

STS Congenital Heart Surgery Database Data Specifications

Itemized list of changes between version 3.3 and version 3.41

This document current as of: 10/14/2018 4:30:32 PM

30 **On-Demand Files Version Number** ShortName: OnDemandVrsn

Detail changed:	Changed from:	Changed to:
		Field no longer being collected
Harvest	Yes	No

202 **Born By IVF** ShortName: BornByIVF

Detail changed:	Changed from:	Changed to:
Core	<Blank>	Yes
DataSource	<Blank>	User
DBTableName	<Blank>	Demographics
Definition	<Blank>	Indicate whether the patient was conceived by in vitro fertilization.
Harvest	<Blank>	Yes
LongName	<Blank>	Born By IVF
ShortName	<Blank>	BornByIVF
VendorDataType	<Blank>	Text (categorical values specified by STS)
HarvestCode=1	<blank>	<New choice added> Yes
HarvestCode=2	<blank>	<New choice added> No

203 **Patient Adopted** ShortName: PatientAdopted

Detail changed:	Changed from:	Changed to:
Core	<Blank>	Yes
DataSource	<Blank>	User
DBTableName	<Blank>	Demographics
Definition	<Blank>	Indicate whether the patient is adopted by the current legal guardians/parents.
Harvest	<Blank>	Yes
LongName	<Blank>	Patient Adopted
ShortName	<Blank>	PatientAdopted
VendorDataType	<Blank>	Text (categorical values specified by STS)

HarvestCode=1	<blank>	<New choice added> Yes
HarvestCode=2	<blank>	<New choice added> No

209 **Born at Home** ShortName: BornHome

Detail changed:	Changed from:	Changed to:
Core	<Blank>	Yes
DataSource	<Blank>	User
DBTableName	<Blank>	Demographics
Definition	<Blank>	Indicate whether the patient was born at home.
Harvest	<Blank>	Yes
LongName	<Blank>	Born at Home
ParentHarvestCodes	<Blank>	1
ParentShortName	<Blank>	BirthLocKnown
ParentValue	<Blank>	= "Yes"
ShortName	<Blank>	BornHome
VendorDataType	<Blank>	Text (categorical values specified by STS)
HarvestCode=1	<blank>	<New choice added> Yes
HarvestCode=2	<blank>	<New choice added> No

210 **Hospital Name Known** ShortName: HospNameKnown

Detail changed:	Changed from:	Changed to:
Core	<Blank>	Yes
DataSource	<Blank>	User
DBTableName	<Blank>	Demographics
Definition	<Blank>	Indicate whether the name of the hospital is known.
Harvest	<Blank>	Yes
LongName	<Blank>	Hospital Name Known
ParentHarvestCodes	<Blank>	2
ParentShortName	<Blank>	BornHome
ParentValue	<Blank>	= "No"
ShortName	<Blank>	HospNameKnown

VendorDataType	<Blank>	Text (categorical values specified by STS)
HarvestCode=1	<blank>	<New choice added> Yes
HarvestCode=2	<blank>	<New choice added> No

211 **Birth Hospital Name** ShortName: BirthHospName

Detail changed:	Changed from:	Changed to:
Core	<Blank>	Yes
DataSource	<Blank>	User
DBTableName	<Blank>	Demographics
Definition	<Blank>	Indicate the name of the hospital where the patient was born.
Harvest	<Blank>	Yes
LongName	<Blank>	Birth Hospital Name
ParentHarvestCodes	<Blank>	1
ParentShortName	<Blank>	HospNameKnown
ParentValue	<Blank>	= "Yes"
ShortName	<Blank>	BirthHospName
VendorDataType	<Blank>	Text (categorical values specified by User)

212 **Birth Hospital TIN** ShortName: BirthHospTIN

Detail changed:	Changed from:	Changed to:
Core	<Blank>	Yes
DataSource	<Blank>	User
DBTableName	<Blank>	Demographics
Definition	<Blank>	Indicate the Taxpayer Identification Number for the hospital where the patient was born. This field will be blank for Non-US participants
Harvest	<Blank>	Yes
LongName	<Blank>	Birth Hospital TIN
ParentHarvestCodes	<Blank>	1
ParentShortName	<Blank>	HospNameKnown
ParentValue	<Blank>	= "Yes"
ShortName	<Blank>	BirthHospTIN
VendorDataType	<Blank>	Text (categorical values specified by User)

290	Mother's National Identification (Social Security Number) Known		ShortName: MatSSNKnown
	Detail changed:	Changed from:	Changed to:
	LongName	Mother's National Identification (Social Security Number) Known	Mother's National Identification (Social Security Number) Known
300	Mother's National Identification (Social Security Number)		ShortName: MatSSN
	Detail changed:	Changed from:	Changed to:
	LongName	Mother's National Identification (Social Security Number)	Mother's National Identification (Social Security Number)
340	Sex At Birth		ShortName: Gender
	Detail changed:	Changed from:	Changed to:
	LongName	Gender	Sex At Birth
370	Gestational Age At Birth In Weeks		ShortName: GestAgeWeeks
	Detail changed:	Changed from:	Changed to:
	Definition	Indicate the patient's estimated gestational age at birth in weeks. This field is a required field for neonates and infants and is an optional field for children and adults.	Indicate the number of full weeks in the patient's estimated gestational age at birth. This field is a required field for neonates and infants and is an optional field for children and adults.
371	Gestational Age at Birth In Days		ShortName: GestAgeDays
	Detail changed:	Changed from:	Changed to:
	Core	<Blank>	Yes
	DataSource	<Blank>	User
	DBTableName	<Blank>	Demographics
	Definition	<Blank>	Indicate the number of additional days in the patient's estimated gestational age at birth. (Example, 36 weeks, 5 days.) This field is a required field for neonates and infants and is an optional field for children and adults.
	Harvest	<Blank>	Yes
	LongName	<Blank>	Gestational Age at Birth In Days
	ParentHarvestCodes	<Blank>	1
	ParentShortName	<Blank>	GestAgeKnown
	ParentValue	<Blank>	= "Yes"
	ShortName	<Blank>	GestAgeDays
	VendorDataType	<Blank>	Text (categorical values specified by STS)
	HarvestCode=0	<blank>	<New choice added> 0

