 AM Transplant Case Discussion and Panel Discussion

8:00 AM – 12:00 PM

Adult Congenital Heart Disease Symposium: Planning for the Future—Aortic Arch Anomalies and the Failing Fontan

This session will highlight surgical techniques used in neonatal surgery that may help prevent late complications of the arterial switch operation and coarctation or arch repair, as well as how to deal with those complications, if they do occur. Case studies have been added to help guide both adult and pediatric heart surgeons, who often must choose between multiple open and endovascular treatment options for adult congenital patients with complex problems. In addition, an update on the latest advances in lymphodynamics and a debate over single vs multigraft transplant for the failing Fontan will be included.

Learning Objectives
Upon completion of this activity, participants should be able to:
• Describe open surgical options for repair of adult coarctation of the aorta
• Describe endovascular options for repair of adult coarctation and recurrent coarctation
• Explain techniques for preventing late complications of coarctation
• Identify techniques for preventing late complications of the arterial switch operation
• Discuss which patients are better candidates for multigraft transplantation after single ventricle palliation

MODERATORS: Joseph A. Dearani, Rochester, MN, Eric N. Feins, Boston, MA, Joshua L. Hermans, Madison, WI, Robert D. B. Jaquiss, Dallas, TX, and Jennifer S. Nelson, Chapel Hill, NC

8:00 AM Arch Anomalies and Vascular Rings in the Adult: Open Approaches
Alberto Pochettino, Rochester, MN
8:15 AM Coarctation and Arch Anomalies in the Adult: Endovascular Approaches
Gustavo S. Oderich, Rochester, MN
8:30 AM Failing to Plan: Late Sequelae of Coarctation
Thomas E. MacGillivray, Houston, TX
8:45 AM Planning for the Future: Coarctation and Arch Anomalies in Children
James S. Tweddell, Cincinnati, OH
9:00 AM Coarctation Case Discussion
9:20 AM Failing to Plan: Late Sequelae of the Arterial Switch Operation
Frank G. Scholl, Hollywood, FL

8:00 AM – 12:00 PM

CHEST @ STS: Interventional Bronchoscopy

Cardiothoracic surgeons are essential in diagnosing and treating lung nodules and lung cancer. New technologies such as endobronchial ultrasound (EBUS), navigational bronchoscopy, and cutting-edge endobronchial therapeutics have changed the approach to lung cancer staging. However, many cardiothoracic surgeons have had little exposure to these techniques, and additional training is needed. This session will explore the most advanced techniques and equipment use for interventional bronchoscopy.

Learning Objectives
Upon completion of this activity, participants should be able to:
• Identify indications, yield, and complications of EBUS
• Recognize benefits and limitations of airway ablative modalities
• State the benefits and limitations of various airway stents

MODERATORS: Momen M. Wahidi, Durham, NC, and Richard I. Whyte, Boston, MA

8:00 AM Introduction
8:10 AM EBUS-Guided Transbronchial Needle Aspiration of Mediastinal and Hilar Lymph Nodes
Momen M. Wahidi, Durham, NC
8:30 AM Peripheral Bronchoscopy: Navigational Bronchoscopy and Radial EBUS
Alex Chen, St Louis, MO
8:50 AM EBUS Case Scenarios
9:20 AM Panel Discussion

Kazuhiro Yasufuku, Toronto, Canada
11:00 AM Subglottic Stenosis: Endoscopic Management
Alex Chee, Boston, MA
11:20 AM Subglottic Stenosis: Surgical Management
Sudish C. Murthy, Cleveland, OH
11:40 AM Panel Discussion
Critical Care Symposium: Cutting-Edge Strategies for Cardiothoracic Critical Care Emergencies and Evolving Technologies

Critical care emergencies in the cardiothoracic intensive care unit (ICU) pose unique challenges. Understanding these emergencies and their immediate interventions with state-of-the-art pharmacologic and mechanical therapeutic options is essential to the management of an increasingly complex cardiothoracic population. This symposium will address how to optimize patient outcomes and innovative approaches to handling emergencies. Topics will include extracorporeal cardiopulmonary resuscitation (E-CPR), post-cardiotomy extracorporeal membrane oxygenation (ECMO), urgent respiratory deterioration requiring sophisticated ventilator modes or veno-veno (VV) ECMO, anticoagulation treatment/monitoring strategies, pulmonary embolic events, hemorrhagic collapse, and the potential role of early resternotomy.

Learning Objectives

Upon completion of this activity, participants should be able to:

- Identify management protocols for veno-arterial ECMO and E-CPR for optimal patient outcomes
- Delineate innovative management strategies and tactics in respiratory emergencies—advanced ventilatory management modes vs VV ECMO
- Delineate novel anticoagulation management protocols
- Identify and manage periparative hemodynamic emergencies and the potential role of early resternotomy

MODERATORS: Rakesh C. Arora, Winnipeg, Canada, Subhasis Chatterjee, Houston, TX, Michael S. Firstenberg, Aurora, CO, Rita C. Milewski, Philadelphia, PA, and Glenn J. R. Whitman, Baltimore, MD

8:00 AM Introduction

Cardiac Arrest and E-CPR

8:05 AM Indications, Contraindications, and Outcomes for E-CPR
Jonathan W. Haft, Ann Arbor, MI

8:35 AM Case Presentation With Audience Participation
Erik Osborne, Norfolk, VA

Respiratory Emergencies—Acute Respiratory Distress Syndrome (ARDS) and Pulmonary Embolus

9:00 AM Current Therapy for ARDS: Ventilator Modes vs VV ECMO—What Is the Evidence?
Cara Agerstrand, New York, NY

9:20 AM Panel Discussion

9:30 AM Appropriate Therapy for Pulmonary Embolus: When to Do What
Subhasis Chatterjee, Houston, TX

9:50 AM Panel Discussion

10:00 AM Break

Anticoagulation Dilemmas in the ICU

10:15 AM Heparin-Induced Thrombocytopenia Diagnosis and Management
Rúzan Manji, Winnipeg, Canada

10:35 AM Non-Vitamin K Antagonist Oral Anticoagulant Reversal: Review of Strategies
Jerrold Levy, Atlanta, GA

10:55 AM Optimal Monitoring for the Bleeding Patient—Diagnostic and Therapeutic Use of PTT/TEG/Xa Tests and How to Interpret
Glenn J. R. Whitman, Baltimore, MD

Hemodynamic Emergencies—Post-Cardiotomy Arrest

11:15 AM Evidence for Early Emergency Resternotomy for the Management of Post-Cardiac Surgery Arrest
Joel Dunning, Middlesbrough, United Kingdom

11:30 AM Implementation of Early Emergency Resternotomy Protocols for the Management of Post-Cardiac Surgery Arrest
Rosemary Timmerman, Anchorage, AK

11:45 AM Panel Discussion

8:00 AM Introduction

Practice Management Summit

Cardiothoracic surgeons are faced with myriad complex clinical and non-clinical organizational issues. For many in our specialty, understanding one’s value and being appropriately rewarded remains a challenge. The Practice Management Summit’s expert speakers will help address the cardiothoracic surgeon’s organizational value proposition. Speakers will address the US health care delivery model’s evolution and its impact upon the specialty. Additionally, the concepts of fair market value, relative value units (RVUs), the quality scorecard, and how to best negotiate with employers will be critically discussed by industry leaders.

Learning Objectives

Upon completion of this activity, participants should be able to:

- Negotiate a contract from a position of strength
- Explain the value proposition as it pertains to individual practice types
- Discuss the direction of health care and cardiothoracic surgery
- Leverage the cardiovascular service line structure to promote value
- Identify the dangers associated with variability in health care delivery

MODERATORS: Frank L. Fazzari, Rochester, MI, and Paul S. Levy, Jonesboro, AR

8:00 AM Break

8:10 AM Restructuring Your Organization to Align With the New Realities in Health Care
Nathan Kaufman, San Diego, CA

8:30 AM Contemplating Private Practice vs Institutional Employment: Local Environment and Timing Is Everything
Kevin D. Accola, Orlando, FL

8:50 AM Updates From the STS Council on Health Policy and Relationships
Alan M. Speir, Falls Church, VA

9:10 AM Panel Discussion

9:40 AM Break

10:10 AM Annual Update in Economic Survey Data, Trends, and Use
Michael N. Heaton, Indianapolis, IN

10:30 AM Work RVU Employment Models—Professional Help Required!
Michael G. Moront, Toledo, OH

Steven V. Manoukian, Nashville, TN

11:10 AM Compensation Agreements: Landmines and Lifesavers
Mark S. Kopson, Bloomfield Hills, MI

11:30 AM Panel Discussion

8:00 AM – 12:00 PM

**SCA @ STS: Integrating Perioperative Echocardiography in Cardiac Surgical Clinical Decision-Making for Challenging Cases**

This session will address recent advances in the field of echocardiography, including continuously evolving technology for the treatment of valvular disease and new evidence regarding the appropriateness of already established procedures. New evidence regarding catheter-based procedures for mitral valve regurgitation and aortic valve stenosis (such as the MITRA-FR, COAPT, and SOLVE-TAVI trials) will be reviewed using a case-based format. Also, recent publications on the role of echocardiography in hypertrophic cardiomyopathy will be highlighted.

**Learning Objectives**

Upon completion of this activity, participants should be able to:

- Describe the utility of echo anatomy and intraoperative echocardiographic analysis in surgical decision-making in open and percutaneous procedures
- Discuss the integration of echocardiographic measurements with new clinical evidence in certain patient populations as described in new clinical data
- Apply echocardiographic findings to case studies

**MODERATORS:** Jennifer S. Lawton, Baltimore, MD, and Alina Nicoara, Durham, NC

8:00 AM Introduction

**Session I**

8:10 AM Case I: Transcatheter Aortic Valve Replacement
MaryBeth Brady, Baltimore, MD

8:30 AM Panel Discussion

8:50 AM Case II: Complex Mitral Valve Repair for Degenerative Mitral Valve Disease
Georges Desjardins, Park City, UT

9:10 AM Panel Discussion

9:30 AM Case III: Management of Tricuspid Regurgitation in a Patient Undergoing Ventricular Assist Device Placement
Jacob T. Gutsche, Philadelphia, PA

9:50 AM Panel Discussion

10:10 AM Break

**Session II**

10:30 AM Case IV: Structural Heart Disease—Mitral Valve
Charles B. Nyman, Boston, MA

10:50 AM Panel Discussion

11:10 AM Case V: Challenges During Surgery for Hypertrophic Cardiomyopathy
Alina Nicoara, Durham, NC

11:30 AM Panel Discussion

11:50 AM Wrap-Up

10:00 AM – 12:00 PM

**Residents Symposium: Transitioning From Residency to a Successful Practice**

This symposium is designed to provide cardiothoracic surgery residents with practical information regarding the transition from being a trainee to a practicing surgeon. The first session will examine various practice settings, including both community and academic environments. There will also be talks on the job search process and negotiating a contract. The second session will address transitioning into practice, early career development, and achieving personal financial security, as well as a successful work-life balance. Each session will be followed by small group table discussions led by experienced surgeons and a larger group discussion with the speakers.

**Learning Objectives**

Upon completion of this activity, participants should be able to:

- Recognize the key steps needed for a successful job search
- Explain the differences between practicing in an academic environment, community hospital practice, and private practice
- Describe how to successfully negotiate a contract
- Identify the benchmarks for building clinical programs and early career development
- Describe the key steps in achieving personal financial security
- Identify methods for optimizing work-life balance as part of overall career planning

**MODERATOR:** Craig J. Baker, Los Angeles, CA

10:00 AM Introductory Remarks
Faiz Bhora, New York, NY, and Edward P. Chen, Atlanta, GA

**Session I: Finding a Job**

10:05 AM What’s Great About Working in a Private Practice or Hospital Employee Environment
Asad A. Shah, Raleigh, NC

10:15 AM What’s Great About Working in an Academic Environment
Mara B. Antonoff, Houston, TX

10:25 AM Key Steps to Finding a Job
Rishindra M. Reddy, Ann Arbor, MI

10:35 AM Negotiating a Contract: Academic and Private Practice
Faiz Bhora, New York, NY

10:45 AM Discussion

**Session II: Transition to Practice**

11:00 AM Building a Successful Clinical Practice and Being an Effective Leader
Edward P. Chen, Atlanta, GA

11:10 AM Early Career Development and Getting Involved in Your Profession
W. Brent Keeling, Atlanta, GA

11:20 AM Achieving Personal Financial Security: Tips and Secrets
Frederick Y. Chen, Boston, MA

11:30 AM Achieving a Successful Work-Life Balance
Armin Kiankhooy, Charlottesville, VA

11:40 AM Discussion
10:15 AM – 12:00 PM

STS University (Session II)
The courses from Session I will be repeated, offering attendees the chance to participate in more than one. See pages 9-12 for course descriptions.