HarvestCode=1	<blank>	<New choice added> 1
HarvestCode=2	<blank>	<New choice added> 2
HarvestCode=3	<blank>	<New choice added> 3
HarvestCode=4	<blank>	<New choice added> 4
HarvestCode=5	<blank>	<New choice added> 5
HarvestCode=6	<blank>	<New choice added> 6
HarvestCode=9	<blank>	<New choice added> Unknown

375 **Pregnancy Related Complications** ShortName: PregComplications

Detail changed:	Changed from:	Changed to:
Core	<Blank>	Yes
DataSource	<Blank>	User
DBTableName	<Blank>	Demographics
Definition	<Blank>	Indicate whether the mother had any pregnancy-related complications.
Harvest	<Blank>	Yes
LongName	<Blank>	Pregnancy Related Complications
ShortName	<Blank>	PregComplications
VendorDataType	<Blank>	Text (categorical values specified by STS)
HarvestCode=1	<blank>	<New choice added> Yes
HarvestCode=2	<blank>	<New choice added> No
HarvestCode=3	<blank>	<New choice added> Unknown

377 **Pre-Eclampsia** ShortName: PregCompPreE

Detail changed:	Changed from:	Changed to:
Core	<Blank>	Yes
DataSource	<Blank>	User
DBTableName	<Blank>	Demographics
Definition	<Blank>	Indicate whether the mother had pre-eclampsia.
Harvest	<Blank>	Yes

LongName	<Blank>	Pre-Eclampsia
ParentHarvestCodes	<Blank>	1
ParentShortName	<Blank>	PregComplications
ParentValue	<Blank>	= "Yes"
ShortName	<Blank>	PregCompPreE
VendorDataType	<Blank>	Text (categorical values specified by STS)
HarvestCode=1	<blank>	<New choice added> Yes
HarvestCode=2	<blank>	<New choice added> No
HarvestCode=3	<blank>	<New choice added> Unknown

378 **Gestational Diabetes (GDM)** ShortName: PregCompGestDM

Detail changed:	Changed from:	Changed to:
Core	<Blank>	Yes
DataSource	<Blank>	User
DBTableName	<Blank>	Demographics
Definition	<Blank>	Indicate whether the mother had gestational diabetes.
Harvest	<Blank>	Yes
LongName	<Blank>	Gestational Diabetes (GDM)
ParentHarvestCodes	<Blank>	1
ParentShortName	<Blank>	PregComplications
ParentValue	<Blank>	= "Yes"
ShortName	<Blank>	PregCompGestDM
VendorDataType	<Blank>	Text (categorical values specified by STS)
HarvestCode=1	<blank>	<New choice added> Yes
HarvestCode=2	<blank>	<New choice added> No
HarvestCode=3	<blank>	<New choice added> Unknown

379 **Hypertension** ShortName: PregCompHTN

Detail changed:	Changed from:	Changed to:
Core	<Blank>	Yes
DataSource	<Blank>	User

DBTableName	<Blank>	Demographics
Definition	<Blank>	Indicate whether the mother had hypertension during pregnancy.
Harvest	<Blank>	Yes
LongName	<Blank>	Hypertension
ParentHarvestCodes	<Blank>	1
ParentShortName	<Blank>	PregComplications
ParentValue	<Blank>	= "Yes"
ShortName	<Blank>	PregCompHTN
VendorDataType	<Blank>	Text (categorical values specified by STS)
HarvestCode=1	<blank>	<New choice added> Yes
HarvestCode=2	<blank>	<New choice added> No
HarvestCode=3	<blank>	<New choice added> Unknown

380 **HELLPP Syndrome** ShortName: PregCompHELLPP

Detail changed:	Changed from:	Changed to:
Core	<Blank>	Yes
DataSource	<Blank>	User
DBTableName	<Blank>	Demographics
Definition	<Blank>	Indicate whether the mother had HELLP Syndrome (HELLP stands for H- hemolysis, EL-elevated liver enzymes, LP – low platelet counts).
Harvest	<Blank>	Yes
LongName	<Blank>	HELLPP Syndrome
ParentHarvestCodes	<Blank>	1
ParentShortName	<Blank>	PregComplications
ParentValue	<Blank>	= "Yes"
ShortName	<Blank>	PregCompHELLPP
VendorDataType	<Blank>	Text (categorical values specified by STS)
HarvestCode=1	<blank>	<New choice added> Yes
HarvestCode=2	<blank>	<New choice added> No
HarvestCode=3	<blank>	<New choice added> Unknown

381

Polyhydramnios

ShortName: PregCompPolyhydra

Detail changed:	Changed from:	Changed to:
Core	<Blank>	Yes
DataSource	<Blank>	User
DBTableName	<Blank>	Demographics
Definition	<Blank>	Indicate whether the mother had polyhydramnios.
Harvest	<Blank>	Yes
LongName	<Blank>	Polyhydramnios
ParentHarvestCodes	<Blank>	1
ParentShortName	<Blank>	PregComplications
ParentValue	<Blank>	= "Yes"
ShortName	<Blank>	PregCompPolyhydra
VendorDataType	<Blank>	Text (categorical values specified by STS)
HarvestCode=1	<blank>	<New choice added> Yes
HarvestCode=2	<blank>	<New choice added> No
HarvestCode=3	<blank>	<New choice added> Unknown

382

Oligohydramnios

ShortName: PregCompOligohydra

Detail changed:	Changed from:	Changed to:
Core	<Blank>	Yes
DataSource	<Blank>	User
DBTableName	<Blank>	Demographics
Definition	<Blank>	Indicate whether the mother had oligohydramnios.
Harvest	<Blank>	Yes
LongName	<Blank>	Oligohydramnios
ParentHarvestCodes	<Blank>	1
ParentShortName	<Blank>	PregComplications
ParentValue	<Blank>	= "Yes"
ShortName	<Blank>	PregCompOligohydra
VendorDataType	<Blank>	Text (categorical values specified by STS)

HarvestCode=1	<blank>	<New choice added> Yes
HarvestCode=2	<blank>	<New choice added> No
HarvestCode=3	<blank>	<New choice added> Unknown

383 **Hydrops** ShortName: PregCompHydrops

Detail changed:	Changed from:	Changed to:
Core	<Blank>	Yes
DataSource	<Blank>	User
DBTableName	<Blank>	Demographics
Definition	<Blank>	Indicate whether the mother had Hydrops.
Harvest	<Blank>	Yes
LongName	<Blank>	Hydrops
ParentHarvestCodes	<Blank>	1
ParentShortName	<Blank>	PregComplications
ParentValue	<Blank>	= "Yes"
ShortName	<Blank>	PregCompHydrops
VendorDataType	<Blank>	Text (categorical values specified by STS)
HarvestCode=1	<blank>	<New choice added> Yes
HarvestCode=2	<blank>	<New choice added> No
HarvestCode=3	<blank>	<New choice added> Unknown

384 **Other Pregnancy-Related Complications** ShortName: PregCompOther

Detail changed:	Changed from:	Changed to:
Core	<Blank>	Yes
DataSource	<Blank>	User
DBTableName	<Blank>	Demographics
Definition	<Blank>	Indicate whether the mother had other pregnancy related complications.
Harvest	<Blank>	Yes
LongName	<Blank>	Other Pregnancy-Related Complications
ParentHarvestCodes	<Blank>	1

ParentShortName	<Blank>	PregComplications
ParentValue	<Blank>	= "Yes"
ShortName	<Blank>	PregCompOther
VendorDataType	<Blank>	Text (categorical values specified by STS)
HarvestCode=1	<blank>	<New choice added> Yes

HarvestCode=3	<blank>	<New choice added> Unknown

530

Major Noncardiac Abnormality

ShortName: NCAA

Detail changed:	Changed from:	Changed to:
HarvestCode=20 - Description	Major abnormality of abdominal wall, Congenital diaphragmatic hernia (CDH)	Major abnormality of diaphragm, Congenital diaphragmatic hernia (CDH), Bochdalek hernia
HarvestCode=110	Major abnormality of head	<choice was deleted>
HarvestCode=130	Major abnormality of brain, Macrocephaly	<choice was deleted>
HarvestCode=140	Major abnormality of brain, Microcephaly	<choice was deleted>
HarvestCode=150	Major abnormality of brain	<choice was deleted>
HarvestCode=180	Major abnormality of spinal cord	<choice was deleted>
HarvestCode=200	Major abnormality of spine	<choice was deleted>
HarvestCode=250	Major abnormality of larynx - trachea - or bronchus	<choice was deleted>
HarvestCode=300	Major abnormality of lung	<choice was deleted>
HarvestCode=340 - Description	Major abnormality of gastrointestinal system, Jejunal atresia	Major abnormality of gastrointestinal system, Jejunal atresia
HarvestCode=350 - Description	Major abnormality of gastrointestinal system, Jejunal stenosis	Major abnormality of gastrointestinal system, Jejunal stenosis
HarvestCode=420	Major abnormality of gastrointestinal system	<choice was deleted>
HarvestCode=430	Major abnormality of kidney - ureter - or bladder	<choice was deleted>
HarvestCode=440	<blank>	<New choice added> Major abnormality of head, Craniosynostosis
HarvestCode=450	<blank>	<New choice added> Major abnormality of head, Macrocephaly
HarvestCode=460	<blank>	<New choice added> Major abnormality of head, Microcephaly
HarvestCode=470	<blank>	<New choice added> Major abnormality of head, Micrognathia
HarvestCode=480	<blank>	<New choice added> Major abnormality of brain, Tuberous sclerosis

HarvestCode=490	<blank>	<New choice added> Major abnormality of larynx - trachea - or bronchus, Laryngeal cleft
HarvestCode=500	<blank>	<New choice added> Major abnormality of chest wall, Pectus carinatum
HarvestCode=510	<blank>	<New choice added> Major abnormality of chest wall, Pectus excavatum
HarvestCode=520	<blank>	<New choice added> Major abnormality of lung, Alveolar capillary dysplasia
HarvestCode=530	<blank>	<New choice added> Major abnormality of lung, Hypoplastic lung
HarvestCode=540	<blank>	<New choice added> Major abnormality of gastrointestinal system, Esophageal atresia
HarvestCode=550	<blank>	<New choice added> Major abnormality of gastrointestinal system, Pyloric stenosis
HarvestCode=560	<blank>	<New choice added> Major abnormality of genitalia, Ambiguous genitalia
HarvestCode=570	<blank>	<New choice added> Major abnormality of genitalia, Hypospadias
HarvestCode=580	<blank>	<New choice added> Major abnormality of genitalia, Rectovaginal fistula
HarvestCode=590	<blank>	<New choice added> Major abnormality of genitalia, Undescended testis
HarvestCode=600	<blank>	<New choice added> Major abnormality of kidney, Horseshoe kidney
HarvestCode=610	<blank>	<New choice added> Major abnormality of kidney, Hydronephrosis
HarvestCode=620	<blank>	<New choice added> Major abnormality of kidney, Polycystic kidney
HarvestCode=630	<blank>	<New choice added> Major abnormality of kidney, Single kidney
HarvestCode=640	<blank>	<New choice added> Major abnormality of vertebra, Hemi-vertebrae
HarvestCode=650	<blank>	<New choice added> Major abnormality of vertebra, Butterfly vertebrae
HarvestCode=660	<blank>	<New choice added> Major abnormality of spinal cord, Tethered cord