12:00 PM – 1:00 PM

Residents Luncheon

1:00 PM – 2:00 PM

Ethics Debate: Bespoke Babies—Genome Editing in Cystic Fibrosis Embryos

Genome editing is on the threshold of clinical use, and there are still many unsettled questions as to its proper use and the underlying ethics. The Ethics Debate will consider a patient who has had a double lung transplant for cystic fibrosis and wants to have children who are free of his disease. In order to achieve this, he wants the genomes of any future embryos edited to replace a mutated cystic fibrosis gene, CFTR, with a normal gene. The presenters are experts in this field who have conflicting views of the proper use of genome editing tools such as CRISPR-Cas9.

Learning Objectives

Upon completion of this activity, participants should be able to:

• Describe how various genome editing tools can be used to prevent or treat cardiothoracic diseases
• Discuss the ethical implications of genetically altering somatic cells vs germline cells
• Provide rudimentary advice to their patients about the uses of genome editing in their families, before referral to genetic counselors

MODERATOR: Thomas A. D’Amico, Durham, NC

1:00 PM
Introduction

1:05 PM
Cystic Fibrosis Genes Should Be Replaced With Normal Genes in Cystic Fibrosis Embryos
Kyle Brothers, Louisville, KY

1:20 PM

1:00 PM – 2:00 PM

How to Write a Great Review: Essential Components of Outstanding Peer Reviews

Consumers of medical literature expect peer-reviewed publications to be accurate, meaningful, and have high impact. Meeting this expectation requires a thorough and critical evaluation of submitted manuscripts through the peer-review process. An effective peer-review system will facilitate informed clinical practice changes that will enhance value-based care for patients and iteratively educate the entire field of cardiothoracic surgery. While this session is geared toward junior faculty and early career researchers, physicians and research personnel at all stages of their careers will gain contemporary perspectives on the process.

Learning Objectives

Upon completion of this activity, participants should be able to:

• Describe the peer-review process and identify its importance to academic faculty
• Recognize the key elements of scientific manuscripts and identify the necessary components to include in a review of each element

MODERATOR: Nicholas Beek, Washington, DC, and Madeleine Stirling, Washington, DC

1:00 PM
Panel Discussion: On the Front Lines of STS Advocacy
John H. Calhoon, San Antonio, TX, J. Michael DiMaio, Dallas, TX, and Alykhan S. Nagji, Kansas City, KS

1:00 PM – 2:00 PM

Research Using the STS National Database

The STS National Database is a valuable tool for both quality improvement and research, and research utilizing the Database has grown exponentially in recent years. Still, many researchers may not be familiar with the different methods available for performing such research via the STS Research Center. This session will cover several Database-related research programs, including the Access and Publications (A&P) Research Program and the Participant User File (PUF) Research Program. In addition, speakers will discuss opportunities to pursue funded research using STS National Database data.

Learning Objectives

Upon completion of this activity, participants should be able to:

• Distinguish between the different STS National Database research opportunities offered through the STS Research Center
• Explain the rules, processes, and expectations for the research programs
• Identify good practices for preparing a competitive proposal
• Explain how to access STS Research Center resources and staff assistance

MODERATOR: Felix G. Fernandez, Decatur, GA

1:00 PM  Introduction to STS Research
          Felix G. Fernandez, Decatur, GA

1:05 PM  PUF Research Program: Policies and Procedures
          Kevin W. Lobdell, Charlotte, NC

1:13 PM  PUF Research Program: Early Experience
          Robert H. Habib, Chicago, IL

1:21 PM  Investigator Experience With the PUF Research Program
          Bradley S. Taylor, Baltimore, MD

1:28 PM  A&P Research Program

          Matthew L. Williams, Philadelphia, PA

1:45 PM  Q&A

1:00 PM – 2:00 PM

STS/CATS/CSCS: Innovative Techniques in Thoracic Surgery

Trends in the utilization of minimally invasive surgical techniques (video-assisted thoracoscopic and robotic) for anatomic pulmonary resection will be reviewed in this session with a focus on the benefits over open approaches and variation between robotic and non-robotic platforms. The challenges to adopting robotic approaches from an implementation and cost perspective also will be discussed. In addition, the session will focus on emerging technologies for advanced endobronchial interventions, both diagnostic and therapeutic, and will review the emergence of novel systems such as robotic three-dimensional bronchoscopy.

Learning Objectives

Upon completion of this activity, participants should be able to:

• Explain the status of and trends in minimally invasive techniques for pulmonary resection
• Describe the potential benefits and pitfalls of adopting/implementing minimally invasive approaches
• Recall the advanced endobronchial platforms (robotic)
• Recognize the diagnostic and therapeutic potential of innovative endobronchial systems

MODERATORS: Bernard J. Park, New York, NY, and Kazuhiro Yasufuku, Toronto, Canada

1:00 PM  Minimally Invasive Pulmonary Resection: Status and Trends in the United States
          David C. Rice, Houston, TX

1:10 PM  Minimally Invasive Pulmonary Resection: Status and Trends in Canada
          Wael C. Hanna, Hamilton, Canada

1:20 PM  Discussion

1:30 PM  Innovations in Diagnostic Bronchoscopy
          Katarzyna Czarnecka, Toronto, Canada

1:40 PM  Innovations in Therapeutic Bronchoscopy
          Shanda H. Blackmon, Rochester, MN

1:50 PM  Discussion

1:00 PM – 2:00 PM

Unconscious Bias

Unconscious bias is a rarely recognized phenomenon that can have unintended influence on interactions among cardiothoracic surgeons at all levels of training, particularly as it pertains to gender, race, and ethnicity. This session, organized by Women in Thoracic Surgery, will address the need to recognize and define unconscious and implicit bias in our actions and provide tools to avoid the negative influence it may have on our actions and interactions with others.