570

Chromosomal Abnormality

ShortName: ChromAb

Detail changed:	Changed from:	Changed to:
HarvestCode=5 - Definition	This patient has no chromosomal abnormality identified.	<blank>
HarvestCode=5 - Description	No chromosomal abnormality identified	No chromosomal or genetic abnormality identified

HarvestCode=90 - Definition	Deletions or mutations involving the long arm of chromosome 22 (critical region 22q11.2) are associated with the DiGeorge sequence, velocardiofacial syndrome, conotruncal face anomaly syndrome, CATCH 22, and some isolated conotruncal malformations.	<blank>
HarvestCode=120 - Definition	Turner syndrome (45XO) is a chromosomal deletion abnormality, which occurs in 1:5000 live female births. Although common in first trimester, most 45XO conceptuses are spontaneously aborted. Affected individuals are missing one X chromosome. The major features include short stature, primary amenorrhea due to ovarian dysgenesis, webbed neck, congenital lymphedema, and cubitus valgus. Cardiovascular abnormalities occur in 20-40% of cases, the most common of which is coarctation of the aorta (70%). Additional defects include bicommissural aortic valve, aortic stenosis, a spectrum of left-sided obstructive defects and/or hypoplastic defects, hypoplastic left heart syndrome; aortic dilation, dissection, and rupture.	<blank>
HarvestCode=130 - Definition	Klinefelter, or 47XXY syndrome, is a sporadic chromosomal abnormality in which males have at least two X chromosomes and at least one Y chromosome. Incidence is 1:500 males or 1:1000 births. Klinefelter syndrome occurs usually in association with advanced maternal age at conception. It is the most common sex chromosome disorder and the most common cause of hypogonadism and infertility. Cardiovascular abnormalities in more than 50% of cases include mitral valve prolapse, varicose veins and deep venous thrombosis.	<blank>
HarvestCode=140	4p	<choice was deleted>
HarvestCode=160	5p	<choice was deleted>
HarvestCode=190	7q11.23	<choice was deleted>
HarvestCode=230	<blank>	<New choice added> Monosomy X
HarvestCode=240	TGFBFR1 or 2	<choice was deleted>
HarvestCode=250 - Definition	Trisomy 8, or Warkany syndrome, is a chromosomal abnormality, which is a frequent cause of first trimester spontaneous abortions. Complete Trisomy 8 is usually an early lethal disorder. Incidence is 1:25,000-50,000 births. Affected individuals have an extra (or third) copy of chromosome 8. Cardiovascular abnormalities include septal defects and great vessel anomalies.	<blank>
HarvestCode=260 - Definition	Trisomy 9, or Rethore syndrome, is a rare chromosomal abnormality, which is a frequent cause of first trimester spontaneous abortions. Incidence is 1:100,000 births. Affected individuals have an extra (or third) copy of chromosome 9. Most affected individuals die during infancy or early childhood. Cardiovascular abnormalities occur in 75% of cases and include VSD, ASD, PDA, valve defects, DORV, persistent left SVC, and endocardial fibroelastosis.	<blank>

HarvestCode=270 - Definition	Patau or Bartholin-Patau syndrome, or Trisomy 13, is a chromosomal abnormality. Incidence is 1:5000-10,000 births. Sporadic cases occur usually in association with advanced maternal age at conception. Affected individuals have an extra (or third) copy of chromosome 13. More than 90% of individuals with Trisomy 13 die within their first days or weeks of life. Only 5-10% survive beyond 1 year of age. Cardiovascular abnormalities in 80% of cases include VSD, PDA, ASD; dextrocardia in more than 50% of cases; and anomalous pulmonary venous connection, overriding aorta, pulmonary stenosis, hypoplastic aorta, mitral valve atresia, aortic valve atresia, and bicuspid aortic valve in fewer than 50% of cases.	<blank>
HarvestCode=280 - Definition	Edwards syndrome, or Trisomy 18, is a chromosomal abnormality. Incidence is 1:3000-5000 births. Sporadic cases of Edwards syndrome occur usually in association with advanced maternal age at conception. Affected individuals have an extra (or third) copy of chromosome 18. Approximately 50% of infants with Trisomy 18 die within the first week of life, approximately 40% die within the first month of life, only 5-10% survive beyond the first year. Cardiovascular abnormalities in more than 50% of cases include VSD, ASD and PDA; bicuspid aortic and/or pulmonary valves, nodularity of valve leaflets, pulmonic stenosis, coarctation of the aorta in 10-50% of cases; and anomalous coronary artery, TGA, TOF, dextrocardia and aberrant subclavian artery in less than 10% of cases.	<blank>
HarvestCode=290 - Definition	Down syndrome, or Trisomy 21, is the most frequent chromosomal abnormality. Incidence is 1:600-1000 live births. Sporadic cases of Down syndrome occur in strong association with advanced maternal age at conception. Affected individuals have an extra (or third) copy of chromosome 21. Cardiovascular abnormalities in 40-50% of cases, in decreasing order of frequency, include AVSD, VSD, TOF and PDA. Left-sided obstructive defects, such as coarctation and aortic valve stenosis, are rare.	<blank>
HarvestCode=310 - Definition	This patient has other chromosomal abnormality(ies) that are not on this list.	<blank>
HarvestCode=310 - Description	Other chromosomal abnormality	Other chromosomal or genetic abnormality

HarvestCode=2180	<blank>	<New choice added> Hybrid Approach "Stage 1", Stent placement in arterial duct (PDA) + application of RPA & LPA bands
HarvestCode=3160	<blank>	<New choice added> Kawashima operation (superior cavopulmonary connection in setting of interrupted IVC with azygous continuation)

949 **Procedure-Specific Factors - Apical VSD** ShortName: PSFApicalVSD

Detail changed:	Changed from:	Changed to:
Definition	Indicate whether Apical VSD was a factor.	Indicate whether Apical VSD was present.
ParentHarvestCodes	100 110 120 1120 1125	100 110 120 130 1120 1125
ParentValue	= "VSD repair, Primary closure", "VSD repair, Patch", "VSD repair, Device", "Arterial switch operation (ASO) and VSD repair" or "Arterial switch procedure and VSD repair + Aortic arch repair"	= "VSD repair, Primary closure", "VSD repair, Patch", "VSD repair, Device", "VSD, Multiple, Repair", "Arterial switch operation (ASO) and VSD repair" or "Arterial switch procedure and VSD repair + Aortic

950 **Procedure-Specific Factors - Straddling AV valve** ShortName: PSFStradAVVal

Detail changed:	Changed from:	Changed to:
Definition	Indicate whether Straddling AV valve was a factor.	Indicate whether Straddling AV valve was present.
ParentHarvestCodes	100 110 120 1120 1125	100 110 120 130 1120 1125
ParentValue	= "VSD repair, Primary closure", "VSD repair, Patch", "VSD repair, Device", "Arterial switch operation (ASO) and VSD repair" or "Arterial switch procedure and VSD repair + Aortic arch repair"	= "VSD repair, Primary closure", "VSD repair, Patch", "VSD repair, Device", "VSD, Multiple, Repair", "Arterial switch operation (ASO) and VSD repair" or "Arterial switch procedure and VSD repair + Aortic

951 **Procedure-Specific Factors - Major coronary crossing RVOT - Coronary anomaly restricting RVOT enlargement, (LAD from RCA etc.)** ShortName: PSFMajCorRVOT

Detail changed:	Changed from:	Changed to:
Definition	Indicate whether Major coronary crossing RVOT - Coronary anomaly restricting RVOT enlargement, (LAD from RCA etc.) was a factor.	Indicate whether Major coronary crossing RVOT - Coronary anomaly restricting RVOT enlargement, (LAD from RCA etc.) was present.
ParentValue	= "TOF - AVC (AVSD) repair", "TOF repair, No ventriculotomy", "TOF repair, Ventriculotomy, Nontransanular patch", "TOF repair, Ventriculotomy, Transanular patch", "TOF repair, RV-PA conduit", "TOF - Absent pulmonary valve repair", "Pulmonary atresia	= "TOF - AVC (AVSD) repair", "TOF repair, No ventriculotomy", "TOF repair, Ventriculotomy, Nontransanular patch", "TOF repair, Ventriculotomy, Transanular patch", "TOF repair, RV-PA conduit", "TOF - Absent pulmonary valve repair", "Pulmonary atresia - VSD - MAPCA repair, Complete single stage repair (1-stage that includes bilateral pulmonary unifocalization + VSD closure + RV to PA connection [with or without conduit])", "Pulmonary atresia - VSD - MAPCA repair, Status post prior complete unifocalization (includes VSD closure + RV to PA connection [with or without conduit])", "Pulmonary atresia - VSD - MAPCA repair, Status post prior incomplete unifocalization (includes completion of pulmonary unifocalization + VSD closure + RV to PA connection [with or without conduit])" or "Pulmonary atresia - VSD (including TOF, PA) repair"

Procedure-Specific Factors - VSD, Multiple, Repair

ShortName: PSFVSDMultRep

Detail changed:	Changed from:	Changed to:
Definition	Indicate whether VSD, Multiple, Repair was a factor.	Indicate whether VSD, Multiple, Repair was present.
ParentValue	= "TOF - AVC (AVSD) repair", "TOF repair, No ventriculotomy", "TOF repair, Ventriculotomy, Nontransanular patch", "TOF repair, Ventriculotomy, Transanular patch", "TOF repair, RV-PA conduit", "TOF - Absent pulmonary valve repair", "Pulmonary atresia	= "TOF - AVC (AVSD) repair", "TOF repair, No ventriculotomy", "TOF repair, Ventriculotomy, Nontransanular patch", "TOF repair, Ventriculotomy, Transanular patch", "TOF repair, RV-PA conduit", "TOF - Absent pulmonary valve repair", "Pulmonary atresia - VSD - MAPCA repair, Complete single stage repair (1-stage that includes bilateral pulmonary unifocalization + VSD closure + RV to PA connection [with or without conduit])", "Pulmonary atresia - VSD - MAPCA repair, Status post prior complete unifocalization (includes VSD closure + RV to PA connection [with or without conduit])", "Pulmonary atresia - VSD - MAPCA repair, Status post prior incomplete unifocalization (includes completion of pulmonary unifocalization + VSD closure + RV to PA connection [with or without conduit])" or "Pulmonary atresia - VSD (including TOF, PA) repair"