Learning Objectives

Upon completion of this activity, participants should be able to:

• Define unconscious bias
• Define implicit bias
• Recognize bias within themselves
• Describe how their personal bias could impact others
• Identify ways to avoid unconscious bias in everyday practice

MODERATOR: Valerie A. Williams, Cincinnati, OH

1:00 PM  Introduction
          Valerie A. Williams, Cincinnati, OH

1:05 PM  Unconscious Bias: What Is It?
          Jessica S. Donington, Chicago, IL

1:13 PM  Gender Bias
          DuyKhanh P. Cappa, Indianapolis, IN

1:21 PM  Unconscious Bias: Race
          Jane Yanagawa, Los Angeles, CA

1:29 PM  Overcoming Bias in Surgery: The Role of Mentorship and Sponsorship
          Robert S. D. Higgins, Baltimore, MD

1:37 PM  Panel Discussion
2:10 PM – 4:30 PM
Opening Session

President’s Reception: Hotel del Coronado
Join your colleagues for the STS President’s Reception at the celebrated Hotel del Coronado on Sunday evening, January 27. Set on picturesque Coronado Island, just off the San Diego coastline, this National Historic Landmark hotel was built in 1886 and has been a popular destination for visiting celebrities, presidents, and dignitaries. The reception will be held in the Crown Room, an elegant space with a 33-foot domed ceiling made from Oregon sugar pine and crown-shaped chandeliers designed by L. Frank Baum, author of The Wonderful Wizard of Oz. Several notable events have been held in the Crown Room, including a celebration for Charles Lindbergh following his solo transatlantic flight. The resort also served as the backdrop for movies, including “Some Like It Hot,” starring Marilyn Monroe, Tony Curtis, and Jack Lemmon. Don’t miss this opportunity to enjoy dinner, drinks, and conversation in a historic setting.

Indicates that a ticket is required to attend.

7:15 AM – 9:15 AM

NEW! Career Navigation and Development: Hot Topics to Enhance Your First 7 Years of Practice

Through lectures and robust discussion on hot topics, this session will review the challenges faced by cardiothoracic surgeons early in their careers and provide solutions so that they can be successful. Attendees also will learn how to become a volunteer leader in their medical specialty society.

**Learning Objectives**

Upon completion of this activity, participants should be able to:

- Describe the essential elements of contract negotiation
- Explain how to apply social media to their practice
- Describe how to find a mentor and develop a valuable relationship
- Outline how to develop a niche in their practice while attaining work-life balance

**MODERATORS:** Melanie A. Edwards, Ypsilanti, MI, and Richard Lee, Augusta, GA

7:15 AM

**Introduction**

Melanie A. Edwards, Ypsilanti, MI

7:25 AM

**Negotiating and Renegotiating Your Contract**

7:15 AM – 9:15 AM

**EACTS @ STS: Which Arch Operation Should I Do? Decision-Making During Type A Dissection Repair**

In this session presented by STS and the European Association for Cardio-Thoracic Surgery, international experts will examine alternatives to the standard classic repair for DeBakey type I aortic dissection and discuss the outcomes of innovative extended arch repair techniques, including the distal aortic frozen elephant trunk, novel branched arch endografts, and valve retention root reconstructive surgery. Technical considerations, conduct of operations, surgical decision-making, and the most up-to-date data will be presented.

**Learning Objectives**

Upon completion of this activity, participants should be able to:

- State when it is appropriate to modify the classic proximal reconstructive repair for DeBakey type I dissection with extended arch repair techniques based on available outcomes data
- Describe the nuances and different applications for novel branched arch endograft devices and frozen elephant trunk in patients with DeBakey type I aortic dissection

**MODERATORS:** Joseph E. Bavaria, Philadelphia, PA, and Ruggero P. De Paulis, Rome, Italy

8:15 AM – 9:15 AM  Diversity and Inclusion in Cardiothoracic Surgery: What Is the Real Value?
Attendees of this session, organized by the STS Task Force on Diversity and Inclusion, will learn how diversity and inclusion can be valuable to their practices, service lines, training efforts, and relationships in the communities they serve. Speakers will address strategies to diversify faculty and/or surgical staff to optimally reflect the practice community and tips for including diverse trainees and junior surgeons in leadership and research.

Learning Objectives
Upon completion of this activity, participants should be able to:
• Define diversity as it relates to the health care workforce and the care of diverse patient populations
• Define inclusion as it relates to the health care workforce, health care leadership, and the care of diverse patient populations
• Define underrepresented minority (URM)
• Discuss how a diverse cardiothoracic surgery workforce can improve patient outcomes through increasing cultural competency and mitigating implicit provider bias
• Explain how the inclusion of URM trainees, junior faculty, and staff helps increase the URM pipeline to the clinical workforce

SVS @ STS: Sharing Common Ground for Cardiovascular Problems

Many cardiac surgeons continue to incorporate the care of patients with vascular disease into their practices, while many vascular surgeons are now treating pathologies that previously were purely in the domain of cardiac surgeons. This session will offer topics relevant to both fields and provide the perspective of each.

Learning Objectives

Upon completion of this activity, participants should be able to:

• Formulate a plan based on published data and expert recommendations for the management of massive and sub-massive pulmonary embolism

• Describe the current state of non-femoral access options for delivery of large endovascular devices

Clinical Scenarios: The Heart Team

This session will concentrate on a true collaborative “heart team” approach to treating complex issues facing the practicing physician or affiliate provider. Using a unique and innovative format highlighting adult cardiac disease processes, speakers will discuss the multidisciplinary approach to aortic valve disease, mitral valve disease, and coronary artery disease. Session components include invited technical videos, a critical review of the literature, case-based presentations describing difficult clinical scenarios, and an interactive panel discussion.

Learning Objectives

Upon completion of this activity, participants should be able to:

- Discuss the controversies surrounding the management of tricuspid valve disease
- Describe the indications and contraindications for the treatment of mitral regurgitation
- Describe the construction and makeup of the multidisciplinary “heart team” and its influence in improving patient outcomes and fostering communication among specialties
- Explain the optimal management of patients with specific case scenarios who are evaluated for aortic stenosis, congestive heart failure, mitral regurgitation, and tricuspid regurgitation

TUESDAY JANUARY 29 | STS ANNUAL MEETING

6:30 AM – 1:00 PM
Registration

9:00 AM – 1:30 PM
Exhibit Hall

7:00 AM – 9:00 AM
Adult Cardiac: General
MODERATORS: Faisal Bakaeen, Cleveland, OH, and T. Sloane Guy, New York, NY

7:00 AM  
**ABSTRACT:** Effects of Frailty on Outcomes and 30-Day Readmissions Following Surgical Mitral Valve Replacement

A. Iyengar, N. J. Goel, J. J. Kelly, J. J. Han, C. Brown, F. N. Khurshad, Z. Chen, N. Desai

1 Hospital of the University of Pennsylvania, Philadelphia, 2 University of Pennsylvania, Philadelphia, 3 University Heart Center Freiburg, Germany

7:15 AM  
**ABSTRACT:** Characterizing Risks Associated With Mitral Annular Calciumization in Mitral Valve Replacement: An Analysis Utilizing the STS Adult Cardiac Surgery Database