Procedure-Specific Factors - Restrictive VSD

ShortName: PSFRestrictVSD

Detail changed:	Changed from:	Changed to:
Definition	Indicate whether Restrictive VSD was a factor.	Indicate whether Restrictive VSD was present.
ParentValue	= "TOF - AVC (AVSD) repair", "TOF repair, No ventriculotomy", "TOF repair, Ventriculotomy, Nontransanular patch", "TOF repair, Ventriculotomy, Transanular patch", "TOF repair, RV-PA conduit", "TOF - Absent pulmonary valve repair", "Pulmonary atresia	= "TOF - AVC (AVSD) repair", "TOF repair, No ventriculotomy", "TOF repair, Ventriculotomy, Nontransanular patch", "TOF repair, Ventriculotomy, Transanular patch", "TOF repair, RV-PA conduit", "TOF - Absent pulmonary valve repair", "Pulmonary atresia - VSD - MAPCA repair, Complete single stage repair (1-stage that includes bilateral pulmonary unifocalization + VSD closure + RV to PA connection [with or without conduit])", "Pulmonary atresia - VSD - MAPCA repair, Status post prior complete unifocalization (includes VSD closure + RV to PA connection [with or without conduit])", "Pulmonary atresia - VSD - MAPCA repair, Status post prior incomplete unifocalization (includes completion of pulmonary unifocalization + VSD closure + RV to PA connection [with or without conduit])" or "Pulmonary atresia - VSD (including TOF, PA) repair"

Procedure-Specific Factors - Hypoplastic branch pulmonary arteries (diminished pulmonary vascular bed)

ShortName: PSFHypoBrPulmArt

Detail changed:	Changed from:	Changed to:
Definition	Indicate whether Hypoplastic branch pulmonary arteries (diminished pulmonary vascular bed) was a factor.	Indicate whether Hypoplastic branch pulmonary arteries (diminished pulmonary vascular bed) was present.
ParentHarvestCodes	390 350 360 370 380 400 2700 2710 2720 420 1670 1680 1690 1700 2330 2130 950 960 970 980 1000 1010 2780 2790 3310 3320 1030 2340 1025	390 350 360 370 380 400 2700 2710 2720 420 1670 1680 1690 1700 2330 2130 3160 950 960 970 980 1000 1010 2780 2790 3310 3320 1030 2340 1025

956	Procedure-Specific Factors - Double orifice left atrioventricular valve	ShortName: PSFDoubOrif	
	Detail changed:	Changed from:	Changed to:
	Definition	Indicate whether Double orifice left atrioventricular valve was a factor.	Indicate whether Double orifice left atrioventricular valve was present.
957	Procedure-Specific Factors - Single papillary muscle in the left ventricle and/or parachute left atrioventricular valve	ShortName: PSFSingPap	
	Detail changed:	Changed from:	Changed to:
	Definition	Indicate whether Single papillary muscle in the left ventricle and/or parachute left atrioventricular valve was a factor.	Indicate whether Single papillary muscle in the left ventricle and/or parachute left atrioventricular valve was present.
958	Procedure-Specific Factors - Hypoplastic posterior mural leaflet	ShortName: PSFHypoPostMLeaf	
	Detail changed:	Changed from:	Changed to:
	Definition	Indicate whether Hypoplastic posterior mural leaflet was a factor.	Indicate whether Hypoplastic posterior mural leaflet was present.
959	Procedure-Specific Factors - Atrioventricular septal defect with ventricular imbalance: dominant left ventricle, hypoplastic right ventricle	ShortName: PSFASDDomLeft	
	Detail changed:	Changed from:	Changed to:
	Definition	Indicate whether Atrioventricular septal defect with ventricular imbalance: dominant left ventricle and hypoplastic right ventricle was a factor.	Indicate whether Atrioventricular septal defect with ventricular imbalance: dominant left ventricle and hypoplastic right ventricle was present.

960	Procedure-Specific Factors - Atrioventricular septal defect with ventricular imbalance: dominant right ventricle, hypoplastic left ventricle		ShortName: PSFASDDomRight
	Detail changed:	Changed from:	Changed to:
	Definition	Indicate whether Atrioventricular septal defect with ventricular imbalance: dominant right ventricle and hypoplastic left ventricle was a factor.	Indicate whether Atrioventricular septal defect with ventricular imbalance: dominant right ventricle and hypoplastic left ventricle was present.
961	Procedure-Specific Factors - Common atrioventricular valve with unbalanced commitment of valve to left ventricle		ShortName: PSFCAVLeft
	Detail changed:	Changed from:	Changed to:
	Definition	Indicate whether Common atrioventricular valve with unbalanced commitment of valve to left ventricle was a factor.	Indicate whether Common atrioventricular valve with unbalanced commitment of valve to left ventricle was present.
962	Procedure-Specific Factors - Common atrioventricular valve with unbalanced commitment of valve to right ventricle		ShortName: PSFCAVRight
	Detail changed:	Changed from:	Changed to:
	Definition	Indicate whether Common atrioventricular valve with unbalanced commitment of valve to right ventricle was a factor.	Indicate whether Common atrioventricular valve with unbalanced commitment of valve to right ventricle was present.
963	Procedure-Specific Factors - Moderate to severe systemic ventricular dysfunction		ShortName: PSFModSevSVD
	Detail changed:	Changed from:	Changed to:
	Definition	Indicate whether Moderate to severe systemic ventricular dysfunction was a factor.	Indicate whether Moderate to severe systemic ventricular dysfunction was present.
	ParentHarvestCodes	1670 1680 1690 1700 2330 2130 950 960 970 980 1000 1010 2780 2790 3310 3320 1030 2340 1025	1670 1680 1690 1700 2330 2130 3160 950 960 970 980 1000 1010 2780 2790 3310 3320 1030 2340 1025