1 Brigham and Women’s Hospital, Boston, MA, 2 Beth Israel Deaconess Medical Center, Boston, MA

7:30 AM  
**ABSTRACT:** Ultrasound-Guided Septal Myectomy Using High-Resolution Intracardiac Probe and Mitral Leaflet Height Reduction for Systolic Anterior Motion in Hypertrophic Obstructive Cardiomyopathy

Tokyo Medical and Dental University, Japan

7:45 AM  
**ABSTRACT:** Five Year Outcomes of Patients Treated With a Novel Thoracic Endograft for Blunt Thoracic Aortic Injury: The RESCUE Pivotal Trial

1 University of Michigan Medical Center, Ann Arbor, 2 Cedars-Sinai Medical Center, Los Angeles, CA, 3 University of Virginia Health System, Charlottesville, 4 University of Miami Jackson Memorial Hospital, FL, 5 Morton Plant Hospital, Clearwater, FL, 6 Cooper Medical School of Rowan University, Camden, NJ, 7 MemorialCare Long Beach Medical Center, CA, 8 Medtronic, Santa Rosa, CA, 9 MemorialCare Heart and Vascular Institute, Long Beach, CA

8:00 AM  
Surgical Video: Pulmonary Embolectomy With Retrograde Pulmonary Perfusion for Saddle Pulmonary Embolus

Erik Beyer, Fort Lauderdale, FL

8:15 AM  
**ABSTRACT:** Early Experience in Preclinical Orthotopic Cardiac Xenotransplantation

1 University of Maryland, Baltimore, 2 NYU Langone Health, New York, 3 Revivicor, Blacksburg, VA, 4 University of Maryland Medical Center, Baltimore

8:30 AM  
**ABSTRACT:** Perioperative Pain Management and Opioid Use Patterns by US Adult Cardiac Surgeons: Survey Results From the STS Task Force on the Opioid Crisis Intervention in Cardiothoracic Surgery

1 Johns Hopkins University School of Medicine, Baltimore, MD, 2 University of Pennsylvania, Philadelphia, 3 The Society of Thoracic Surgeons, Chicago, IL, 4 The University of Chicago, IL, 5 The University of North Carolina at Chapel Hill, 6 The University of Texas MD Anderson Cancer Center, Houston, 7 University of California, San Francisco Medical Center and San Francisco VA Medical Center, 8 University of Colorado School of Medicine, Aurora, 9 The Society of Thoracic Surgeons, Washington, DC

8:45 AM  
**ABSTRACT:** Effect of the Time Interval Between Coronary Angiography and Coronary Artery Bypass Grafting Surgery on Postoperative Acute Kidney Injury: An Analysis of the STS Adult Cardiac Surgery Database

A. C. Guercio, M. P. Macris, S. Hebert, C. S. Bell, C. C. Miller, D. Molony

1 Memorial Hermann, Houston, TX, 2 Houston Methodist Hospital, TX, 3 McGovern Medical School at UT Health, Houston, TX

7:00 AM – 9:00 AM
Adult Cardiac: Mitral/Tricuspid
MODERATORS: Richard Lee, Augusta, GA, and Tom C. Nguyen, Houston, TX

7:00 AM  
**ABSTRACT:** Impact of Tricuspid Regurgitation With and Without Intervention During Surgical Aortic Valve Replacement

1 University of Virginia, Charlottesville, 2 Cardiac, Vascular & Thoracic Surgery Associates, Falls Church, VA

7:15 AM  
**ABSTRACT:** Evolution of Tricuspid Regurgitation After Repair of Degenerative Mitral Regurgitation

A. Hage, F. Hage, N. Tzemos, M. W. Chu

1 Western University, London, Canada, 2 London Health Sciences Center, Canada

7:30 AM  
**ABSTRACT:** Comparison of Mid-Term Survival and Recurrence of Tricuspid Regurgitation Following Tricuspid Valve Repair: Ring Annuloplasty vs Suture Bicuspidization Annuloplasty: Implications on Transcatheter Technologies

**Advanced Therapies for End-Stage Cardiopulmonary Disease**

Cardiothoracic surgeons, cardiologists, intensivists, and allied health professionals who care for patients with advanced heart and lung failure will benefit from this session, which will focus on organ transplantation and donor-related issues. Speakers will discuss the financial considerations in organ procurement, ex-vivo organ preservation, the use of donors from cardiac death and those with hepatitis C, and the recent United Network for Organ Sharing heart allocation model, which was implemented in October 2018.

**Learning Objectives**

Upon completion of this activity, participants should be able to:

- Describe the ideal diagnostic evaluation and optimization of heart donors
- Summarize the role of organ procurement organizations, their financial and organizational infrastructure, and how they impact clinical practice in thoracic organ procurement
- Explain the current and potential future application of ex-vivo organ preservation
- Describe potential future sources of donor thoracic organs such as those with hepatitis C and from donation after cardiac death
- Explain the new heart allocation model and describe the early impact at high- and low-volume centers

**Moderator:** Jonathan W. Haft, Ann Arbor, MI

- **1:00 PM**  Heart Donor Diagnostic Testing and Optimization: Are We All on the Same Page?

**How-To Video Session: Technical Tips to Avoid Pitfalls and Simplify Congenital and Pediatric Cardiac Surgery Procedures**

This session will prepare congenital and pediatric cardiac surgeons to better master challenging operative scenarios such as complex atrioventricular valve disease and complex biventricular repairs. Attendees also will be exposed to emerging technologies and unique approaches to help them better surgically manage heart failure, mechanical support, and cardiac transplantation. Experts will share their experiences as they mastered these complex operative interventions.

**Learning Objectives**

Upon completion of this activity, participants should be able to:

- Detail the technical aspects of complex operations performed in congenital and pediatric cardiac surgery
- Discuss pitfalls of critical steps in complex congenital and pediatric cardiac surgery
- Identify novel surgical approaches to make congenital and pediatric cardiac operations safer and more reproducible
- Describe the technical nuances for operative interventions that they may not commonly see in clinical practice

**MODERATORS:** S. Adil Husain, Salt Lake City, UT, and James D. St. Louis, Kansas City, MO

Lindsay May, Salt Lake City, UT

3:25 PM  Mechanical Assist Devices in the Functional Single Ventricle Anatomy  
David L. Morales, Cincinnati, OH

3:35 PM  Complex Transplantation in Functional Single Ventricle Anatomy  
Kirk R. Kanter, Atlanta, GA

3:45 PM  Panel Discussion

**Session IV: Complex Neonatal Repair**

4:05 PM  Complete Repair of Dextro-Transposition of the Great Arteries With Severe Arch Obstruction and Ventricular Septal Defect  
James S. Tweddell, Cincinnati, OH

4:15 PM  Primary Sutureless Repair of Total Anomalous Pulmonary Venous Connection  
Christopher A. Caldarone, Toronto, Canada

4:25 PM  Technical Variations With the Modified Norwood Procedure  
Jennifer C. Romano, Ann Arbor, MI

4:35 PM  Panel Discussion

1:00 PM – 5:00 PM

**How-To Video Session: General Thoracic**

This session will focus on the technical strategies to incorporate minimally invasive techniques such as video-assisted thoracoscopic surgery (VATS) and robotics for the performance of increasingly complicated general thoracic procedures, namely segmentectomy, esophagectomy, and thymectomy. Technical strategies and avoidance of pitfalls will be highlighted.

**Learning Objectives**

Upon completion of this activity, participants should be able to:

- Explain how to perform a segmentectomy
- Describe the segmental anatomy of the lung
- Describe how to approach thymectomy/thymoma with minimally invasive techniques
- Identify minimally invasive options in the management of large thymomas
- Demonstrate how to perform a minimally invasive/robotic esophagectomy
- Recognize how to avoid pitfalls in esophagectomy

1:00 PM  Introduction

**Esophageal**

**MODERATORS:** Virginia R. Litte, Boston, MA, and M. Blair Marshall, Washington, DC

1:05 PM  Strategies in the Management of Celiac Nodal Disease Following Neoadjuvant Treatment  
Gail E. Darling, Toronto, Canada

1:15 PM  Avoiding Pitfalls During Robotic Esophagectomy  
Kemp H. Kernstine, Dallas, TX

1:25 PM  Creating the Optimal Conduit  
Philip A. Linden, Cleveland, OH

1:35 PM  Avoiding Anastomotic Leaks  
M. Blair Marshall, Washington, DC

1:45 PM  Discussion

2:10 PM  Break

**Segments**

**MODERATORS:** Linda W. Martin, Charlottesville, VA, and Betty C. Tong, Durham, NC

2:20 PM  Anatomy/Segment Nomenclature (Boydenc System)  
Linda W. Martin, Charlottesville, VA

2:30 PM  When to Abandon the Segment for Lobectomy  
Jessica S. Donington, Chicago, IL

2:40 PM  Tips and Tricks for Identifying Nodules, Bronchial, and Vascular Anatomy During Minimally Invasive Segmentectomy  
Shanda H. Blackmon, Rochester, MN

2:50 PM  Tips and Tricks for the Less Common, More Difficult Segmentectomies—Basilar, Right Upper Lobe, and Lingual-Sparing Left Upper Lobe Segmentectomies (Robotic and/or VATS)  
David C. Rice, Houston, TX

3:00 PM  Unusual Anatomy/Anatomic Variants and How to Handle Them During Minimally Invasive Segmentectomy  
Thomas A. D’Amico, Durham, NC

3:10 PM  Discussion

www.sts.org/annualmeeting / Agendas and speakers subject to change
Myasthenia Gravis

Joshua R. Sonett, New York, NY

Robotic-Assisted Thymectomy for Non-Thymomatous Myasthenia Gravis

Inderpal S. Sankaria, Pittsburgh, PA

Thoracoscopic Excision of a Large Thymoma

Michael J. Weyant, Aurora, CO

Thoracoscopic Thymectomy for Non-Thymomatous Myasthenia Gravis

Jose L. Navia, Cleveland, OH

Robotic-Assisted Excision of a Large Thymoma

Valerie W. Rusch, New York, NY

ROBOCARDIOLOGY

My Tube: Adult Cardiac How-To Video Session

This session will provide technical tips that attendees can immediately implement in their practices. Videos featuring common cases in heart failure surgery, coronary disease, valvular disease, and aortic/great vessel disease will be presented with a focus on new technologies and alternative approaches.

Learning Objectives

Upon completion of this activity, participants should be able to:

- Explain the technical aspects of complex operations commonly performed in adult cardiac surgery, with specific emphasis in the fields of structural heart disease, coronary arterial disease, aortic pathology, and heart failure
- Discuss the pitfalls of critical steps in complex cardiac surgery
- Identify novel tricks to make cardiac operations easier, safer, and more reproducible

MODERATORS: Gorav Ailawadi, Charlottesville, VA, and Ahmet Kilic, Baltimore, MD

1:00 PM – 5:00 PM

1:00 PM MitraClip

Kendra J. Grubb, Atlanta, GA

1:12 PM Transapical NeoChord for Mitral Valve Repair

James S. Gammie, Stevenson, MD

1:24 PM Transseptal Mitral/Tricuspid Valve Repair With or Without Atrial Fibrillation Surgery

Richard Lee, St Louis, MO

1:36 PM Sutureless Aortic Valve Replacement

Wilson Y. Szeto, Philadelphia, PA

1:48 PM Transapical Myectomy

Hartzell V. Schaff, Rochester, MN

2:00 PM Aortic Valve Repair for Aortic Insufficiency

Kenton J. Zehr, Baltimore, MD

2:12 PM Ventricular Septal Defect Repair

Y. Joseph Woo, Stanford, CA

2:24 PM Total Arterial Revascularization

Joseph F. Sabik III, Cleveland, OH

2:36 PM Completely Robotic Coronary Artery Bypass Grafting

Johannes Bonatti, Abu Dhabi, United Arab Emirates

2:48 PM Break

3:00 PM Emerging Endovascular Approaches for Aortic Arch Repair

Ali Khoynezhad, Long Beach, CA

3:12 PM Failed Homograft: Aortic Root Replacement

Leora T. Yanboro, Charlottesville, VA

3:24 PM Managing Descending Thoracic Aneurysm After Previous Dissection

Joseph S. Coselli, Houston, TX

3:36 PM Commando/Hemi-Commando for Infective Endocarditis

Jose L. Navia, Cleveland, OH

3:48 PM Aortic Root Enlargement

Juan A. Crestanello, Rochester, MN

4:00 PM Addressing Malperfusion First in Type A Dissections

Himarshu J. Patel, Ann Arbor, MI

4:12 PM Durable Right Ventricular Assist Device Implantation

Carmelo A. Milano, Durham, NC

4:24 PM Extracorporeal Membrane Oxygenation With Left Ventricle Venting Strategies

Bryan A. Whitson, Columbus, OH

4:36 PM Axillary Intraaortic Balloon Pump

Val Jeevanandam, Chicago, IL

4:48 PM Minimally Invasive HeartMate III

Igor Gosev, Rochester, NY

1:00 PM – 5:00 PM

Patient Safety Symposium: Innovation and Safety in the Digital Era—From EHRs to Cybersecurity

When building a "culture of safety," one often thinks of the leadership and organizational aspects (eg, teamwork training, blame-free environment, medication errors, and root cause analysis). But digital innovations such as electronic health records (EHRs) and cybersecurity are having a growing impact on patient safety. EHRs have generated challenges for providers, specifically in regard to the user interface and availability of performance metrics. Also relevant is hospital cybersecurity as it relates to patient privacy and medical equipment/device security. Cardiothoracic surgeons and all those working in the field need to better understand the current state and future of telehealth in the health care spectrum.