970	Procedure-Specific Factors - Posterior coronary loop: circumflex coming off the RCA	ShortName: PSFPostLoopCirc	
	Detail changed:	Changed from:	Changed to:
	Definition	Indicate whether Posterior coronary loop: circumflex coming off the RCA was a factor.	Indicate whether Posterior coronary loop: circumflex coming off the RCA was present.
971	Procedure-Specific Factors - Posterior Coronary Loop: left trunk coming off the RCA	ShortName: PSFPostLoopLeftTrunc	
	Detail changed:	Changed from:	Changed to:
	Definition	Indicate whether Posterior Coronary Loop: left trunk coming off the RCA was a factor.	Indicate whether Posterior Coronary Loop: left trunk coming off the RCA was present.
972	Procedure-Specific Factors - Double Coronary Loops	ShortName: PSFDoubleLoops	
	Detail changed:	Changed from:	Changed to:
	Definition	Indicate whether Double Coronary Loops (inverted origin of right and left coronary arteries) was a factor.	Indicate whether Double Coronary Loops (inverted origin of right and left coronary arteries) was present.
973	Procedure-Specific Factors - Single Coronary Ostium	ShortName: PSFSingOst	
	Detail changed:	Changed from:	Changed to:
	Definition	Indicate whether Single coronary ostium was a factor.	Indicate whether Single coronary ostium was present.
974	Procedure-Specific Factors - Intramural coronary	ShortName: PSFIntramuralCor	

	Definition	Indicate whether Intramural coronary was a factor.	Indicate whether Intramural coronary was present.
975	Procedure-Specific Factors - Large infundibular coronary artery from LAD		ShortName: PSFLgInfundArt
	Detail changed:	Changed from:	Changed to:
	Definition	Indicate whether Large infundibular coronary artery from LAD was a factor.	Indicate whether Large infundibular coronary artery from LAD was present.
976	Procedure-Specific Factors - Malaligned commissures		ShortName: PSFMalComm
	Detail changed:	Changed from:	Changed to:
	Definition	Indicate whether Malaligned commissures was a factor.	Indicate whether Malaligned commissures was present.
977	Procedure-Specific Factors - Take down of a commissure		ShortName: PSFTakeDownComm
	Detail changed:	Changed from:	Changed to:
	Definition	Indicate whether Take down of a commissure was a factor.	Indicate whether Take down of a commissure was present.
978	Procedure-Specific Factors - Aorto-pulmonary diameter mismatch		ShortName: PSFAortoPulMis
	Detail changed:	Changed from:	Changed to:
	Definition	Indicate whether Aorto-pulmonary diameter mismatch was a factor.	Indicate whether Aorto-pulmonary diameter mismatch was present.
979	Procedure-Specific Factors - Side by side vessels		ShortName: PSFSideBySide
	Detail changed:	Changed from:	Changed to:
	Definition	Indicate whether Side by side vessels was a factor.	Indicate whether Side by side vessels was present.
980	Procedure-Specific Factors - Posterior native aorta		ShortName: PSFPostNatAorta
	Detail changed:	Changed from:	Changed to:
	Definition	Indicate whether Posterior native aorta was a factor.	Indicate whether Posterior native aorta was present.
981	Procedure-Specific Factors - Subaortic obstruction/ conal septum malalignment		ShortName: PSFSubAObs
	Detail changed:	Changed from:	Changed to:
	Definition	Indicate whether Subaortic obstruction / conal septum malalignment was a factor.	Indicate whether Subaortic obstruction / conal septum malalignment was present.
982	Procedure-Specific Factors - Bicuspid native aortic valve (Bicuspid neopulmonary valve)		ShortName: PSFBicusNatAortic
	Detail changed:	Changed from:	Changed to:
	Definition	Indicate whether Bicuspid native aortic valve (Bicuspid neopulmonary valve) was a factor.	Indicate whether Bicuspid native aortic valve (Bicuspid neopulmonary valve) was present.

983	Procedure-Specific Factors - Bicuspid native pulmonary valve (Bicuspid neo-aortic valve)	ShortName: PSFBicusNatPulm	
	Detail changed:	Changed from:	Changed to:
	Definition	Indicate whether Bicuspid native pulmonary valve (Bicuspid neo-aortic valve) was a factor.	Indicate whether Bicuspid native pulmonary valve (Bicuspid neo-aortic valve) was present.
984	Procedure-Specific Factors - Truncus type 3 (PA Branches from PDA or descending aorta)	ShortName: PSFTruncType3	
	Detail changed:	Changed from:	Changed to:
	Definition	Indicate whether Truncus type 3 (PA Branches from PDA or descending aorta) was a factor.	Indicate whether Truncus type 3 (PA Branches from PDA or descending aorta) was present.
985	Procedure-Specific Factors - Abnormal coronary	ShortName: PSFAbnormalCor	
	Detail changed:	Changed from:	Changed to:
	Definition	Indicate whether Abnormal coronary was a factor.	Indicate whether Abnormal coronary was present.
986	Procedure-Specific Factors - Truncal valve regurgitation (moderate to severe)	ShortName: PSFTruncValRegurg	
	Detail changed:	Changed from:	Changed to:
	Definition	Indicate whether Truncal valve regurgitation (moderate to severe) was a factor.	Indicate whether Truncal valve regurgitation (moderate to severe) was present.
987	Procedure-Specific Factors - Truncal Valve stenosis (moderate to severe)	ShortName: PSFTruncValSten	
	Detail changed:	Changed from:	Changed to:
	Definition	Indicate whether Truncal valve stenosis (moderate to severe) was a factor.	Indicate whether Truncal valve stenosis (moderate to severe) was present.
988	Procedure-Specific Factors - Source of pulmonary blood flow: Shunt - systemic artery-to-pulmonary artery	ShortName: PSFSrcPulFloShuntSys	
	Detail changed:	Changed from:	Changed to:
	Definition	Indicate whether Source of pulmonary blood flow: Shunt - systemic artery-to-pulmonary artery was a factor.	Indicate whether Source of pulmonary blood flow: Shunt - systemic artery-to-pulmonary artery was present.
	ParentHarvestCodes	870	870 2160 2170 2180
	ParentValue	= "Norwood procedure"	= "Norwood procedure", "Hybrid Approach "Stage 1", Application of RPA & LPA bands", "Hybrid Approach "Stage 1", Stent placement in arterial duct (PDA)" or "Hybrid Approach "Stage 1", Stent placement in arterial duct (PDA) + application of RPA & LPA bands"
989	Procedure-Specific Factors - Source of pulmonary blood flow: Shunt - ventricle-to-pulmonary artery	ShortName: PSFSrcPulFloShuntVent	
	Detail changed:	Changed from:	Changed to:
	Definition	Indicate whether Source of pulmonary blood flow: Shunt - ventricle-to-pulmonary artery was a factor.	Indicate whether Source of pulmonary blood flow: Shunt - ventricle-to-pulmonary artery was present.