Learning Objectives

Upon completion of this activity, participants should be able to:

- Explain the effect of EHRs on patient safety, performance metrics, and health care delivery
- Discuss the current status and future of cybersecurity, patient privacy, and safety in health care
- Describe the effectiveness and limitations of telehealth/telemedicine now and in the future

MODERATORS: Steven D. Harrington, Clinton Township, MI, and Garrett L. Walsh, Houston, TX

1:00 PM Introduction

1:10 PM Technological Innovation and Medicine: Where Are We Going?

Anthony Chang, Orange, CA

1:45 PM Cybersecurity or Cyber-Insecurity

John Frenzel, Houston, TX

2:20 PM Performance Metrics: Do They Help or Hurt?

Jeffrey B. Rich, Cleveland, OH

2:55 PM Break

3:10 PM Electronic Health Records: The Good and the Bad

J. Michael DiMaio, Dallas, TX

3:45 PM Telehealth in Surgery: Now and the Future

Kevin W. Lobdell, Charlotte, NC

4:20 PM Panel Discussion

REGISTRATION

Participate in one of the largest cardiothoracic surgery meetings in the world. Register today for the STS Annual Meeting. The earlier you register, the more you save. You must register for the meeting in order to reserve housing at the STS Annual Meeting rate.

Registration and housing are available online only at stс.org/annualmeeting.

Important Dates
Early Bird Registration Deadline . . . . . . . . . . . . November 19, 2018
Hotel Reservation Deadline . . . . . . . . . . . . January 3, 2019
Standard Registration Deadline . . . . . . . . . . . . January 24, 2019

Questions?
Contact Experient, the Society’s official registration partner.
Toll free: 800-424-5249
International callers: 00-1-847-996-5829
Email: stс@experient-inc.com

REGISTRATION CATEGORIES
Registration is open to everyone with an interest in cardiothoracic surgery. Please note that STS members are NOT automatically registered for the Annual Meeting.

STS Surgeon Members: STS Active, International, and Senior Members

STS Associate Member Physicians (Non-CT Surgeons): STS member physicians with an interest in cardiothoracic surgery who are not eligible to become Active, International, Candidate, or Pre-Candidate Members

STS Associate Member Non-Physicians: STS members who are PhD research scientists, physician assistants, perfusionists, nurses, nurse practitioners, practice administrators, data managers, and others with an interest in cardiothoracic surgery

STS Pre-Candidate and Candidate Members: Pre-Candidate: Medical students and general surgery residents who are STS members. Candidate: Cardiothoracic surgery residents/fellows/trainees who are STS members

Non-Member Physicians: Non-member cardiothoracic surgeons and other physicians with an interest in cardiothoracic surgery

Non-Member PhD research scientists, physician assistants, perfusionists, nurses, nurse practitioners, practice administrators, data managers, and others with an interest in cardiothoracic surgery

Non-Member Residents, Fellows, and Medical Students: In order to register for the STS 55th Annual Meeting, non-member general surgery residents and cardiothoracic surgery residents/fellows must complete a registration certification form during the online registration process. Non-member medical students must upload a copy of their current student identification card to the registration website.

SEPARATE REGISTRATIONS
Tech-Con 2019 and the STS 55th Annual Meeting require separate registrations.

TECH-CON
Saturday, Jan. 26
Registration includes access to:
• Tech-Con educational sessions
• Tech-Con exhibits

ANNUAL MEETING
Sunday, Jan. 27 – Tuesday, Jan. 29
Registration includes access to:
• Annual Meeting educational sessions
• Annual Meeting Exhibit Hall and Opening Reception
• 2019 Annual Meeting Online

Important Dates
Early Bird Registration Deadline . . . . . . . . . . . . November 19, 2018
Hotel Reservation Deadline . . . . . . . . . . . . January 3, 2019
Standard Registration Deadline . . . . . . . . . . . . January 24, 2019

Questions?
Contact Experient, the Society’s official registration partner.
Toll free: 800-424-5249
International callers: 00-1-847-996-5829
Email: stс@experient-inc.com

CANCELLATION POLICY
All registration cancelation requests must be made in writing and emailed to meetings@sts.org by January 18, 2019. Requests for refunds will not be honored if submitted after that date. A processing fee of $100 will be charged for all cancelations.

BECOME AN STS MEMBER – SAVE ON REGISTRATION!
If you are not an STS member, you can gain numerous benefits and savings by becoming an STS member before you register for the Annual Meeting.

Applications for Associate, Candidate, or Pre-Candidate Membership must be submitted by Monday, January 7, 2019, to allow time for processing. Those approved for membership will receive reduced registration rates for the STS 55th Annual Meeting and Tech-Con.

That's not all...
STS membership also includes:
• Complimentary subscriptions to the Society’s prestigious peer-reviewed journal, The Annals of Thoracic Surgery, and STS newsletters
• Deep discounts on educational activities, special symposia, and online learning
• Eligibility for discounted STS National Database participation fees
• Opportunities to participate on STS governance bodies that help develop and implement programs to advance the interests of the specialty
• Networking with the largest group of cardiothoracic surgeons worldwide

For membership information and a link to the online application, visit stс.org/membership or contact Sarah Foreman, Senior Coordinator, Member Services, at sforeman@sts.org.

TICKETED EVENTS

STS UNIVERSITY
Sunday, January 27
8:00 AM – 9:45 AM (Session I)
10:15 AM – 12:00 PM (Session II)

Don’t wait until you arrive in San Diego to reserve your spot at STS University, a popular series of hands-on learning activities. When you’re registering for the meeting online, make sure to choose the STS University courses that you’d like to attend so that you get your first choices—courses sell out!

Please note: STS U courses will now be held on Sunday morning, January 27, rather than on Wednesday morning, so that busy professionals can get back to their practices.

Each course will exclusively feature hands-on experience in a wet lab or on a simulator—no didactic lectures will be given during the sessions. See pages 9-12 for a description of the courses available, and sign up today!

PRESIDENT’S RECEPTION
Sunday, January 27
7:00 PM – 10:00 PM

Join your colleagues for the STS President's Reception at the celebrated Hotel del Coronado on Sunday evening, January 27. Set on picturesque Coronado Island, just off the San Diego coastline, this National Historic Landmark hotel was built in 1888 and has been a popular destination for visiting celebrities, presidents, and dignitaries.

The reception will be held in the Crown Room, an elegant space with a 33-foot domed ceiling made from Oregon sugar pine and crown-shaped chandeliers designed by L. Frank Baum, author of The Wonderful Wizard of Oz. Several notable events have been held in the Crown Room, including a celebration for Charles Lindbergh following his solo transatlantic flight. The resort also served as the backdrop for movies, including “Some Like It Hot,” starring Marilyn Monroe, Tony Curtis, and Jack Lemmon.

Don’t miss this opportunity to enjoy dinner, drinks, and conversation in a historic setting. Purchase a ticket when registering for the meeting at sts.org/annualmeeting.
ARRIVE EARLY

TECH-CON
Saturday, January 26
Stay ahead of the curve when it comes to cutting-edge developments in cardiothoracic surgery by attending Tech-Con, which will be held immediately prior to the Annual Meeting on Saturday, January 26. The 2019 program will feature technologies anticipated to be available in the next 1-3 years, as well as innovative, off-label, and outside-the-box techniques that address complex problems.

The adult cardiac sessions will explore advancements in ischemic disease, heart failure, atrial fibrillation surgery, and aortic and structural heart disease. Attendees at the general thoracic sessions can expect to learn about evolutions in lung and chest wall surgeries, as well as esophageal surgery.

An expanded general session will feature a keynote lecture on the role of artificial intelligence in medical technology. Two exciting debates will consider whether coronary revascularization should be performed only by dedicated coronary artery bypass grafting surgeons and whether peroral endoscopic myotomy should replace laparoscopic Heller myotomy.

The day will conclude with the popular Shark Tank presentations, in which inventors pitch their ideas to a panel of experts and the audience. Devices on deck for discussion include a leakproof aortic anastomosis stapler and a valveless pulsatile-flow ventricular assist device. See pages 7-8 for detailed agendas.

Don’t miss this opportunity to see what’s coming down the pipeline. Tech-Con registration is separate from Annual Meeting registration, so make sure to register for both.

CODING WORKSHOP
Friday, January 25 – Saturday, January 26
Make your Annual Meeting plans early so that you and your team can attend the STS Coding Workshop, which will be held on Friday, January 25, and Saturday, January 26, at the Marriott Marquis San Diego Marina.

Cardiothoracic surgery coders, surgeons, and other billing professionals will learn about the latest coding and reimbursement updates affecting their practices. Sessions will cover new and revised codes specific to cardiothoracic surgery, with concentrations in adult cardiac surgery, congenital heart surgery, general thoracic surgery, and vascular surgery.

The program also will focus on reimbursement issues affecting the specialty as a whole, including global services, modifiers, bundling, evaluation and management (E/M) coding, and alternative payment models. The workshop will conclude with a special session on the physician’s role in documentation and reimbursement.

See the full agenda and register yourself and/or your billing manager at sts.org/codingworkshop.
MEETING LOCATION
All educational programming for the STS 55th Annual Meeting and Tech-Con 2019 will take place at the San Diego Convention Center.

San Diego Convention Center
111 W. Harbor Dr.
San Diego, CA 92101
619-525-5000
visitsandiego.com

STS HOTELS
The Society has negotiated with local San Diego hotels to offer exclusive discounted rates to STS Annual Meeting attendees. Making your reservation through the official STS room blocks helps the Society continue to leverage the best possible pricing for its members.

You must register for the Annual Meeting before you can reserve your housing. You can do both at sts.org/annualmeeting. The deadline to receive discounted room rates is Thursday, January 3, 2019.

The Society has engaged Experient as the only approved Official Registration and Housing Provider for the STS Annual Meeting. Please be wary of any other companies ostensibly offering registration and/or housing assistance for the STS Annual Meeting. Such companies typically imply that they are working with STS, but in reality are unauthorized. Please contact the Meetings & Conventions Department at meetings@sts.org if you are contacted by anyone other than Experient.

Questions?
Contact Experient, the Society’s official housing partner.

TRAVEL INFORMATION

AIR TRAVEL
The San Diego International Airport (SAN) is conveniently located approximately 3 miles from the San Diego Convention Center and all official STS hotels.

GROUND TRANSPORTATION
Car Rental
STS has negotiated special car rental rates from Hertz. Reservations may be placed at hertz.com or by calling 800-654-2240 from within the United States and Canada; from international locations, call 00-1-405-749-4434. To receive the discounted STS rate, reference convention number (CV#) 04XS0007 when making your reservation. Parking at the San Diego Convention Center ranges from $15 to $35 per day.

Taxis/Ride Shares
To hail a taxi upon arrival at SAN, follow the signs leading to the Transportation Plazas across from Terminals 1 and 2. A customer service representative will place you in the first available taxi. The approximate one-way cost to the hotels or convention center is $20. Uber, Lyft, and other ride share companies also pick up in the Transportation Plazas. Follow signage to the designated pickup lanes.

Shuttle Service / Private Car
Airport shuttle and private car services are available through SuperShuttle. Shuttle service can be accessed from the Transportation Plazas and costs approximately $8 per person from SAN to the official STS hotels. Private car service is approximately $40 one way. For reservations, call 800-9-SHUTTLE (800-974-8885) or visit supershuttle.com.

For International Attendees

ACT NOW TO OBTAIN YOUR VISA
If you plan to attend the STS Annual Meeting, advance planning is critical! Attendees from outside the United States may need to apply for a visa at the American embassy, consulate, or other visa-issuing office in their country of origin. Please begin your visa application process as soon as possible. Learn more at travel.state.gov.

If you need a personalized letter of invitation, visit sts.org/annualmeeting and complete the Letter of Invitation Request Form. Once you have submitted the form, STS will email a personalized letter of invitation to you within 1 business week. Please note: STS cannot promise that you or your colleagues will receive a visa, nor can it change the decision of any governmental agency should your application be denied.

ABOUT SAN DIEGO AND THE UNITED STATES
Even for the seasoned traveler, a trip may require some advance planning. Learn more about essential information, helpful travel tips, and answers to common questions at these websites:
sandiego.org (San Diego Tourism Authority)
visitsandiego.com (San Diego Convention Center)
san.org (San Diego International Airport)
travel.state.gov (US State Department)