ParentHarvestCodes	870	870 2160 2170 2180
ParentValue	= "Norwood procedure"	= "Norwood procedure", "Hybrid Approach "Stage 1", Application of RPA & LPA bands", "Hybrid Approach "Stage 1", Stent placement in arterial duct (PDA)" or "Hybrid Approach "Stage 1", Stent placement in arterial duct (PDA) + application of RPA & LPA bands"

990 **Procedure-Specific Factors - Source of pulmonary blood flow: Superior caval vein-to-pulmonary artery** ShortName: PSFSrcPulFloSuper

Detail changed:	Changed from:	Changed to:
Definition	Indicate whether Source of pulmonary blood flow: Superior caval vein-to-pulmonary artery was a factor.	Indicate whether Source of pulmonary blood flow: Superior caval vein-to-pulmonary artery was present.

Procedure-Specific Factors - Bidirectional Cavopulmonary Anastomosis			ShortName: PSFBiCavoAnast
	Detail changed:	Changed from:	Changed to:
	Definition	Indicate whether Bidirectional Cavopulmonary Anastomosis was a factor.	Indicate whether Bidirectional Cavopulmonary Anastomosis was present.

1056

Operation Type			ShortName: OpType
	Detail changed:	Changed from:	Changed to:
	HarvestCode=1 - Definition	If cardiopulmonary bypass is used, this must be chosen as the case category whether the procedure is thoracic (e.g., tracheal reconstruction) or cardiovascular in nature.	If the procedure is cardiovascular (includes the heart, great vessels, or any branches of the great vessels), and cardiopulmonary bypass is used, this should be chosen as the case category. Do not choose this case category for operations that are not cardiovascular, even if cardiopulmonary bypass is used (see OpType 9, below). Most lung transplants involve anastomosis to the left atrium (as well as anastomosis to distal main PA or central branch PA). This would be considered a cardiovascular procedure. Transplant, Lung(s) is a STAT Category 3 procedure.
	HarvestCode=2 - Definition	If the procedure is cardiovascular, but cardiopulmonary bypass is not used, this must be chosen as the case category. This includes any procedure that includes the heart, great vessels, or any of the branches from the great vessels, where CPB is not used. Examples include but are not limited to: coarctation of the aorta repair, creation of a systemic-to-pulmonary artery shunt, patent ductus arteriosus ligation. A delayed sternal closure is included in this category. If a pericardial window done for cancer, it should be classified as a Cardiac Operation (Operation type = No CPB Cardiovascular).	If the procedure is cardiovascular, but cardiopulmonary bypass is not used, this must be chosen as the case category. This includes any procedure that includes the heart, great vessels, or any of the branches from the great vessels, where CPB is not used. Examples include but are not limited to: coarctation of the aorta repair, creation of a systemic-to-pulmonary artery shunt, patent ductus arteriosus ligation. A delayed sternal closure is included in this category.
	HarvestCode=4 - Definition	If a procedure is performed on a structure within the chest cavity but does not involve the cardiac chambers or vessels, it would be a Thoracic category case (for example, lobectomy, pectus excavatum/carinatum repair, anterior spine exposure). There will be thoracic cases that require cardiopulmonary bypass (e.g., some types of tracheal reconstructions). In those cases, the use of cardiopulmonary bypass takes precedence and the case would not be Thoracic, but CPB.	If a procedure is performed on a structure within the chest cavity but does not involve the cardiac chambers or vessels, it would be a Thoracic category case (for example, lobectomy, pectus excavatum/carinatum repair, anterior spine exposure). There will be thoracic cases that require cardiopulmonary bypass (e.g., some types of tracheal reconstructions). In those cases, the use of cardiopulmonary bypass takes precedence and the case would not be Thoracic, but rather CPB Non-Cardiovascular.

HarvestCode=9 - Definition	Procedures that are done with bypass support that do not involve a concomitant cardiovascular procedure. For example, tracheal surgery, neurosurgical procedures, resuscitation and rewarming of drowning victims. These cases are not included in the numerator or denominator of mortality calculations or reports.	Procedures that are done with bypass support that do not involve a concomitant cardiovascular procedure. For example, tracheal surgery, neurosurgical procedures, resuscitation and rewarming of drowning victims. These cases are not included in the numerator or denominator of mortality calculations or reports. Tracheal reconstructions done on CPB, without a concomitant cardiovascular procedure are OpType 9 - CPB Non-cardiovascular. This would pertain, for example to a slide tracheoplasty or tracheal patch-plasty done on CPB. But, if the operation also includes a cardiovascular procedure (as in operation for PA sling with both tracheal repair and division/reimplantation of pulmonary artery), then it would be CPB Cardiovascular.
